Distribution

Static preparation

A global brand, close to you,
wherever you are.

- Sales delegations
- Own-manufacture plants

Our 35 offices distributed around the world, the professionalism of our 2,200 workers and our international experience help us to always remain close to you, to your needs, to your projects.

But, above all, our implication, our commitment to service and our way of directly interacting with those around us, from professional to professional, means that we use the same language when responding to your challenges with the proximity of a major brand.

Wherever you are.

Foodservice

Imagine having
everything connected...

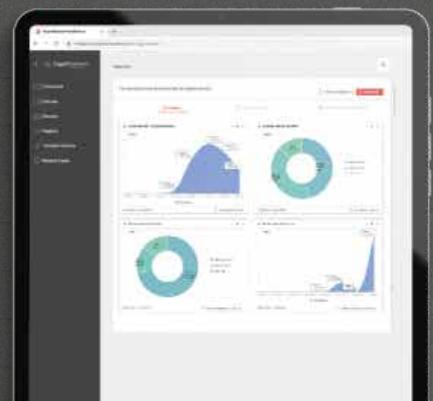

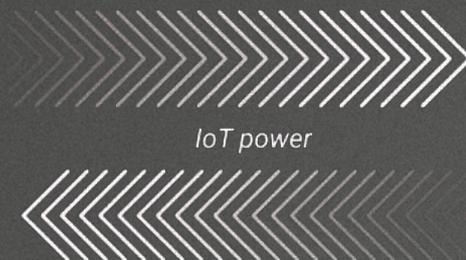

Getting the most out of your kitchen from wherever and whenever you want.

AWS
Well-Architected

FagorKonnnect IoT platform meets the criteria of the AWS Well-Architected Framework, guaranteeing the highest standards of security, reliability, efficiency and sustainability.

DASHBOARD

Manage
your business

Monitor and control all your equipment in real time, from anywhere, with a control panel that gives you total freedom.

Make decisions quickly and efficiently with all the information at your fingertips.

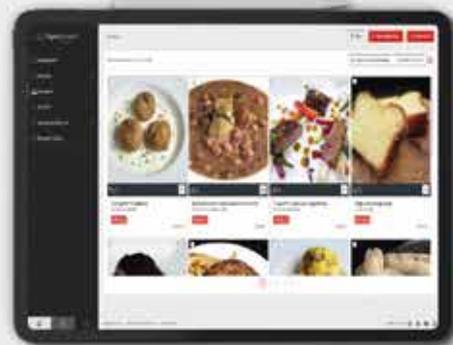

DEVICES

Control
your device

Get the most out of your devices with tools that give you detailed control.

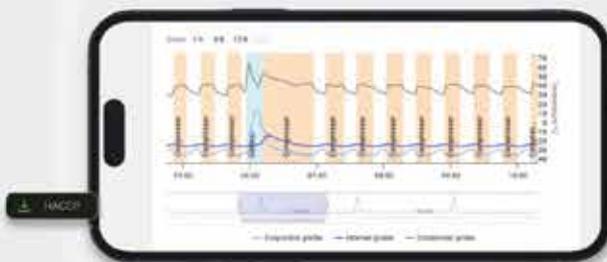

Manage tasks remotely while promoting safety at every step.

RECIPES

Create
your recipe

Easily create and save your recipes and send them to all your devices wherever they are.

HACCP

Ensure
hygiene

Guarantee all hygiene and food safety requirements with HACCP system.

TECHNICAL SERVICE

Improve
your service

Optimise your technical service and receive instant information on warnings, notifications or problems.

In brief, maximize
comfort.

Symphony

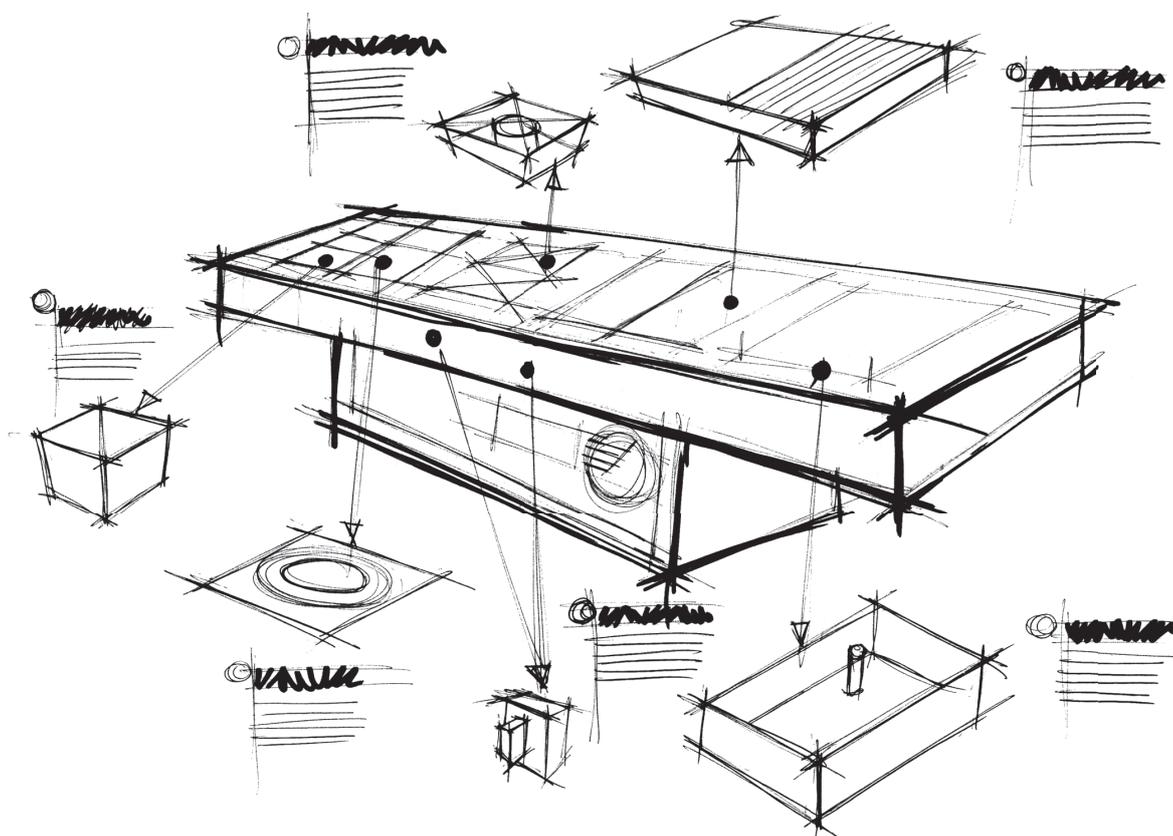

Symphony offers you the possibility to design and personalise your kitchen with complete freedom, based on your operating needs, combining the different elements, devices and accessories available, symphony will solve and optimise any space.

Symphony

The composition of a perfect symphony

The Symphony range of kitchens enables the kitchen professional to design a tailor-made commercial kitchen with complete freedom, arranging and adapting its various components to suit their style of working.

A wide range of excellent design, high-quality components, shapes, sizes, complements and finished, which let's you customise is the ideal solution to enjoy cooking and delight the most demanding of palates.

Every chef's dream.

The Symphony range has been created to offer design and functional solutions to meet the requirements of kitchen professionals. Elegant, versatile, high powered and high-quality, it is designed by and for the most demanding professionals.

In addition to this, a multitude of advantages that enable optimisation of the available space and management of the work in the kitchen in an effective way according to the chef's tastes and style of working.

Main differences between Symphony and KORE Monoblock

	SYMPHONY	KORE Monoblock
Connections	Centralized connections	Individual connection. Optional a module in which to centralize all the connections.
Thickness	3 mm (+ 3 mm reinforcement)	KORE 900: 2mm KORE 700: 1,5mm
Customization	Endless options	Unique aesthetic front panel, side finishes and coloured controls available.
Configuration (functionalities)	Made to measure design process.	Exceptions: - Worktop height = 900mm - Not possible to integrate boiling and bratt pans. - Maximum length = 5 modules. - Special brass open burners - Special fry-tops with water channel and drain system integrated in countertop.
Design and quoting process	Made to measure design process.	Easily achievable design.
Transport	It can be shipped the way you need it. The "tailor-made" applies to shipping as well.	Standard packaging. No welding or no on-site welding or polishing in situ. Each wall block is a package (the central blocks are divided into two packages). Verticality is shipped separately.
Availability	On request. Custom manufacturing book and build.	Fast availability, on request. Manufacturing based on modular equipment which speeds up manufacturing.

Tailor-made kitchen: Symphony
Symphony

The composition of a perfect Symphony

One piece worktop kitchen:
KORE Monoblock

A unique solution for your kitchen

KORE Monoblock

KORE Monoblock is a unique worktop designed to offer all the benefits of our modular equipment and highlight its capabilities.

Main features	023
How to build your block.....	025
Example	025
Differences.....	027

A unique solution for your kitchen

The KORE Monoblock range has been designed to offer all the benefits of our modular units; combined in a single worktop that also brings great advantages.

Configuring the ideal block is easier than ever, thanks to the possibility of combining the modular units of the **KORE 900 and KORE 700 range** as you wish.

The worktop is designed as one single piece, without joints or gaps, so you can ensure an impeccable level of cleaning. All of this is in addition to an elegant aesthetic that is intricately designed to draw everyone's attention. A solution that guarantees optimum hygiene and durability for your equipment, thanks to its robust design created to withstand intensive work levels and offer maximum performance.

The perfect worktop for your kitchen

KORE Monoblock offers integration and functionality and is the ideal finish for your workspace. The perfect worktop to bring your kitchen together in the same style, making it look more impressive.

2

On worktop

Select the equipment for your worktop

Choose the equipment you'd like to include in your kitchen worktop. You can choose from a wide range of products within our KORE 900 and KORE 700 range.

3

Under worktop

Select elements under the worktop

Complete your design by adding the equipment under your worktop. You can add neutral stands to store elements that are not being used, so they are organised and you optimise your kitchen space. You can also include refrigerated stands to have the refrigerated food really.

4

Verticality

Select elements to go above your worktop

Choose the supports that best suit your needs (standard, with tap, with plug or special supports for machinery like iKORE 0623 ovens or salamanders) and the corresponding racks in between.

5

Finishes

Select side-panels to complete the block

Add side-finishes to improve aesthetics, hygiene and ergonomics.

End result

All gas cooking equipment should be fitted with gas governors:

- LPG: 37 g/cm²

- Natural Gas: 20 g/cm²

Gas cookers

General characteristics

- Stamped surface tops, manufactured in 2 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished.
- Hobs with dimensions 397 x 350 mm allowing the use of large pans and pots. The shortened distance between the central prongs, 75 mm, allows them to support pans with a very small diameter (8 cm). This also avoids the danger of small containers tipping over.
- The hobs are manufactured in RAAF enamelled cast iron (resistant to acid and alkali products, fire and high temperatures).
- Double crown burners and diffusers in nickel-plated cast iron, guaranteeing the even distribution of heat from the flame in the bottom of the pans, even large ones. This avoids the accumulation of heat at a single point and optimises the energy transfer of the product.
- Burners with different power ratings to adapt to the containers and their use with different foodstuffs:
 - 5,25 kW (Ø 100 mm),
 - 8,0 kW (Ø 120 mm)
 - 10,2 kW (Ø 140 mm).

- Reassemble with easy slot burners.
- Low consumption pilots and thermocouples positioned within the body of the burner for greater protection.
- Gas conduction in flexible stainless steel tubes, making internal manipulation easier and facilitating any repair work.
- Controls set on a protective base with a system against water infiltration.
- High temperature enamelled cast iron flue protector aligned with the hobs, facilitating manoeuvrability and supporting larger containers, increasing useful surface area.
- Access to the components from the front.

OVEN

- Option to choose between a GN 2/1 static oven with dimensions of 1,000 x 700 x 290 mm (OP version cookers); or an electrical oven with GN 2/1 dimensions.
- User-friendly controls set on the upper panel for better ergonomics.
- Stainless steel cooking chamber, making it easier to clean and ensuring a better level of hygiene.
- Tray inserted sideways, making it more user-friendly.
- Guide rails at three levels which offers different usage options.

- Guides rails with "U" shape to prevent the racks from tipping.
- Temperature controlled by thermostatic valve (125 – 310 °C).
- Heating:
 - Gas: Stainless steel tube burner (two branches in OP version), with pilot flame, thermocouple, and Piezo electric ignition.
 - Electric: Heating via stainless steel covered elements with selector switch to control the upper and/or lower zones.
- Oven floor made from 6 mm cast iron, which guarantees better performance and even heat distribution.
- Fibre glass closing seal that improves the thermal efficiency of the oven and guarantees durability.
- Detachable oven door which makes repairs easier.

OPTIONAL ACCESSORIES

(see accessories page at end of chapter)

- Plate to place over 5,25 kW burners.
- Water column.
- Brass transmitters.

MODELS: H: With high power burners. / OP: With panoramic oven.

Gas solid tops

General characteristics

- Stamped surface tops manufactured in 2 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished.
- 10 mm thick cast iron plate with rounded corners. 300 mm diameter surface.
- Refractory brick with cast iron shield inside to take better advantage of the heat and distribute it better.
- Temperatures for differentiated use: 500 °C at the centre and 200 °C near the edges.
- Low consumption pilot and thermocouple.
- Gas conduction in flexible stainless steel tube, making internal manipulation easier and facilitating any repair work.
- Controls set on a protective base with system against water infiltration.

- High temperature enamelled cast iron flue protector aligned with the hobs, facilitating manoeuvrability and support of the containers, increasing the useful surface area.
- Access to the components from the front.

OVEN

- Easy to use static GN 2/1 size oven, with the controls positioned on the upper panel.
- Stainless steel cooking chamber, making it easier to clean and provides better hygiene.
- Tray introduced sideways, making it easier to handle.

- Guides at three heights to offer different working options.
- Guides with "U" shape to prevent the trays from tipping.
- Temperature controlled by thermostatic valve (125 – 310 °C).
- Tubular stainless steel burner, with pilot and thermocouple, and piezoelectric ignition.
- Oven floor manufactured in 6 mm cast iron, guaranteeing better performance and even heat distribution.
- Fibreglass closing seal to improve the oven's thermal efficiency.

900 SERIES

Paella cookers

General characteristics

- Stamped surface tops manufactured in 2 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished.
- Double crown burner with four rows of flames in each, guaranteeing the even distribution of heat from the flame to the bottom of the paella pan.
- Low consumption pilot and thermocouple.
- Gas conduction in flexible stainless steel tube, making internal manipulation easier and facilitating any repair work.
- Controls set on a protective base with system against water infiltration.

- High temperature enamelled cast iron flue protector aligned with the hobs, facilitating manoeuvrability and support of the containers, increasing the useful surface area.
- Access to the components from the front.

PAELLA OVEN

- 665 x 665 x 325 mm static paella oven, with the controls located on the top panel.
- Stainless steel cooking chamber, making it easier to clean and provides better hygiene.

- Temperature controlled by thermostatic valve (125 – 350°C).
- Tubular stainless steel burner at the front; operates with temperature gradient. Pilot with piezoelectric ignition and thermocouple.
- Oven floor manufactured in stainless steel.
- Side opening double panel door.

Electric cookers

General characteristics

- Surface tops manufactured in 2 mm thick AISI-304 stainless steel, designed to prevent liquids spilt from the pans from penetrating into the cooker.
- Laser-cut joints, automatic welding and polished.
- Hot plates manufactured with 300 x 300 mm cast iron, with 4 kW of power, hermetically sealed into the stamped surface top.
- Power regulation by 7 position selector.
- Safety thermostat for each plate.
- Interior fan to lower the temperature of the components.
- Stamped surface with rounded corners for easy cleaning.
- High temperature enamelled cast iron flue protector.

- Access to the components from the front.
- Machines with IPX5 grade water protection.

OVEN

- Easy to use static GN 2/1 size oven with the controls positioned on the upper panel for better ergonomics.
- Stainless steel cooking chamber, making it easier to clean and providing better hygiene.
- Tray introduced sideways for easier handling.
- Guides at three heights to offer different working options.
- Guides with "U" shape to prevent the trays from tipping.
- Thermostatic temperature control (125 – 310 °C).

- Heating by means of stainless steel shielded heating elements with selector switch to operate the upper and/or lower zone.
- Oven floor manufactured in 6 mm cast iron, guaranteeing better performance and even heat distribution.
- Fibreglass closing seal to improve the oven's thermal efficiency.
- Dismountable oven door to facilitate repair.

Voltage:

- 400 V 3+N.
- Ask for other voltages.

900 SERIES

Electric solid tops

General characteristics

- Surface tops manufactured in 2 mm thick AISI-304 stainless steel, designed to prevent liquids spilt from the pans from penetrating into the cooker.
- Laser-cut joints, automatic welding and polished.
- "Solid-top" models with four heating elements beneath the 15 mm thick cast steel fry-top, distributed so as to heat the four quadrants of the fry-top independently.
- Power control for each heating element. This allows the user to work with different temperature gradients on the fry-top.- Interior fan to lower the temperature of the components.
- Stamped surface with rounded corners for easy cleaning.
- High temperature enamelled cast iron flue protector.
- Access to the components from the front.

- Machines with IPX5 grade water protection.

OVEN

- Easy to use static GN 2/1 size oven with the controls positioned on the upper panel for better ergonomics.
- Stainless steel cooking chamber, making it easier to clean and providing better hygiene.
- Tray introduced sideways for easier handling.
- Guides at three heights to offer different working options.
- Guides with "U" shape to prevent the trays from tipping.

- Thermostatic temperature control (125 – 310 °C).
- Heating by means of stainless steel shielded heating elements with selector switch to operate the upper and/or lower zone.
- Oven floor manufactured in 6 mm cast iron, guaranteeing better performance and even heat distribution.
- Fibreglass closing seal to improve the oven's thermal efficiency.
- Dismountable oven door to facilitate repair.

Voltage:

- 400 V 3+N . Ask for other voltages.

Induction cookers

General characteristics

- 6 mm thick glass ceramic, hermetically sealed into the 2 mm thick AISI-304 stainless steel surface top.
- Laser-cut joints, automatic welding and polished.
- Cooking areas demarcated by Ø 280 mm circular screen print, with 5 kW of power in each area, rapidly heated and ideal for à la carte service.
- Perfect control of cooking thanks to the energy regulator with 10 power levels, which allows you to work at low power for delicate recipes or at maximum power for fast service.
- Supplies energy only to the area upon which the container rests, with the rest of the glass ceramic surface remaining cold.
- Only functions when the presence of a cooking container is detected. Heating is interrupted upon removing the container.
- As a result, a great energy saving is obtained (energy consumption is reduced by around 50 % compared to gas burners).
- The working environment and atmosphere is more comfortable, as the energy is concentrated on the base of the container to be heated, irradiation and heat dispersal are reduced and the cooking temperature is reached rapidly.
- Safety against overheating. Diagnosis of errors (flashing lights).
- High temperature enamelled cast iron flue protector.
- Access to the components from the front.
- Machines with IPX5 grade water protection.

Voltage:
- 400 V 3ph-

900 SERIES

Pasta cookers

General characteristics

- Surface tops manufactured in 2 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished.
- Wells integrated into the surface top, manufactured in 1.5 mm thick AISI-316L stainless steel.
- Wells with 1/1 dimensions, capacity 40 litres. Accomodate different configurations of different sized baskets
- Standard configuration : three 1/3 type baskets per well.
- Optional kit basket type 1/4 and type 1/6.
- Medium & high speed well filling using electrovalve positioning.
- Draining of well using of high temperature resistant mechanical ball valve with safety overflow.

- Automatic safety system that breaks the circuit if the water runs out.
- Drainer located at the front for the baskets to be rested on.
- Controls with protective base and system against water infiltration. High temperature enamelled cast iron flue protector.
- Access to the components from the front.
- Machines with IPX5 grade water protection.

GAS MODELS

- Gas models with stainless steel burner situated on the outside of the well with combustion chamber that allows the well to be heated from the bottom and sides (up to the minimum filling level).
- Electronic ignition by spark train. Alternative manual ignition tube.
- Heating controlled by safety valve.

ELECTRIC MODELS

- Electric models with AISI-304 stainless steel heating elements situated in the bottom of the well to heat the water directly.
- Heating controls by energy regulator.
- Voltage: 400 V 3+N - Ask for other voltages.

Optional accessories

(see accessories page at end of chapter)

- Kit of 6 baskets 1/6 square.
- Kit of 6 baskets 1/6 round.
- Kit of 2 baskets 1/2.

Fry-tops

General characteristics

- Surface tops manufactured in 2 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished.
- Fry-tops manufactured in 20 mm thick mild steel, high powered and with rapid temperature attainment.
- Versions with 50 micron thick chrome surface for the three types of fry-top.
- Models with smooth, grooved and mixed (2/3 smooth and 1/3 grooved) fry-tops.
- Electrical heated models use stainless steel shielded heating elements, temperature controlled by thermostat, between 80 and 300 °C.
- Gas heated models have burners with two branches (one burner for half module models, two independent burners for models with a whole module).
- Gas models come with the option of thermostatic temperature control (between 80 and 300 °C) or with operation by security valve with thermocouple.
- Gas: Ignition by electronic spark train. Easy manual ignition.
- The whole module fry-tops come with independent heating zones.
- Safety thermostat in models with thermostatic control.
- Rapid reaction and recovery times of the fry-top temperature.
- The fry-tops are integrated into the stamped surface top.
- The stamped housing with rounded edges and corners make them very easy to clean.
- Fry-top tilted towards the front to facilitate fat and liquid collection.
- Fitted with an opening for the collection of cooking fat and storage tray with a capacity of up to 2 litres depending on the model.
- Option of easily dismountable side and back splash guards.
- High temperature enamelled cast iron flue protector.
- Access to the components from the front.
- Machines with IPX5 grade water protection.

OPTIONAL ACCESSORIES

(see accessories page at end of chapter)

- Scraper (*).
- Splash guard (in three pieces to facilitate cleaning).

Voltage for electric models:

- 400 V 3+N - Ask for other voltages.

(*). Models with chrome surface, scraper included

900 SERIES

Fryers

Internal heaters

- High-power machines which heat up very fast and with a high power:litre ratio (up to 1.00 kW/litre in gas models).
- Ignition by spark train for the gas models.
- Safety thermostat in all models.
- Unloading of oil from the well by means of a robust and reliable ball valve, resistant to high temperatures.
- With individual lids for each well.
- High temperature enamelled cast iron flue protector.
- Access to the components from the front.
- Machines with IPX5 grade water protection.

General characteristics

- Surface tops manufactured in 2 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished.
- Wells stamped into the surface top.
- Cold zone in the lower part of the well, which helps to maintain the quality and characteristics of the oil in use for longer.
- Thermostatic temperature control between 60 and 200 °C.
- Gas models with three longitudinal heating tubes integrated into the well.
- High efficiency gas burners.
- Electric models with AISI-304 stainless steel heating elements located inside the well, which can be swivelled by more than 90° for perfect cleaning.

MODEL WITH DIGITAL CONTROL:

- High-precision electronic oil temperature control between 60-200°C, +/- 1°C.
- Setpoint temperature display with an indicator to show when temperature has been reached.
- Time control card per basket with audible alarm.
- "Melting" programme.

SUPPLIED BASKETS

- 21-litre fryers: 2 small baskets per well (130 x 330 x 130 mm).
- 15-litre fryers: 1 small basket per well (250 x 280 x 100 mm).

OPTIONAL ACCESSORIES

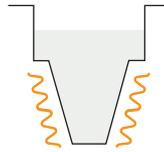

- (see accessories page at the end of the chapter)
- 21-litre fryers: large basket (260 x 330 x 130 mm).
 - 15-litre fryers: small basket (125 x 280 x 100 mm).

900 SERIES

Fryers

External heaters

General characteristics

- Surface tops manufactured in 2 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polishes. Screws hidden from view.
- Cold zone in the lower part of the tank, which helps to maintain the quality and characteristics of the oil in use for longer.
- Safety thermostat in all models.
- Unloading of oil from the tank by means of a robust and reliable ball valve, resistant to high temperatures.
- Individual lid.
- High temperature enamelled cast iron flue protector. - Access to the components from the front.
- Machines with IPX5 grade water protection.

- Easy to clean V-shaped tank into the surface top with robotized weld and polished.
 - External high efficiency heating elements.
 - Container placed under the tank for oil drains with filter.
 - Thermostatic temperature control between 60 and 200 °C.
 - High-power machines which heat up very fast and with a high power: litre ratio (up to 1.00 kW/litre in gas models).
 - Ignition by spark train for the gas models.
- Voltage for electric models:
- 400 V 3N - Ask for other voltages.

Gas Fryers*

Electric fryers

900 SERIES

Grill

General characteristics

- Surface tops manufactured in 2 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished.
- Cast iron grills, dismountable without the need for tools, in 170 mm wide sections.
- The iron grills are reversible, with different finishes on each side:
 - Tilted and grooved with ridges for meat.
 - Horizontal and flat for fish and vegetables.
- The grills reach a very high temperature (400 °C), meaning that the surface of the product seals rapidly, keeping the inside of the food much juicier.
- In the models with stainless steel grill, this is manufactured with sheets of AISI-304 in "V" shape to facilitate cleaning.
- Fitted with an opening for the collection of cooking fat and storage tray with a capacity of up to 12 litres (one tray in half module machines, two trays in machines with a whole module).
- The fat collection trays offers the option of putting water in them, and thanks to the heat irradiation of the gas burners or electrical heating elements, low intensity steam is generated, so that the food can be grilled in an atmosphere of steam.
- Grills fitted with 130 mm high dismountable guard to avoid splashing, manufactured in stainless steel.

- High temperature enamelled cast iron flue protector.
- Access to the components from the front.
- Machines with IPX5 grade water protection.

ELECTRIC COUNTERTOP MODELS

- Groups of stainless steel covered elements upon which you can cook food directly (a group of 3 elements for half-sized module models and 2 groups for whole module models).
- Water tray for safety. It also allows an adequate level of humidity to be reached for optimum cooking conditions.

ELECTRIC FLOOR MODELS

- Groups of three stainless steel elements under the roasting rack, with radiant deflector (a group of three elements for half-sized module models, two groups for whole module models).
- Independent control for each group of elements via an energy regulator.

GAS COUNTERTOP MODELS

- Groups of high-efficiency tube burners, (a group of two burners for half-sized module models, two groups for a single module models).
- Independent control for each group of burners via a safety valve with a thermocouple.
- Burners turned on using Piezo electric ignition.

- The burners heat ceramic stones that sit on a supporting rack, so that they can then heat food on the grill.

GAS FLOOR MODELS

- Groups of three high-efficiency tube burners, with a radiant deflector (a group of three burners for half-sized module models, two groups for whole module models).
- Independent control for each group of burners via a safety valve with a thermocouple.
- Burners are turned using an electric multi-spark ignition. With an access tube for manual ignition.

ACCESSORIES INCLUDED

(See accessories page at the end of the chapter)

Special scraper with two profiles for models with cast iron grill.

Special scraper adapted for models with stainless steel grill.

Boiling pans

General characteristics

- Surface tops manufactured in 2 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished.
- Double walled lid balanced by means of a hinge with front handle, with diagonal opening to 75° which allows the lid to be kept open in any position.
- Well stamped into the surface top by robotic welding, manufactured in AISI-304 stainless steel, with the bottom of the well in AISI-316L stainless steel.
- Well filling with hot or cold water by electrovalve, activated with a single switch located on the front panel as previous page.
- Well emptying by 2" safety valve with handle in athermic material and safe and effortless handling.
- Robust and reliable filter for draining the well manufactured in AISI-304 stainless steel. Easily extractable.
- Controls with protective base and system against water infiltration.
- High temperature enamelled cast iron flue protector.
- Access to the components from the front.
- Machines with IPX5 grade water protection.

Indirectly heated models – bain marie

- Bain marie chamber around the well, with automatic filling system when the machine is connected.
- Automatic chamber level control with quadruple security: pressure switch to control the pressure in the chamber, overpressure security valve, thermostat to limit overheating in the chamber and pressure gauge incorporated into the surface top.
- Automatic flushing of the chamber.
- Heating at the bottom of the pan acts on the water in the surrounding chamber, meaning that the saturated steam generated at a temperature of 107 °C heats the bottom and sides of the well in a uniform manner.
The temperature reached is lower than that obtained with direct heating.
- Stamped pan floor to avoid deformations.
- Indicator light to show when the machine is connected and when it is heating.

GAS MODELS

- Group of optimised combustion stainless steel tubular burners, controlled by energy regulator and by pressure switch.
- Control by energy regulator and by pressure switch, permitting lower water and energy consumption.
- Ignition of group of burners by spark train.

ELECTRIC MODELS

- Heating elements located in the lower part of the bain marie.
- Heating controlled by energy regulator and pressure switch.
- Voltage:400 V 3+N - Ask for other voltages.

Pressure operation

- Folding and compensated lid, with flange closure
- Operation with pressure in the cooking well, 0.3 atmospheres.
- Overpressure safety valve on the lid.

Tilting bratt pans

General characteristics

- Laser-cut joints, automatic welding and polished.
- Motorised or crank operated elevation systems which raises the pan until it is vertical, to empty it completely.
- Versions with cast iron and stainless steel pans.
- Pan design with a rounded corners and no edges, and with a wide opening for unloading, making all cooking and cleaning operations easier.
- Flange around the perimeter to stop any condensed water from spilling over.
- The bottom of the wells is very thick (8 mm for iron pans and 10 mm for stainless steel pans), guaranteeing even heat distribution.
- Pans filled with water by means of electric valve operated with switch on the front of the machine. The filling pipe is located at the back of the machine.
- Double walled lid with drainer at the back to redirect water of condensation back into the well.
- Lid balance system by springs. Compensation system to avoid heavy falls. Can be regulated, with the same system for all modules.
- Micro breaking switch halts heating when the pan is raised.
- High temperature enamelled cast iron flue protector.
- Access to the components from the front.
- Machines with IPX5 grade water protection.
- Front access lid handle.
- Electrically heated models use shielded stainless steel heating elements located under the bottom of the pan.
- Gas heated models use steel burners with six branches (eight in the pan with one and a half modules), operated and controlled by safety valve with thermocouple.
- Temperature of the bottom of the pan controlled by thermostat, between 50 and 310 °C.
- The heating by branched burners or electrical heating elements located in the base of the pan itself, together with the high thickness of the bottom of the pan, ensure maximum uniformity of temperature distribution in all cases, guaranteeing even cooking.

VOLTAGE FOR ELECTRIC MODELS:

- 400 V 3+N - Ask for other voltages.

900 SERIES

Bain maries

General characteristics

- Surface tops manufactured in 2 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished.
- Wells accommodating different configurations of Gastronorm containers of different sizes, 150 mm high and with dimensions:
 - Half module: GN-1/1+1/3, with 22 litres capacity.
 - One module: GN-2/1+(2x1/3), with 44 litres capacity.
- Wells stamped into the surface top, manufactured with AISI-304 stainless steel.
- Standard format: 3 crosspieces to support Gastronorm containers.
- Simple draining of the well by removing the

- overflow tube.
- The filling tap is sold as an optional accessory.
- Regulation of water temperature by thermostat, between 30 and 90 °C.
- Controls with protective base and system against water infiltration (IPX5 grade protection).
- High temperature enamelled cast iron flue protector.
- Access to the components from the front.
- Machines with IPX5 grade water protection.

GAS MODELS

- Insulated combustion chamber, reducing heating of components.
- High efficiency stainless steel burner, located on the outside of the well.
- Electronic ignition by spark train.

- Tube for alternative manual ignition.

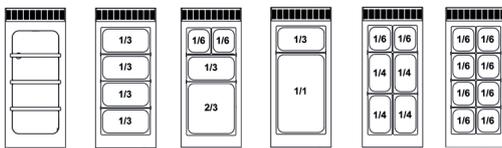

ELECTRIC MODELS

- AISI-304 stainless steel heating elements located on the outside of the well.
- Safety thermostat in the electric models
- Voltage: 400 V 3+N. It can be transformed to other voltages..

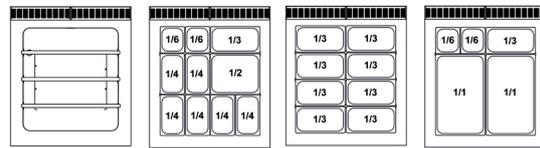

OPTIONAL ACCESSORIES

(see accessories page at end of chapter)

- Simple tap to install at the back of the bain marie.

Chips scuttle

General characteristics

- Half module electrical heating machine, heated by infrared light.
- Surface tops manufactured in 2 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished.
- Pan stamped into surface top, with capacity for 150 mm high Gastronorm GN-1/1 container.
- Perforated double bottom manufactured in stainless steel, tilted to remove excess frying oil and collected it in the container.
- Heat maintained by infrared lamp located at the back of the machine, operated by ON/OFF switch.
- Control with system against water infiltration.
- High temperature enamelled cast iron flue protector.
- Access to the components from the front.
- Machines with IPX5 grade water protection.

Neutral elements

General characteristics

- Half module and one module appliances.
- Surface tops manufactured in 2 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished.
- Machines adapted for the connection of a filling tap or water column at the back.
- High temperature enamelled cast iron back flue trim.

900 SERIES

Stands

General characteristics

- Manufactured with a solid structure in AISI-304 stainless steel.
- Easy connection to support 900 Kore range equipment.
- Can be used as open storage.
- Designed for the attachment of doors to turn them into closed cupboards.

900 SERIES

Refrigerated stands

General characteristics

- Interior constructed with AISI-304 stainless steel exterior in food grade stainless steel.
- 50 mm thickness, CFC-free, high-density (40 kg/m³) polyurethane insulation, injected under high pressure.
- Heavy-duty stainless-steel working top with 100mm high splash-back, preventing spillage behind the counter.
- Intuitive, digital display for electronic control with energy saving function to ensure an optimal control of storing products.
- Stainless steel doors with ergonomic, full-length, robust, perfectly integrated handle that avoids dust and dirt collection.
- Height-adjustable stainless steel legs. Height of the legs can be adjusted individually (130 mm - 200 mm) to enable convenient cleaning.
- Stamped edge interiors, easier cleaning operations to reduce potential dirt traps with a built-in drainage to get rid of waste liquid inside units.
- Removable and height adjustable epoxy coated GN 1/1 grids with a maximum loading capacity of up to 40 kg.
- Equipment with 1 GN 1/1 grids and height adjustable 2 sets of tray slides per each full door.
- W model drawers with GN 1/1 holding capacity.
- W2 model drawers with 2 x GN 1/1 OR 1x GN 2/1 holding capacity.
- Electrical power supply: 220V-240V 1N.

All gas cooking equipment should be fitted with gas governors:
 - LPG: 37 g/cm²
 - Natural Gas: 20 g/cm²

Gas cookers

General characteristics

- Stamped surface tops manufactured in 1.5 mm thick AISI-304 stainless steel
- Laser-cut joints and automatic welding. Hidden screws
- 397 x 580 mm double grates (397 x 290 mm for each burner) enabling the use of large pots and pans. The reduced distance of 75 mm between the central bars makes it possible to use pots with a very small diameter (8 cm), avoiding the risk of smaller pans tipping over.
- The grates are made of RAAF enamelled cast iron (resistant to alkaline and acid products, fire and high temperatures).
- Double-crown burners and diffusers made of nickel-plated cast iron which guarantee an even distribution of heat from the flame to the base of the pans, even for large pans. This therefore prevents heat from building up in a specific point and optimises energy transfer to the product.
- Burners of different strengths to adapt to containers and for use with different foods:
 - 5.25 kW (Ø 100 mm),
 - 8.0 kW (Ø 120 mm),
- Burners are easy to position
- Low-consumption pilot light and thermocouple located within the body of the burner for greater protection.
- Flexible stainless-steel gas pipes, facilitating internal manipulations in order to make repairs easier.

- Controls with a protective support base and system to prevent water infiltration.
- High-temperature enamelled cast iron flue protector which is flush with the grates therefore improving manoeuvrability, supporting larger containers and increasing the usable surface area.
- Access to components from the front.

OVEN

- Possibility of choosing between a static gas oven with dimensions NG 2/1 or a side-opening English-style oven with dimensions 860 x 570 x 410 mm with a side-opening double door or an electric oven with dimensions NG 2/1.
- Cooking chamber made entirely of stainless steel, which makes cleaning easier and ensures greater hygiene.
- Trays are inserted sideways which improves manoeuvrability.
- Heating:
 - Gas: Tubular stainless-steel burner with pilot light and thermocouple and piezoelectric ignition.
 - Electric: Heating through stainless steel heating elements with selector switch for operation of the upper and/or inner part.
- Thermostatic valve for temperature control (125 - 310 °C).

- Rails on three height levels to offer different cooking options.
- Rails with anti-tipping system to prevent trays from overturning.
- Cast iron oven floor which guarantees better performance and uniform heat distribution.
- Fibreglass closing seal to improve the thermal efficiency of the oven and ensure its durability.
- Stamped oven frame and inner door, ensuring a better oven closure.
- Detachable oven door to facilitate repairs.

OPTIONAL ACCESSORIES

(See accessories page at the end of the chapter)

- Frying plate to place on 5.25 kW burners.
- Water column.
- Brass transmitters.

Gas solid tops with open burners

General characteristics

- Stamped surface tops manufactured in 1.5 mm thick AISI-304 stainless steel.
- Laser-cut joints and automatic welding. Hidden screws.
- 397 x 580 mm double grates (397 x 290 mm for each burner) enabling the use of large pots and pans. The reduced distance of 75 mm between the central bars makes it possible to use pots with a very small diameter (8 cm), avoiding the risk of smaller pans tipping over.
- The grates are made of RAAF enamelled cast iron (resistant to alkaline and acid products, fire and high temperatures).
- Double-crown burners and diffusers made of nickel-plated cast iron which guarantee an even distribution of heat from the flame to the base of the pans, even for large pans. This therefore prevents heat from building up in a specific point and optimises energy transfer to the product.
- Burners of different strengths to adapt to containers and for use with different foods

- 5.25 kW (Ø 100 mm),
- 8.0 kW (Ø 120 mm),
- Burners are easy to position.
- 10 mm-thick cast iron plate with rounded corners, 400 x 580 mm, and shield with 210 mm diameter.
- 5.25 kW burner beneath fry top.
- Low-consumption pilot light and thermocouple located within the body of the burner for greater protection.
- Flexible stainless-steel gas pipes, facilitating internal manipulation in order to make repairs easier.
- Controls with a protective support base and system to prevent water infiltration.
- High-temperature enamelled cast iron flue protector which is flush with the grates therefore improving manoeuvrability, supporting larger containers and increasing the usable surface area.

OVEN

- Static oven size NG 2/1.
- Stainless steel cooking chamber which makes cleaning easier and ensures greater hygiene.
- Trays are inserted sideways which improves manoeuvrability.
- Rails on three height levels to offer different cooking options.
- Rails with anti-tipping system to prevent trays from overturning.
- Thermostatic valve for temperature control (125 - 310 °C).
- Tubular stainless-steel burner with pilot light and thermocouple and piezoelectric ignition.
- Cast iron oven floor which guarantees better performance and uniform heat distribution.
- Fibreglass closing seal to improve the thermal efficiency of the oven and ensure its durability.
- Stamped oven frame and inner door, ensuring better oven closure.
- Detachable oven door to facilitate repairs.

OPTIONAL ACCESSORIES

(see accessories page at the end of the chapter)

Gas solid tops

General characteristics

- Surface tops manufactured in 1.5 mm thick AISI-304 stainless steel.
- Laser-cut joints and automatic welding. Hidden screws.
- 10 mm-thick cast iron plate with rounded corners.
- Fry-top dimensions: 800 x 580 mm.
- Shield with 300 mm diameter.
- Refractory brick inside for improved heat use and distribution.
- Differentiated usage temperatures: 500 °C at the centre and 200 °C at the edges.
- Double-crown burner and diffuser made of cast iron which guarantee an even distribution of heat from the flame.
- Burner power: 8.4 kW.
- Low-consumption pilot light and thermocouple located within the body of the burner for greater protection.
- Flexible stainless-steel gas pipes, facilitating internal manipulation in order to make repairs easier.

- Controls with a protective support base and system to prevent water infiltration.
- High-temperature enamelled cast iron flue protector which is flush with the grates therefore improving manoeuvrability, supporting larger containers and increasing the usable surface area.
- Access to components from the front.

OVEN

- Easy-to-use NG 2/1 static oven with controls located on the upper panel for improved ergonomics.
- Stainless steel cooking chamber which makes cleaning easier and ensures greater hygiene.
- Trays are inserted sideways which improves manoeuvrability.
- Rails on three height levels to offer different cooking options.
- Rails with anti-tipping system to prevent trays from overturning.

- Thermostatic valve for temperature control (125 - 310 °C).
- Tubular stainless-steel burner with pilot light and thermocouple and piezoelectric ignition.
- Cast iron oven floor which guarantees better performance and uniform heat distribution.
- Fibreglass closing seal to improve the thermal efficiency of the oven and ensure its durability.
- Stamped oven frame and inner door, ensuring better oven closure.
- Detachable oven door to facilitate repairs.

Paella cookers

General characteristics

- Surface tops manufactured in 1.5 mm thick AISI-304 stainless steel.
- Laser-cut joints and automatic welding. Hidden screws.
- Double-crown burner with four rows of flames per crown, guaranteeing an even distribution of heat from the flame to the bottom of the paella.
- Low-consumption pilot light and thermocouple.
- Flexible stainless-steel gas pipes, facilitating internal manipulation in order to make repairs easier.
- Controls with a protective support base and system to prevent water infiltration.

- High-temperature enamelled cast iron flue protector which is flush with the grates therefore improving manoeuvrability, supporting larger containers and increasing the usable surface area.
- Access to components from the front.

PAELLA OVEN.

- 665 x 665 x 325 mm static paella oven with controls located on the upper panel.
- Stainless steel cooking chamber which makes cleaning easier and ensures greater hygiene.

- Thermostatic valve for temperature control (125 - 310 °C).
- Tubular stainless-steel burner in the rear part operation with temperature gradient. Operation pilot light, piezoelectric ignition and thermocouple.
- Side-opening double door.

Electric cookers

General characteristics

- Pressed surface tops manufactured in 1.5 mm thick AISI-304 stainless steel, with rounded edges, designed to prevent spilled liquid from pans from entering the interior of the oven.
- Stamped surface top with rounded corners for easy cleaning.
- Laser-cut joints and automatic welding. Hidden screws.
- Cast iron hot plates,
 - ROUND, 223 Ø (2.6 kW), hermetically fixed to the stamped surface top
 - SQUARE, 230 x 230 (2.6 kW), hermetically fixed to the stamped surface top
- Power regulation via selector with 7 positions
- Protection against overheating for each plate.
- High-temperature enamelled cast iron flue protector.

- Access to components from the front
- Easy connection and compliant with health standards.
- Machines with IPX5 grade water protection.

OVEN

- Easy-to-use NG 2/1 static oven with controls located on the upper panel for improved ergonomics.
- Stainless steel cooking chamber which makes cleaning easier and ensures greater hygiene.
- Trays are inserted sideways which improves manoeuvrability.
- Rails on three height levels to offer different cooking options.
- Rails with anti-tipping system to prevent trays from overturning.

- Thermostatic temperature control (125 - 310 °C).
- Heating through stainless steel heating elements with selector switch for operation of the upper and/or lower area.
- Cast iron oven floor which guarantees better performance and uniform heat distribution.
- Fibreglass closing seal to improve the thermal efficiency of the oven and ensure its durability.
- Stamped oven frame and inner door, ensuring better oven closure.
- Detachable oven door to facilitate repairs.

Voltage

- 400 V 3+N
- For other voltages, consult the options at the end of the chapter.

Electric solid tops with 4 cooking zones

General characteristics

- Pressed surface tops manufactured in 1.5 mm thick AISI-304 stainless steel, with rounded edges, designed to prevent spilled liquid from pans from entering the interior of the oven.
- Stamped surface top with rounded corners for easy cleaning.
- Laser-cut joints, automatic welding and polished. Hidden screws.
- "Solid top" model with four elements underneath the 16 mm-thick, 13CrMo4 plate, distributed so that they independently heat the four quarters of the plate. Solid-top dimensions: 720 x 455 mm.
- Power control with 7 positions for each heating element which makes it possible to work with different temperature gradients on the plate.
- 2.6 kW heating power for each heat point.
- Protection in the event of overheating of each heat source.
- Thermostat that activates the cooling fan for the electric components.

- Safety thermostat that ensures that the machine does not operate in the event of the overheating of the components.
- High-temperature enamelled cast iron flue protector.
- Access to components from the front.
- Easy connection and compliant with Health & safety standards.
- Machines with IPX5 grade water protection.

OVEN

- Easy-to-use NG 2/1 static oven with controls located on the upper panel for improved ergonomics.
- Stainless steel cooking chamber which makes cleaning easier and ensures greater hygiene.
- Trays are inserted sideways which improves manoeuvrability.
- Rails on three height levels to offer different cooking options.
- Rails with anti-tipping system to prevent trays from overturning.

- Thermostatic temperature control (125 - 310 °C).
- Heating through stainless steel heating elements with selector switch for operation of the upper and/or lower area.
- Cast iron oven floor which guarantees better performance and uniform heat distribution.
- Fibreglass closing seal to improve the thermal efficiency of the oven and ensure its durability.
- Stamped oven frame and inner door, ensuring better oven closure.
- Detachable oven door to facilitate repairs.

Voltage

- 400 V 3+N
- For other voltages, consult the options at the end of the chapter.

700 SERIES

Induction cookers

General characteristics

- 6 mm thick vitro ceramic glass, hermetically sealed in the 1.5 mm thick AISI-304 stainless steel surface top.
- Laser-cut joints and automatic welding. Hidden screws.
- Cooking areas demarcated by a circular Ø 260 mm screen print, with 5 kW power in each area, quick heating and ideal for à la carte service.
- Perfect control of cooking thanks to the energy regulator with 10 power levels which makes it possible to work at low temperatures for delicate recipes or at the highest temperature for quick service.
- Energy is only transferred to the area below the container and the rest of the vitro ceramic surface remains cold.
- It operates when it detects the presence of the container. When the container is removed, it stops heating.
- Consequently, it provides considerable energy savings (energy use is reduced by around 50% compared to gas burners).
- The working environment and atmosphere is more comfortable since the energy is concentrated at the base of the pan, heat radiation and dispersal are reduced and the cooking temperature is reached quickly.
- Safety against overheating. Error messages shown through flashing lights.
- High-temperature enamelled cast iron flue protector.
- Access to components from the front.
- Machines with IPX5 grade water protection.

Voltage

- 400 V 3ph-
- For other voltages, consult the options at the end of the chapter.

Fry-tops

General characteristics

- Stamped surface tops manufactured in 1.5 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished.
- 12 or 15 mm thick mild steel fry tops which are quick-heating and high power.
- Models with smooth, grooved and mixed hot plates (2/3 smooth + 1/3 grooved).
- Versions with 50-micron thick chrome surface for the three hot plate types.
- Electrically heated models with stainless steel heating elements; thermostatic temperature control, between 80 and 300 °C.
- Gas heated models with high efficiency burners (separate burners for whole-module models).
- Gas heated models with thermostatic temperature control (between 80 and 300 °C) or operation via safety thermostat with thermocouple.
- Burner ignition through electronic spark igniter. Therefore, the gas models do not need electricity for installation. With an access tube for manual ignition.
- Whole-module fry tops have two separate heating areas.
- Rapid reaction and recovery times of the fry-top temperature.
- The fry tops are welded to the stamped surface top.
- The stamped shell and its rounded edges and corners make cleaning much easier.
- The fry top is tilted towards the front to make it easier to collect grease and liquids.
- Fitted with an opening to collect cooking grease and a tray to store it which has capacity to store up to 2 litres depending on the model.
- Optional anti-splash side and rear guards, easy to remove.
- High-temperature enamelled cast iron flue protector.
- Access to components from the front.
- Machines with IPX5 grade water protection.

OPTIONAL ACCESSORIES

(See accessories page at the end of the chapter)

- Scraper (*)
 - Anti-splash guard (in three parts to make cleaning easier).
- (*) The models with a chrome surface include the scraper as standard.

Voltage of electric models

- 400 V 3+N. For other voltages, consult the options at the end of the chapter.

(*) Models with chrome surface, scraper included

700 SERIES

Grills

General characteristics

- Stamped surface tops manufactured in 1.5 mm thick AISI-304 stainless steel
- Laser-cut joints and automatic welding. Hidden screws
- Mild steel grills, dismountable without the need for tools, in 170 mm wide sections.
- The mild steel grills are reversible, with different finishes on each side:
 - Tilted and grooved with ridges for meat
 - Horizontal and flat for fish and vegetables
- These grills reach a very high temperature (400 °C), meaning that the surface of the product is quickly sealed and inside it remains much juicier.
- The models with stainless steel grills are manufactured using "Z" shaped AISI-304 stainless steel slats to make cleaning easier.
- Fitted with an opening to collect cooking grease and a tray to store it.
- Machines are fitted with removable 130 mm high guards to prevent splashes, made of stainless steel.

ELECTRIC COUNTERTOP MODELS

- Group of stainless steel covered elements upon which you can cook food directly (a group of 3 elements for half-sized module models and 2 groups for whole module models).
- Water tray for safety. It also allows an adequate level of humidity to be reached for optimum cooking conditions.

GAS COUNTERTOP MODELS

- Group of high-efficiency tube burners, (a group of two burners for half-sized module models, two groups for whole module models).
- Independent control for each group of burners via a safety valve with a thermocouple.
- Burners turned on using Piezo electric ignition.
- The burners heat ceramic stones that sit on a supporting rack, so that they can then heat food on the grill.

GAS FLOOR MODELS

- Group of three high-efficiency tube burners, with a radiant deflector (a group of three burners for half-sized module models, two groups for whole module models).
- Independent control for each group of burners via a safety valve with a thermocouple.
- Burners turned on using electric multi-spark ignition. With an access tube for manual ignition.
- The fat collection trays provide the option of adding water into them, and thanks to heat radiated from the gas burners or electrical elements, a low intensity steam is generated, causing the roast to be carried out in a humid environment.

OPTIONAL ACCESSORIES:

(See accessories page at the end of the chapter)

Special scraper with two profiles for models with cast iron grill.

Special scraper adapted for models with stainless steel grill.

Pasta cookers

General characteristics

- Surface tops manufactured in 1.5 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished.
- 1.5 mm thick AISI-316L stainless steel wells built into the surface top.
- 2 well sizes
 - GN-2/3 wells, with 26 litre capacity
 - GN-1/1 wells, with 40 litre capacity
- The well is filled through the inlet solenoid valve with a two-position switch: average and high-speed filling.
- Well drainage through a mechanical ball valve which is resistant to high temperatures and has a safety overflow.
- Automatic safety system to stop the current

if the water runs out.

- Controls with a protective support base and system to prevent water infiltration.
- Machines with IPX5 grade water protection.

GAS MODELS

- High-performance stainless-steel burner located outside of the well with a combustion chamber that enables heating of the base and sides of the well (up to the minimum filling level)
- Burner ignition through electronic spark igniter. With an access tube for manual ignition
- Heating controlled through safety valve.

ELECTRIC MODELS

- AISI 304 stainless-steel heating elements

located inside the well to directly heat the water.

- Heating controlled through energy regulator.
- Voltage: 400 V 3+N. For other voltages, consult the options at the end of the chapter.

Standard provision

- 26 L models: 2 x 1/3 baskets per well
- 40 L models: 3 x 1/3 baskets per well

OPTIONAL ACCESSORIES:

(See accessories page at the end of the chapter)

- 6 x 1/6 square baskets kit
- 6 x 1/6 round baskets kit
- 4 x 1/4 baskets kit
- 2 x 1/2 baskets kit

700 SERIES

Boiling pans

General characteristics

- Surface tops manufactured in 1.5 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished. Hidden screws.
- Lid with a front handle designed to prevent burns. Diagonal 70° opening.
- Drainage hole to redirect possible liquid spillages.
- 80-litre AISI-304 stainless-steel well built into the surface top using robotic welding, with a 2 mm-thick AISI 316L stainless steel well base.
- Well filled with cold or hot water through solenoid valves activated by a single switch located on the front panel.
- Well drainage through G1-1/2" UNI ISO 228 safety valve with athermic handle, safe and effortless.
- Filter for well drainage made of AISI-304 stainless-steel which is robust, reliable and easy to remove.
- Controls with a protective support base and system to prevent water infiltration.

- Indicator light to show when the machine is connected and when it is heating.
- IPX5 level protection.

DIRECT FLAME MODELS

- High-performance stainless-steel tubular burner with optimised combustion and sequential operation. Controlled by an energy regulator which enables slower cooking.
- Heating of the burner at the base of the boiling pan is evenly distributed, resulting in gradual heating of the contents of the well.
- Possibility of regulating heating of the burner as there are different levels of power.
- Burner is lit by spark ignition. Indirect flame models or bain-marie
- Bain-marie chamber surrounding the well with an automatic filling system
- Automatic control of the level of the chamber with three-way safety system pressure switch to control pressure in the chamber, limiter thermostat to prevent overheating of the chamber and overpressure safety valve.
- Automatic clearing of the chamber.
- Heating at the base of the boiling pan acts on the water in the surrounding chamber so that the saturated steam produced at a temperature of 107 °C evenly heats the base and sides of the well.

GAS MODELS

- High-performance stainless-steel tubular burner with optimised combustion.
- Controlled by energy regulator and pressure switch enabling lower energy and water use.
- Burner is lit by spark ignition.

ELECTRIC MODELS

- Heated through elements located in the lower part of the bain-marie chamber.
- Heating controlled through energy regulator and pressure switch.
- Voltage: 400 V 3+N. For other voltages, consult the options at the end the chapter.

Fryers

INTERNAL HEATERS

General characteristics

- Surface tops manufactured in 1.5 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polishing Hidden screws.
- 8 L electric countertop models and 15 L gas and electric floor models.
- Wells built into the surface top with robotic welding and polished.
- Cold area in the lower part of the well which helps to preserve the characteristics and quality of the oil used for longer.
- Thermostatic temperature control, between 60 and 200 °C.
- Safety thermostat in all models.
- Fitted with individual lids for each well.
- Drainage of oil through a mechanical ball valve which is robust, reliable and resistant to high temperatures.

- For 8 L models, the discharge control is located in the control panel.
- High power machines that heat up quickly and have a high power - litre ratio (up to 1.00 kW/litre).

GAS MODELS

- Gas models with three longitudinal heat transfer tubes built into the well.
- High-efficiency gas burners
- Flue flush with the rest of the machines thanks to the perfect combustion achieved.

ELECTRIC MODELS

- Electric models with AISI 304 stainless steel heating elements located inside the well which can be tilted by over 90° to ensure perfect cleaning.

- Voltage: 400 V 3+N. For other voltages, consult the options at the end of the chapter.

Baskets provided:

- 8 L fryers: 1 small basket per well (125 x 280 x 100 mm)
- 15 L fryers: 1 large basket per well (250 x 280 x 100 mm).

OPTIONAL ACCESSORIES:

- (See accessories page at the end of the chapter)
- 15 L fryers: small basket (125 x 280 x 100 mm).

Chips scuttle

General characteristics

- Half-module electrically heated machine, heated by infrared light located at the back of the machine which is activated by the ON/OFF switch.
- Surface top manufactured in 1.5 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished. Hidden screws.
- Well built into the surface top with capacity for 150 mm high Gastronorm NG-1/1 recipient.
- Fitted with a removable, perforated, stainless-steel filter which is tilted to remove excess oil from the fryer.
- Controls with a system to prevent water infiltration, IPX5 grade protection.

Tilting bratt pans

General characteristics

- Laser-cut joints, automatic welding and polished. Hidden screws.
- Lever system to raise the well. The well can be raised until it is vertical to drain it completely.
- Entire machine structure made of stainless steel.
- Well designed with rounded corners and no edges, with a large opening for unloading to facilitate all cooking and cleaning operations.
- The great thickness of the well base (10 mm) guarantees even heat distribution.
- Well filled with water through a solenoid valve which is operated by a switch on the front of the machine. The filling pipe is located at the back of the machine.
- Double-walled lid with a draining rack at the back to redirect condensation water towards the well interior.
- The closed lid is the same height as surface tops of the range and since it does not have any protruding element or reinforcement, it can be used as a worktop.
- Compensation system to prevent sharp falls.
- Front access lid handle.
- Electrically heated using stainless steel heating elements located below the base of the well.
- Gas heating with high-efficiency stainless steel burners made of four tubes which are activated and controlled by a safety valve with a thermocouple.
- Thermostatic temperature control of the well floor, between 50 and 300 °C.
- Heating through burner tubes or electric heating elements located in the base of the well with, together with the great thickness of the well base, ensure maximum uniformity in heat distribution in all cases, guaranteeing consistent cooking.

Voltage of electric models

- 400 V 3+N. For other voltages, consult the options at the end of the chapter.

Bain maries

General characteristics

- Surface tops manufactured in 1.5 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and polished. Hidden screws.
- Wells that can be used with different types of Gastronorm containers of different sizes, 150 mm high, and with the following dimensions:
 - Half-module: NG-1/1, with 17 litre capacity.
 - Whole-module: NG-2/1, with 30 litre capacity.
- AISI-304 stainless steel wells built into the surface top.
- Gravity drainage: simple well drainage

- through removal of the overflow pipe.
 - Thermostatic temperature control of the water, between 30 and 90 °C.
 - Controls with a protective support base and system to prevent water infiltration (IPX5 protection).
- GAS MODELS**
- Insulated combustion chamber which reduces heating of the components.
 - High-efficiency stainless steel burner located outside the well.
 - Pilot light via piezo ignition.
 - Tube for alternative manual ignition.
 - Does not require electrical installation.

- ELECTRIC MODELS**
- AISI 304 stainless steel heating elements located outside the well.
 - Safety thermostat.
- Standard provision:
- 2 crossbars to support Gastronorm containers.
 - Containers not included.
- Accessory
- (See accessories page at the end of the chapter)
- Filling valve.

700 SERIES

Neutral elements

General characteristics

- Surface top manufactured in 1.5 mm thick AISI-304 stainless steel.
- Laser-cut joints and automatic welding.

- Hidden screws.
- Machines designed to attach to a filling valve or water column at the back.

- High-temperature enamelled cast iron flue trim.

700 SERIES

Stands

General characteristics

- Manufactured with a solid structure in AISI-304 stainless steel.
- Hidden screws.
- Can be quickly connected to serve as a support for surface top elements from the KORE 700 range.
- Can be used as an open storage element.
- Designed to be attached to optional kits.
- Doors.
- 2 NG drawers (for MB-705 model).
- Rails for NG containers, 5 levels (for MB-705 model, compatible with the doors kit).

Kits for stands

MODEL	CODE	DESCRIPTION	€
 DOOR KIT	19040900	The kit allows the door to be reversible, so that it can be assembled to open to the left or to the right. The number of doors depends on the stand to which they are to be mounted.	-

Refrigerated stands

General characteristics

- Interior constructed with AISI-304 stainless steel exterior in food grade stainless steel.
- 50 mm thickness, CFC-free, high-density (40 kg/m³) polyurethane insulation, injected under high pressure.
- Heavy-duty stainless-steel working top with 100mm high splash-back, preventing spillage behind the counter.
- Intuitive, digital display for electronic control with energy saving function to ensure an optimal control of storing products.
- Stainless steel doors with ergonomic, full-length, robust, perfectly integrated handle that avoids dust and dirt collection.
- Height-adjustable stainless steel legs. Height of the legs can be adjusted individually (130 mm - 200 mm) to enable convenient cleaning.
- Stamped edge interiors, easier cleaning operations to reduce potential dirt traps with a built-in drainage to get rid of waste liquid inside units.
- Removable and height adjustable epoxy coated GN 1/1 grids with a maximum loading capacity of up to 40 kg.
- Equipment with 1 GN 1/1 grids and height adjustable 2 sets of tray slides per each full door.
- W model drawers with GN 1/1 holding capacity.
- W2 model drawers with 2 x GN 1/1 OR 1x GN 2/1 holding capacity.
- Electrical power supply: 220V-240V 1N.

All gas cooking equipment should be fitted with gas governors:
- LPG: 37 g/cm²
- Natural Gas: 20 g/cm²

Gas cookers

General characteristics

- Stamped stainless steel surface top.
- Double grill and nickel-plated burners.
- Dimensions of the double grill: 286 x 533mm.
- Open burners, one with 3,5kW and the other 6kW, safety valve and thermocouples.
- Controls with a protective support base and system to prevent water infiltration.
- Access to the components from the front.
- Gas oven option measuring 450x420x300mm with 5.2 tubular burner, pilot flame and thermocouple.
- Temperature controlled by thermostatic valve (110 – 310 °C).

SUPPLY	MODEL	GAS	CODE	BURNERS	OVEN	POWER (kW)	DIMENSIONS (mm)	€

Fryers

General characteristics

- Well stamped in stainless steel integrated into the stainless steel surface top.
- Thermostatic temperature control between 60 and 200 °C.
- Safety thermostat.
- Gas models: automatic ignition of burners using electromagnetic valve with pilot and thermocouple.
- Electric models: swivelling heating element making it easier to clean inside the well.
- Lever tap to empty the well located in the control panel.
- Basket dimensions: 200 x 250 x 100 mm.
- Built-in well cover.
- Controls with a protective support base and system to prevent water infiltration.
- Standard power supply for electric versions 400V 3+N

Electric fryers

General characteristics

- Control by thermostat (60 °C to 195 °C).
- Safety thermostat. Safety switch for assembly.
- Removable shielded heating elements in stainless steel.
- Pilot light for heating.
- DESKTOP MODEL:
 - Safety micro switch that cuts off operation in case of incorrect assembly of the assembly.
- PEDESTAL MODEL:
 - Pilot light for heating. Cold zone.
 - Removable shielded heating elements in stainless steel.
 - Lower cabinet.
 - Drainage cock.

Fry-tops

General characteristics

- Models with flat, grooved or mixed stovetop (1/2 flat and 1/2 grooved).
- Electric models: Electric-heating models with embedded stainless steel heating elements and thermostat temperature control, from 50 to 310 °C.
- Gas: Stainless steel burner with pilot flame for ignition.
- Versions featuring galvanised carbon steel valve or safety valve with thermocouple.
- One type of grill offers two separate heating areas.
- Removable grease collection drawer.

Salamanders

Ultrarapid salamanders

- Perfect cooking uniformity, guaranteed by the redesigned deflectors and a perfect positioning.
- 20 seconds to reach maximum temperature from ignition; max. 5 seconds already in operation.
- Removable chrome-plated steel juice collection trays and grids with athermic handles.
- Wall mounting possible.
- Redesigned control panel for maximum functionality.
- Insulated handle with bakelite spacer and improved shielding of external surfaces.
- The contact models contain a plate detection bar for automatic on and off switching.

* Ultrarapid Contact Salamanders offer maximum performances thanks to infrared cooking generated by tungsten heaters and protected by a glass ceramic plate. Perfect for intensive use, meeting the highest speed and efficiency requirements, they are ideal for demanding and energy-conscious chefs.

Classic salamanders

- AISI 304 Satin-finished stainless steel.
- Easy-to-clean Incoloy tilting heating elements in the upper movable deck.
- Drip trays and chrome-plated grids are removable, with heating resistant handle.
- Possibility of fixing to the wall.
- The best usability with the redesigned control panel.
- Handle insulated by a Bakelite spacer and an enhanced shielding of the surfaces for high safety.
- Single zone compact salamander version SEC 40 or double cooking zone in SEC 60 models.

Grilling | Basque Grill

General characteristics

- Offers precision cooking with natural charcoal. In addition, it can be used as a showcooking element for preparing dishes in front of the customer.
- Unit designed for installation against wall.
- Surface top manufactured in 3 mm thick AISI-310 stainless steel, with rounded edges for easy cleaning.
- Mouth of grill raised above the surface top to allow the grill to be brought as close as possible to the embers and funnel the outlet of heat, for greater efficiency.
- Inner floor of the grill protected by refractory brick to insulate and concentrate the heat and improve efficiency.
- Easy withdrawal of the ashes.
- Includes an ash collection drawer by grill.
- Each grill has a lower zone with door (without shelf or rack), designed for housing a charcoal trolley (optional) or another trolley of the premises.
- Base with cut-out at the bottom back to bridge any skirting board on the wall.
- Unit clad in stainless steel down to the floor.
- With 4 height-adjustable feet and 4 castors.
- Back cover to hide the guide system and give an easier-to-clean finish. Includes grill guide, system of counterweights and fixed top grill.
- Top vents for optimum temperature diffusion.
- Grill constructed in stainless steel.
- Cooking grill height-adjustable by crank at front, making it possible to cook at different intensities to achieve the perfect cooking point. Includes counterweight to soften the adjustment action.
- Grill with larger dimensions for greater versatility.
- Includes fat collection tray, easily removable without tools.
- The grill is tilted by 5°. This allows the fat to run along the grill by capillary motion to the fat collection tray. This prevents fat from falling onto the embers, which would cause flame-ups that alter the cooking of the food.
- Includes a second fixed grill at the top for temperature maintenance of the product.
- All the grills are dismountable, to facilitate cleaning.

OPTIONAL ACCESSORY:

- Trolley for charcoal.
- Stainless steel drawer with reinforced upper part.
- With four wheels for easy movement.
- Designed for storing charcoal to feed the Basque grill mid-service more conveniently.
- Allows the charcoal to be stored in an external zone which does not affect the hygiene of the food handling areas.
- Dimensions: 370 x 380 x 536 mm.
- Interior capacity: 48 litres.

Grilling | Robatas

General characteristics

- In Japanese cooking, robatayaki refers to food prepared in front of the customers, in which the ingredients, normally on brochettes, are grilled slowly over charcoal embers, in a way which is similar to a barbecue.
- Surface top manufactured in 2 mm thick AISI-304 stainless steel, with rounded edges for easy cleaning.
- Raised edge to allow cooking at barbecue level, with no superstructure.
- Thick base in refractory steel to bear the charcoal, with perforations to improve air circulation and provide better combustion.
- Easy withdrawal of the ashes.
- Tank insulated with 30 mm of rock wool to prevent temperature loss and improve the ergonomics of your work.
- Outer body separated from the tank, in stainless steel, with perforations to allow external air flow that improves heat dissipation.
- Includes 1 or 2 drawers for ash collection.

CENTRAL UNIT MODEL

- Robata on stainless steel unit for independent use.
- Can be used from both sides.
- 150 mm free work-surface on both sides of the robata.
- Equipped with 4 wheels (two with brake).
- Includes folding frame on one side to accommodate two GN 1/9 trays.
- Comes with two large, multi-purpose drawers with reinforced guides.
- Superstructure in stainless steel profile with 3 different levels.
- 82 mm for cooking
- 239 mm for slow cooking of the core
- 396 mm to preheat or maintain the temperature of the product.
- Includes brochette rests, distance adjustable to hold brochettes of different lengths.
- The superstructure is dismantable, without the need for tools, to allow cooking at barbecue level.

TABLETOP MODELS

- Robatas designed for installation onto furniture of the premises.
- Height of surface top of the supporting unit: 570 mm, to allow a working height of 900 mm.
- If positioned against a wall (whether of the building or a perimeter of the surface top), leave 5 cm between the Robata and the ends of the wall to allow heat dispersal.

ACCESSORIES:

- Poker for keeping the embers alive.
- Stainless steel mesh grill for cooking food without the use of brochettes
- Stainless steel grill for cooking and marking meat.

Fixed cylindrical boiling pans

General Characteristics

- Boiling pan with cylindrical structure and recipient, suitable for placement in transit areas with reduced dimensions where appliances with sharp edges and surfaces may cause ergonomic and movement problems, allowing it to be used comfortably from different angles.
- Well with AISI-316 stainless steel bottom with a thickness of between 20/10 and 40/10, suitable for products that are particularly acidic.
- AISI-304 stainless steel walls with a thickness of between 20/10 and 40/10. Double wall in indirect versions.
- AISI-304 stainless steel cover with a thickness of 15/10, balance springs and an athermic handle.
- Supporting structure in AISI-304 stainless steel.
- Satin AISI-304 exterior coating.
- Adjustable stainless-steel feet.
- Heat insulation guaranteed by high-density ceramic fibre plates.
- Tank drainage hole with a removable filter.

- Front drainage tap with an insulated athermic handle.
- Gauge for controlling pressure inside the double wall.
- Manual valve for emptying air in order to depressurise the chamber during heating.
- Water is added to the well through a tap with a moveable outlet.
- Heating:
 - GAS:
 - High-performance stainless-steel tubular burners.
 - Manual piezoelectric ignition and pilot flame.
 - Smoke extraction grille.
 - Tap with safety valve and thermocouples (direct version).

INDIRECT ELECTRIC:

- Heated by elements immersed in Incoloy alloy with adjustable power via an energy variator.
- Safety thermostat which ensures that the machine does not operate in the event of

- overheating or insufficient water.
- Water control in the double wall with maximum/minimum taps and an automatic water load option.
- Standard operating voltage of 400V-3N-50Hz

INDIRECT STEAM:

- Heated by steam (from the user's connection) through a valve that allows steam to be added gradually into the liner.
- Indirect heating equipment: pressure control in the double wall through a safety valve set to 0.5 bar, a manual depression valve and a gauge.
- The pressure or autoclave versions allow the cooking cycles to speed up through the day. They are fitted with a silicone rubber airtight joint and clamps to hermetically close it and a safety valve set to 0.05 bar.

Fixed cylindrical boiling pans with mixer

General Characteristics

- Well with AISI-316 stainless steel bottom with a thickness of between 20/10 and 40/10, suitable for products that are particularly acidic.
- AISI-304 stainless steel cooking well walls with thickness of between 20/10 and 25/10.
- Tank drainage hole with a removable filter.
- 2" front drainage tap with insulated athermic handle.
- Double wall with AISI-304 stainless steel bottom and walls.
- AISI-304 stainless steel cover with a thickness of 15/10, fitted with a chromed steel zip with preloading springs and an athermic handle.
- Gauge for controlling pressure inside the double wall.
- Manual air escape valve for depressurising the air produced in the double wall during the heating process.
- 2 versions:
 - . Normal version: safety valve with a spring set to 0.5 bar.
 - . Autoclave version: silicone rubber joint restraint, clamps to hermetically seal the cover and a safety valve set to 0.05 bar.
- Stainless steel supporting structure with a thickness of 30/10 fitted on steel feet with an adjustable height.
- AISI-304 satin stainless steel external walls with a thickness of 10/10.
- AISI-304 stainless steel satin shelf with a thickness of 15/10.
- Removable inner coating to enable easy inspection of internal parts.
- Heat insulation guaranteed by high-density ceramic fibre plates.
- Mixing system:
 - . AISI-316 stainless steel mixer with an adjustable rotation speed of between 7 and 28 g/m with a force of up to 386 N-m
 - . Possibility to reverse the operating direction with the electronic switch.
 - . Removable mixer to ease cleaning and product extraction.
 - . Mixer fitted with stainless steel radial arms and Teflon ceramic blades.
- Heating:
 - . Indirect electric with double wall.
 - Heated by heating elements immersed in Incoloy alloy with adjustable power thanks to an energy variator.
- Thermoregulation and electronic time delay of the temperature and process time.
- Heating elements fitted with a safety thermostat which ensures that the machine does not operate in the event of overheating or insufficient water.
- Water control in the double wall with maximum/minimum taps and an automatic water load option with probes.
- Pressure control of the double wall through a pressure switch and a safety valve set to 0.5 bar, a depression valve and a gauge.
- Standard operating voltage of 400V-3N-50Hz.
- . Indirect steam with double wall.
- Heated by steam (from the user's connection) with a counter-pressure valve that allows steam to be added gradually to the double wall.
- Pressure control in the double wall through the safety valve set to 0.5 bar, depression valve and gauge.
- Standard operating voltage of 400V-3N-50Hz.

Tilting cylindrical boiling pans

General Characteristics

- Automatic tilting boiling pan with lateral loading columns. The tilting of the well eases the transfer of solid foods. This is the quickest and easiest way of cooking high quantities.
 - Cooking well with an AISI-316 stainless steel bottom with a thickness of between 20/10 and 40/10, and an AISI-304 stainless steel double wall with thicknesses of between 20/10 and 25/10.
 - AISI-304 stainless steel cover with a thickness of 15/10, balance springs, an athermic handle and an insulated cover available upon request.
 - Gauge for controlling pressure inside the double wall.
 - Manual air escape valve for depressurising the air produced in the double wall during the heating process.
 - Adjustable chromed bronze mixer with hot and cold water.
 - Weight safety valve set to 0.5 bar.
 - Stainless steel supporting structure with a thickness of 30/10 fitted on a frame.
 - Fine satin AISI-304 exterior. Thermal insulation guaranteed by high-density ceramic fibre panels.
 - Automatic tilting system via a hydraulic cylinder.
 - Automatic shut-off system when inclined.
 - Heating:
 - GAS:
 - High-performance stainless-steel tubular burners.
 - Manual piezoelectric ignition and pilot flame.
 - Smoke extraction grille.
 - Tap with safety valve and thermocouples (direct version).
 - Indirect electric:
 - Heated by heating elements immersed in Incoloy alloy with adjustable power via an energy variator.
 - Safety thermostat which ensures that the machine does not operate in the event of overheating or insufficient water.
 - Water control in the double wall with maximum/minimum taps and an automatic water load option.
 - Standard operating voltage of 400V-3N-50Hz
- INDIRECT STEAM:**
- Heated by steam (from the user's connection) through a valve that allows steam to be added gradually into the liner.
 - Indirectly heated equipment: pressure control in the double wall through the safety valve set to 0.5 bar, manual depression valve and gauge.

Fixed rectangular boiling pans

General Characteristics

- Rectangular boiling pan with a cylindrical well. Can be assembled on its own or with other machines. Thanks to its rigidity and functionality, it is suitable for prolonged and continuous use.
- Cooking well with an AISI-316 stainless steel bottom with a thickness of between 20/10 and 40/10, and AISI-304 stainless steel walls with thicknesses of between 20/10 and 25/10.
- Tank drainage hole with a removable filter.
- Front drainage tap with insulated athermic handle.
- AISI-304 stainless steel cover with a thickness of 15/10, fitted with a chromed steel zip with preloading springs and an athermic handle.
- Gauge for controlling pressure inside the double wall.
- Manual air escape valve for depressurising the air produced in the double wall during the heating process.
- 2 versions:
 - . Normal version: spring and weight safety valve (depending on the capacity of the machine) set to 0.5 bar.
 - . Autoclave version: silicone rubber joint restraint, clamps to hermetically seal the cover. Safety valve set to 0.05 bar.
- Stainless steel supporting structure with a thickness of 30/10 fitted on steel feet with an adjustable height.
- AISI-304 satin stainless steel external walls with a thickness of 10/10.
- AISI-304 stainless steel satin shelf with a thickness of 15/10.
- Heating:
 - GAS:
 - High-performance stainless-steel tubular burners.
 - Manual piezoelectric ignition and pilot flame.
 - Smoke extraction grille.
 - Tap with safety valve and thermocouples (direct version).
- INDIRECT ELECTRIC:
 - Heated by heating elements immersed in Incoloy alloy with adjustable power via an energy variator.
- Safety thermostat which ensures that the machine does not operate in the event of overheating or insufficient water.
- Water control in the double wall with maximum/minimum taps and an automatic water load option.
- Standard operating voltage of 400V-3N-50Hz

INDIRECT STEAM:

- Heated by steam (from the user's connection) through a valve that allows steam to be added gradually into the liner.
- Indirect heating equipment: pressure control in the double wall through a safety valve set to 0.5 bar, a manual depression valve and a gauge.

Fixed Gastronorm rectangular boiling pans

General Characteristics

- Rectangular boiling pan with a Gastronorm rectangular well. Can be assembled on its own or with other machines. Due to its rigidity and functionality, it is suitable for prolonged and continuous use.
 - Cooking well with an AISI-316 stainless steel bottom with a thickness of 25/10 and AISI-304 stainless steel walls with thicknesses of between 20/10 and 25/10.
 - Front drainage tap with an insulated athermic handle.
 - AISI-304 stainless steel cover with a thickness of 15/10, balance springs, an athermic handle and an insulated cover available upon request.
 - Gauge for controlling pressure inside the double wall.
 - Manual air escape valve for depressurising the air produced in the double wall during the heating process.
 - Adjustable chromed bronze mixer with hot and cold water.
 - Weight safety valve set to 0.5 bar.
 - With a stainless steel supporting structure.
 - Equipped with stainless steel support feet with an adjustable height and a manually emptied liner filter.
 - AISI-304 exterior coating. Fine satin. Heat insulation guaranteed by high-density ceramic fibre plates.
 - Heating:
 - GAS:
 - High-performance stainless-steel tubular burners.
 - Manual piezoelectric ignition and pilot flame.
 - Smoke extraction grille.
 - Tap with safety valve and thermocouples (direct version).
 - Indirect electric:
 - Heated by heating elements immersed in Incoloy alloy with adjustable power via an energy variator.

Automatic tilting rectangular boiling pans with mixer and PLC monitor

General Characteristics

- AISI-316 lucid stainless steel recipient bottom, suitable for products that are particularly acidic, with a thickness of between 20/10 and 40/10.
- AISI-304 stainless steel cooking well walls with thickness of between 20/10 and 25/10.
- Double wall with AISI-304 stainless steel bottom and walls.
- Tank drainage hole with removable filter (optional).
- Front drainage tap with insulated athermic handle (optional).
- AISI-304 stainless steel cover with a thickness of 15/10, fitted with a steel zip with preloading springs and an athermic handle.
- Gauge for controlling pressure inside the double wall.
- Manual air escape valve for depressurising the air produced in the double wall during the heating process.
- Adjustable chromed bronze mixer with hot and cold water.
- Weight safety valve set to 0.5 bar.
- Stainless steel supporting structure with a thickness of 40/10 fitted on steel feet with an adjustable height and a clamp for attaching it to the floor.
- AISI-304 satin stainless steel external walls with a thickness of 10/10.
- AISI-304 stainless steel satin shelf with a thickness of 15/10.
- AISI-316 stainless steel removable mixer with an adjustable rotation speed of between 7 and 28 g/m with a force of up to 386 N·m.
- Possibility to reverse the operating direction with the electronic switch.
- Stainless steel radial arms and Teflon ceramic scraping blades.
- PLC monitor:
 - . Allows up to 100 modifiable cooking programmes that can be managed and personalised, even during cooking.
 - . Fitted with a touch screen and manual controls for operation, water load, inclination and movement of the mixer.
 - . Fitted with acoustic warning message indicators (yellow) for correct functioning or alarms (red) in case of incorrect functioning.
 - . All of the settings are customisable and can be viewed and modified even during cooking (name, wait, water load, times, temperatures, probes, mixing speed, time, etc.).
- Heating:
 - . Indirectly heated gas:
 - Ignited with a manual piezoelectric and pilot flame.
 - Heated by tubular boilers and high-performance AISI-304 stainless steel.
 - Smoke extraction grille.
 - Set of nozzles for different types of gas.
 - Water level control in the double wall with maximum/minimum taps and an automatic water load option.
 - Pressure control of the double wall through the safety valve set to 0.5 bar, depression valve and gauge.
 - . Indirectly heated electric:
 - Heated by a set of electric heating elements.
 - Safety thermostat which ensures that the machine does not operate in the event of overheating or insufficient water.
 - Temperature control (50 - 120 °C).
 - . Indirectly heated steam:
 - Heated by steam (from the user's connection) with a counter-pressure valve that allows steam to be added gradually to the double wall.
 - Pressure control in the double wall through the safety valve set to 0.5 bar, depression valve and gauge.

Motorised tilting bratt pans

General features

- Cooking chamber walls made from AISI 304 stainless steel.
 - Models SBGA-150; SBGA-210; SBEA-150; SBEA-210: They have a base (food-contact surface) made of AISI 304, 100/10. (optional: 12 mm compound)
 - Models SBGA-300; SBGA-400; SBEA-300; SBEA-400: They have a base (food-contact surface) made of AISI 316, 150/10. (optional: 12 mm compound).
- Cooking chamber with non-stick finish and ceramic microspheres.
- Water can be added into the chamber using a single hole tap.
- 10/10 thick AISI 304 stainless steel lid, with chrome plated rack and preloaded spring and stainless steel handle.
- 20/10 thick stainless steel supporting structure, mounted on adjustable steel feet for levelling.
- 10/10 thick satin-finished AISI 304 stainless steel external walls.
- 20/10 thick satin-finished AISI 304 stainless steel shelf.
- Automatic motorised tilting - Includes a manual tilting system in the event of a fault.
- Automatic shutdown in the event of system failure.
- Heating:
 - DIRECT GAS:**
 - Manual Piezoelectric ignition and pilot flame.
 - Heating via tube and high performance AISI 304 stainless steel burners.
 - Smoke extraction grille.
 - Set of nozzles for different types of gas.
 - Safety thermostat
 - DIRECT ELECTRIC:**
 - Heating via a set of electric elements.
 - Safety thermostat for elements that prevents overheating.
 - Temperature control (50 °C - 260 °C).
 - Standard supply voltage 400 V 3N 50/60 Hz.
- Tap with safety valve and thermocouple.
- Temperature regulated between 100 °C and 300 °C

Automatic tilting bratt pans on frame

General features

- Base and walls of cooking chamber made from AISI 304 stainless steel:
 - Models SBGA-150; SBGA-210; SBEA-150; SBEA-210: They have a base (food-contact surface) made of AISI 304, 100/10. (optional: 12 mm compound)
 - Models SBGA-300; SBGA-400; SBEA-300; SBEA-400: They have a base (food-contact surface) made of AISI 316, 150/10. (optional: 12 mm compound).
- Cooking chamber with non-stick finish and ceramic microspheres.
- Water can be added into the chamber via a single tap point.
- 10/10 thick AISI 304 stainless steel lid, with chrome plated rack and preloaded spring and stainless steel handle.
- Supporting structure made from 40/10 thick stainless steel, mounted on adjustable steel feet for levelling.
- 10/10 thick satin-finished AISI 304 stainless steel external walls.
- 15/10 thick satin-finished AISI 304 stainless steel shelf.
- Automatic tilting with hydraulic drive on the front axle
- Automatic shutdown in the event of system failure.
- Heating system:
 - DIRECT GAS:**
 - Manual or electric Piezo electric ignition and pilot flame (SBGAX and SBEAX versions).
 - Heating via tube and high performance AISI 304 stainless steel burners.
 - Smoke extraction grille.
 - Set of nozzles for different types of gas.
 - Safety thermostat.
- Tap with safety valve and thermocouple.
- Temperature regulated between 100 °C and 250°C
- DIRECT ELECTRIC:**
 - Heating via a set of electric elements.
 - Safety thermostat for elements that prevents overheating or inadequate heat levels.
 - Temperature control (100°C - 250°C).
 - Standard supply voltage 400 V 3N 50/60 Hz.

Automatic cookers

General Characteristics

- Well fully made from AISI-316 satin stainless steel.
- AISI-316 satin stainless steel baskets.
- Overflow and tap for output and drainage.
- AISI-304 stainless steel cover with a thickness of 15/10, fitted with a steel zip with preloading springs and an athermic handle.
- Gauge for controlling pressure inside the double wall.
- Manual air escape valve for depressurising the air produced in the double wall during the heating process.
- Adjustable chromed bronze mixer with hot and cold water.
- Weight safety valve set to 0.5 bar.
- Stainless steel supporting structure with a thickness of 20/10 fitted on stainless steel feet that can be adjusted between 150 mm and 180 mm.
- AISI-304 satin stainless steel external walls with a thickness of 10/10.
- AISI-304 stainless steel satin shelf with a thickness of 15/10.
- Fitted with digital controls with 3 displays showing 4 numbers, enabling the temperature to be adjusted between 20 °C and 110 °C.
- Possibility to change amount of time the basket is submerged, with a minimum interval of 1 second.
- Acoustic illuminated indicator to inform of the end of the cooking cycle.
- Cooking shut-off with time delayed water reintegration at the end of cooking.
- Automatic raising of the basket at the end of cooking.
- Possibility to manage the position of the basket: first drip and then unload or direct front unload.
- Heating:
 - DIRECTLY HEATED GAS:**
 - Ignited with a manual piezoelectric and pilot flame.
 - Heated by tubular boilers and high-performance AISI-304 stainless steel.
 - Smoke extraction grille.
 - Set of nozzles for different types of gas.
 - DIRECTLY HEATED ELECTRIC:**
 - Heated by a set of electric heating elements.
 - Safety thermostat which ensures that the machine does not operate in the event of overheating or insufficient water.
 - Temperature control (50 - 120 °C).
 - Standard operating voltage of 400V-3N-50Hz
 - INDIRECTLY HEATED STEAM WITH DOUBLE WALL:**
 - Double wall with AISI-304 stainless steel bottom and walls.
 - Heated by steam (from the user's connection) with a counter-pressure electrovalve that allows steam to be added gradually to the double wall.
 - Pressure control of the double wall through a pressure switch and a safety valve set to 0.5 bar, depression valve and gauge.
- Tap with a safety valve and thermocouple.
- Safety thermostat to protect against overheating and lack of water.

Features and characteristics

A new era of intelligent cooking

User experience

A chef centred design

Designed all through with the professionals' needs in mind, making it the perfect balance of quality, efficiency and comfort.

Smart cooking

It's intelligence, not magic

Powered by digital and technological intelligence to standardise the culinary processes in the most efficient way thanks to iCooking, Additional functions and Multitray.

Robust design

Built to last

The structure is 100% stainless steel and IPX5 protection, to face any culinary challenges with the highest demanding standards.

Food safety

Hygiene, above all

HACCP system, renewal of the inner water tank every 24h, 6-level automatic cleaning and more, to always guarantee the wellbeing of the consumer.

Open access through FagorKconnect

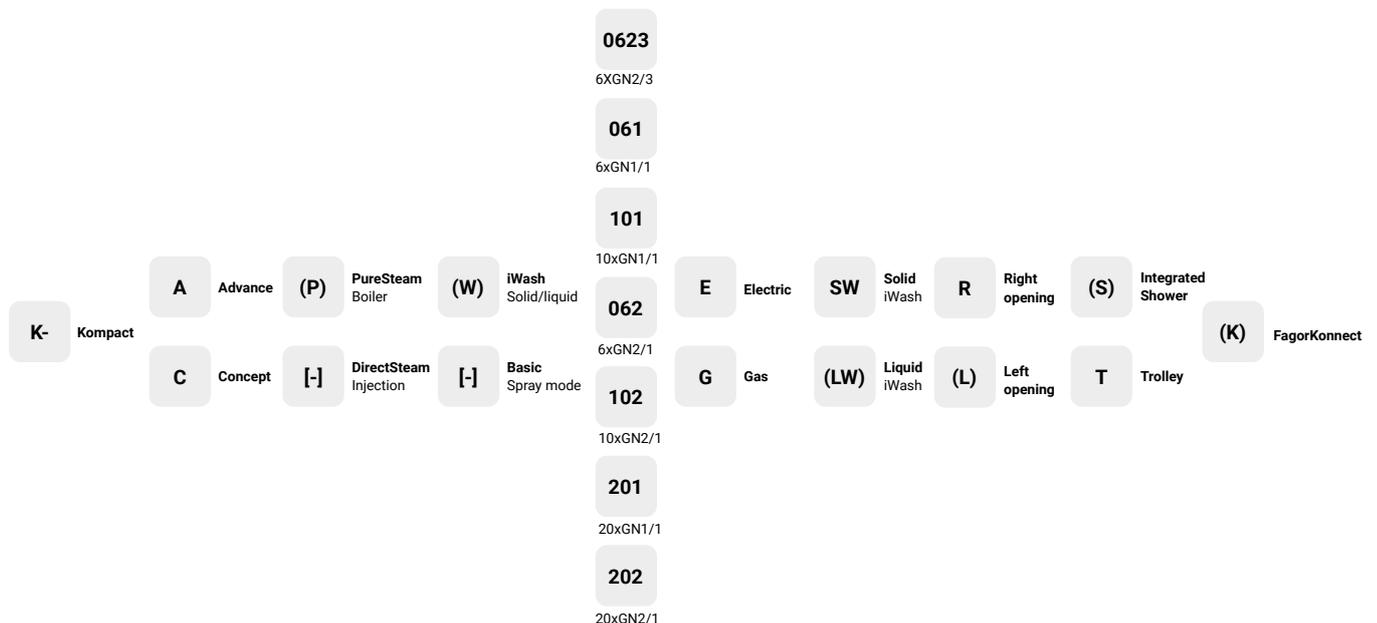

Climate control

Your desired cooking results

Complete precision in the cooking chamber due to the humidity sensor and uniform heat distribution with a 6-speed two-way ventilation system.

Nomenclature

iKORE ovens

Configurable range

Customized to taste

ADVANCE

Cooking quality, efficiency and intelligence.

For the more revolutionary, those who pursue innovation through the latest technological advances, in a culinary world full of creativity.

CONCEPT

Symplcity, power and robustness.

For the more conservative, faithful to the traditional gastronomic methods, but are looking for the maximum performance in a quick and easy way.

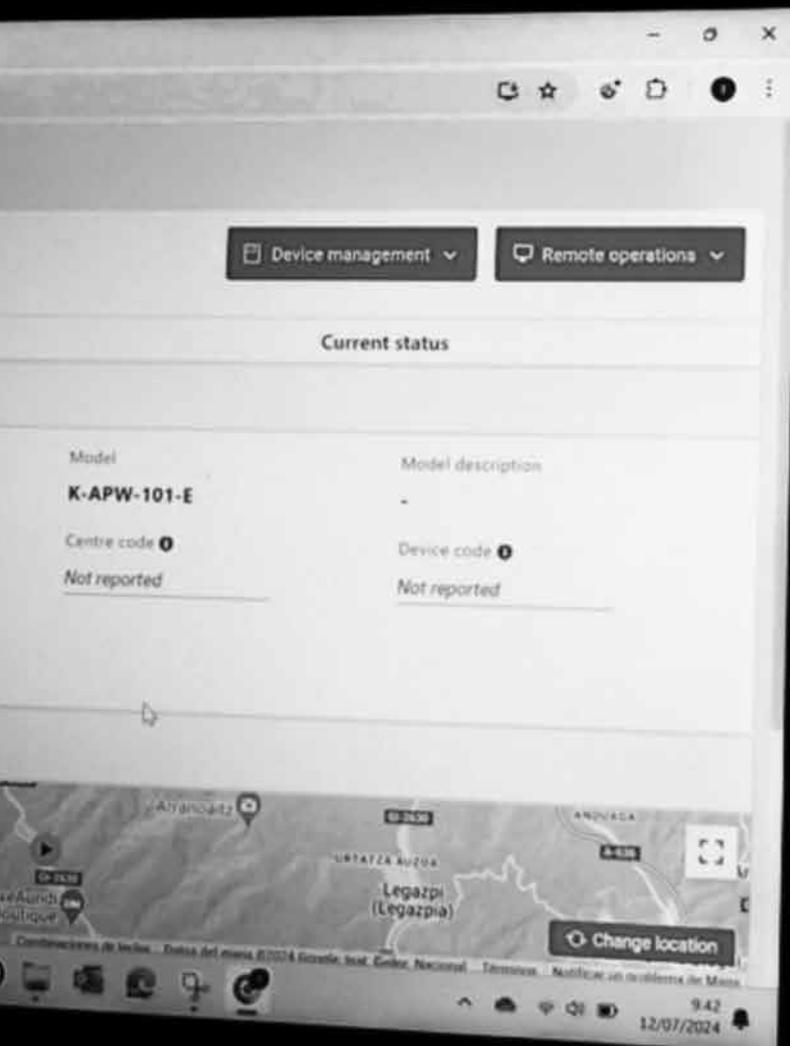

Features	APW	AP	AW	A
PureSteam (boiler) 100% pure steam generator, with programmed descaling.	•	•	-	-
DirectSteam (Injection)	-	-	•	•
iClima Management and regulation of the real humidity in the chamber with 1% accuracy.	•	•	•	•

Fagor Konnect

Explore the many benefits that FagorKonnect provides, and find out in detail how you can specifically enhance the functionality of our iKore ovens.

Specific graphs designed for the oven analysis:

Specialised charts to analyse status, daily cooks and washes, productivity, and errors, helping you gain an overview of your business.

Detailed information displayed in real time:

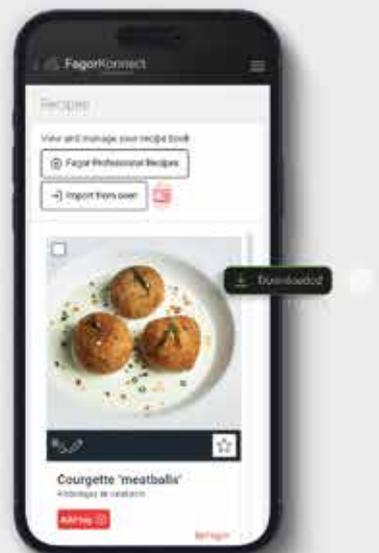

You will get data such as cooking mode, temperature or humidity level in real time.

You will also be able to perform various functions remotely, such as remote washing and other specific operations.

Manage and create your own recipes

You will be able to manage your recipes in an efficient way. You can create a recipe and export it to all your ovens, regardless of their location.

Vacuum packers

General characteristics

Construction:

- AISI 304
- Busch pumps
- 2 units of high-quality polycarbonate fill sheets
- Protection against water
- Cable-free sealing bars with pneumatic pistons

Control:

- High-precision microprocessor which controls the vacuum percentage of (T) the chamber.
- Digital control panel with display included.
- Alarms for set vacuum level and oil change.
- Visualisation of the complete machine cycles .
- Oil level viewer.

Functions and programmes:

- Automatic start of the vacuum cycle
- Piston with dual position (operating and idle)
- Easily programmable memory for 10 programmes
- Possibility of performing additional 60" vacuum
- Possibility of packaging liquids
- H2Oout programme to dehumidify the pump
- Programme for external packing both in bags and containers
- The G models make it possible to package delicate or soft products.

Stacking solutions

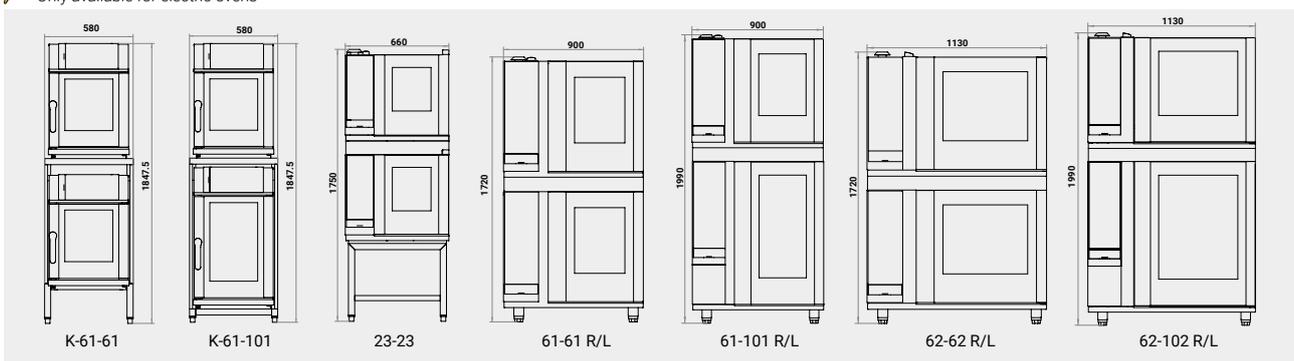

General characteristics

- The kits for ovens in column are composed of a set of parts which allows the ovens to be positioned one above another
- This type of assembly is carried out with 1/1 tray ovens, from any of the three electric ranges.
- The codes of the two ovens must be specified when placing the order, as well as the code of the kit of parts to carry out the assembly in column.

-  Factory assembled
-  Delivery kit

 * Only available for electric ovens

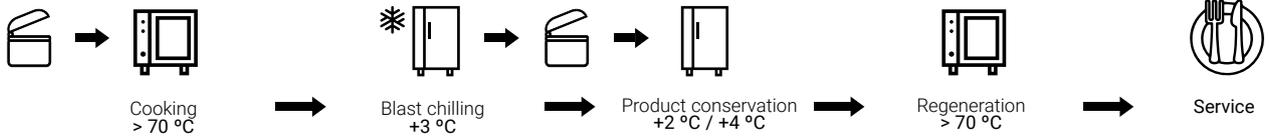

Cook&Chill solutions

General characteristics

- Kit of elements to make a stacking system "Cook & Chill" with an oven and a blast chiller or freezer.
- When ordering a "Cook & Chill" column, the oven code, the chiller code and the code of the corresponding kit of elements for column assembly, or the corresponding code for the most common assemblies, must be specified.

-  Factory assembled
-  Delivery kit

The importance of using blast chillers

Blast chillers are machines designed to quickly lower the temperature of food from 90°C after cooking to a refrigeration temperature of +3°C in no more than 90 minutes, thus preventing bacteria from multiplying.

Our different ranges of mixed blast chillers, with built-in freezing cycle, can lower the temperature of the product to -18 °C in a time of 4 hours, thus achieving a very fast freezing of the food, avoiding, in addition to the increase in bacterial flora, the formation of macrocrystals.

Our Cook&Chill selection

The combined use of ovens and blast chillers allows you to be more efficient, as it makes it easier for you to programme your work in the kitchen.

The correct use of blast chillers with combi ovens results in less waste, time savings and a product that is served at the right time.

Cook & Chill 0623

30-60 meals per day

Oven cleaning

Solid iWash SW

MODEL	DESCRIPTION	CODE	€
	OVENCLEAN: Bucket of detergent tablets - 75 units	19086761	-
	<p>Detergent for degreasing and cleaning ovens with solid iWash cleaning system (SW):</p> <ul style="list-style-type: none"> - Powerful cleaning: Dissolves and removes the most stubborn organic fouling, such as grease. - Ultra-concentrated formula: Ensures deep and reliable cleaning with small doses. - No phosphates or hazardous substances: Safe and environmentally friendly, ideal for the food industry. - Compatible with Ovenbrite: the complementary polishing agent for a perfect finish. 		
	OVENBRITE: Bucket of rinse aid tablets - 75 units	19086763	-
	<p>Rinse aid tables for ovens with solid iWash cleaning system (SW):</p> <ul style="list-style-type: none"> - Anti-limescale effect: Active protection against limescale deposits. - Prolongs the service life: Advanced ingredients care for and preserve the performance of the oven. - Exceptional results: Clean, hygienic and shiny cooking chamber after each cleaning cycle, ready to use in optimal conditions. 		

Liquid iWash LW

MODEL	DESCRIPTION	CODE	€
	DECAFORN: Liquid detergent 10l can (external connection)	19086053	-
	<p>Degreasing liquid detergent for ovens with liquid iWash cleaning system (LW):</p> <ul style="list-style-type: none"> - Advanced formulation: effective degreasing and scale removal. - Superior performance: powerful action with a small dosage. - Protects surfaces: keeps stainless steel in a perfect condition with no risk of scratching or dulling. 		
	HIDROFORN: Liquid rinse aid 10l can (external connection)	19086054	-
	<p>Water repellent and drying liquid rinse aid for ovens with liquid iWash cleaning system (LW):</p> <ul style="list-style-type: none"> - High performance: acts as a brightener, drier, neutraliser and water repellent protector. - Limescale removal: removes limescale deposits and prevents redeposition of lime particles. - Long-lasting shine: ensures a glossy, residue-free finish. - Odour and flavour free: guarantees a clean and neutral process, without altering the food. 		

Basic wash (manual)

MODEL	DESCRIPTION	CODE	€
	KOI PLUS: Degreaser - 4 x 6kg bottles pack (spray mode)	19086765	-
	Oven degreaser canisters for basic cleaning system ovens (without W), for manual application.		

Water treatment

Cartridge filtration systems:

Using properly treated water at each catering point ensures that water failures are kept to a minimum and recipes can be produced with the quality customers demand. Oven filters ensure protection against limescale deposits, the effects of chlorine and particles in the water, as well as corrosion. This saves on repair costs and provides a clean and hygienic oven image to match the business standards.

By measuring two parameters: hardness and chlorides, we can determine which filter the oven requires:

PARAMETER	RECOMMENDATION	PROTECTION	FILTER
Water hardness	> 6 dH*: Anti-limescale filter * Even if the hardness is less than 6 dH°, the use of the filter is always recommended to prevent problems with chlorine and particles coming from tap water.	<ul style="list-style-type: none"> - Retains particles - Removes chlorine - Prevents limescale formation 	Ovens until 6 x GN1/1: C500 (K-061, K-101, 0623, 061)
			Ovens from 10 x GN1/1 : C1100 (062, 101, 102, 201, 202)
Chlorides	> 150 mg/l : Anti-limescale + anti-corrosion filter	<ul style="list-style-type: none"> - Retains particles - Removes chlorine - Prevents limescale formation - Prevents the formation of gypsum - Prevents corrosion 	X1100

Anti-limescale filtering

	MODEL	DESCRIPTION	CODE	€
	Kit C500	First installation kit - Water filtration system for ovens. Anti-limescale treatment, standard capacity. Includes: Head + cartridge C500 + flowmeter + 3/8 - 3/4 adapter for filtering water containing lime scale	19111541	-
	Kit C1100	First installation kit - Water filtration system for ovens. Anti-limescale treatment, large capacity. Includes: Head + cartridge C1100 + flowmeter + 3/8 - 3/4 adapter for filtering water containing lime scale	19111542	-
	C500	Replacement cartridge for filter kit C500	19111544	-
	C1100	Replacement cartridge for filter kit C1100	19111547	-

*The cartridge shall be replaced when the water consumption of the oven has reached the litre capacity of the filter, with a maximum replacement period of one year.

Anti-limescale + anti-corrosion filtering

	MODEL	DESCRIPTION	CODE	€
	Kit X1100	First installation kit - Water filtration system for ovens. Anti-limescale and anti-corrosion treatment. Includes: Filter head + filter X1100 + flow meter + 3/8 - 3/4 adapter for filtering water containing lime and salinity.	19111543	-
	X1100	Replacement cartridge for filter kit X1100	19111548	-

*The cartridge shall be replaced when the water consumption of the oven has reached the litre capacity of the filter, with a maximum replacement period of one year.

Warewashing

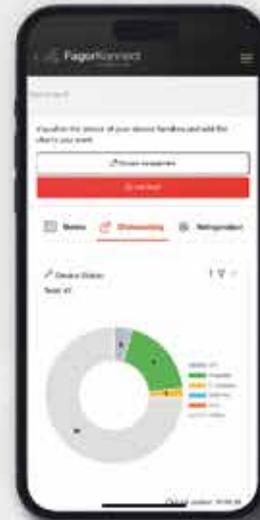

Get to know how FagorKonnnect potentiates the functionality of the devices, specifically the dishwashing.

Specific graphs designed for dishwashing analysis:

To perform dishwashing equipment analysis focusing on specific aspects such as device status, error analysis, and cycles run per programme and per day, you could use intuitive and specific graphics that highlight the information.

Detailed information displayed in real time:

Key data will be displayed to monitor dishwashing equipment and perform actions such as setting parameters, switching the equipment on or off or network configuration.

View and download the HACCP of a particular device:

HACCP for a specific device is available. Obtains a graph over a range of selected dates.

In progress

- 2.8" backlit colour (TFT) liquid crystal display.
- Colour-coded status indicators.
- Display of operating parameters, such as wash and rinse temperatures or cycle times.
- Indicators of tank and boiler heaters operations.
- Self-diagnosis and error signalling.
- Timer function to be able to schedule the machine to switch on or off at a specific time.
- Power-saving mode (stand-by): Reduction of power consumption when the machine is not in operation.
- User-selectable programmes according to equipment use (glass, crockery and bar) and machine-specific programmes.
- Machine self-cleaning programmes in models with drain pump (B) and softener (S).

Self-cleaning

Emptying

Auto-filling

Intelligent resin
regeneration

- Technical menu (via password)
 - View of all the inputs of the electronics and act on the outputs to facilitate the quick detection of problems.
 - Modification of operating parameters, such as heating temperatures, washing and rinsing times, etc.
 - Scheduled maintenance: the time between warnings to perform maintenance on the machine can be edited with the intention of reducing possible breakages and maintaining the machine's performance.
- HACCP: download HACCP information.
- Connectivity (K) as an option (Wi-fi and Ethernet).
- Sensorisation options (Z) including:
 - Chemical dosing control (DA).
 - Control of low chemical level by means of probes (L), available as an accessory, with warning on the control panel.

Concept +

Membrane keypad with 5 buttons.

Advance

Capacitive touch display. Illuminated push buttons and the multi coloured START button that changes colour depending on the machine status.

CONCEPT | C

- Electromechanical interface with three or four robust backlit pushbuttons depending on the type of machine. One button for power on and the rest for programmes, the light of which indicates the selected programme (flashing) or machine is ready (steady).
- Additional programmes by long pressing of the buttons:
 - Cold rinse (C)
 - Self-cleaning (in models with drain pump- B)
 - Drain (in models with drain pump- B)
 - Extended cycle (hood type dishwasher)
- Optional two digit LED displays (T) to indicate wash and rinse temperatures, as well as alphanumeric status and error codes. They also include operating indicators for tank and boiler heaters.

Model + T

Common characteristics

Dual-flow wash pumps with soft-start

- Dual-flow wash pumps: one input and two outputs, one for each arm, without the need to split the flow to avoid power loss and reduce noise.
- The cycle starts slowly and gradually increases to maximum speed to prevent light items such as glassware and crockery from falling out.

Duo-KLIP wash/rinse arms

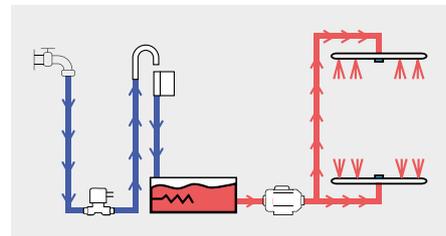

- A combined wash and rinse arm at the same level, made of composite material, in stainless steel as option (X), preventing the two arms from getting in each other's way.
- Washing and rinsing orifices designed to reach the most inaccessible places. They spray water precisely, achieving lower water consumption, reducing electricity and chemical consumption.
- The clip-on snap-on coupling makes it easy to assemble and disassemble for cleaning.

Characteristics according to model

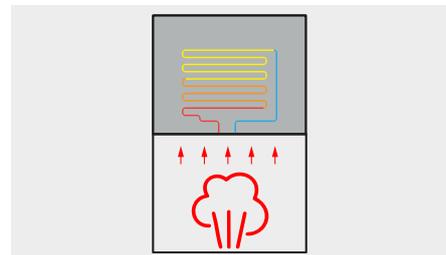

Rinse pump and thermostat

- Rinse even at low mains pressure (1 bar).
- The temperature of the water in the boiler is constant throughout the rinse.
- Type A nonreturn device in compliance with EN 1717.
- Accurate rinse aid dosing with a constant water flow.
- Thermostop: starts the rinse when the rinse temperature required for a hygienic wash result and correct drying of the dishes has been reached.

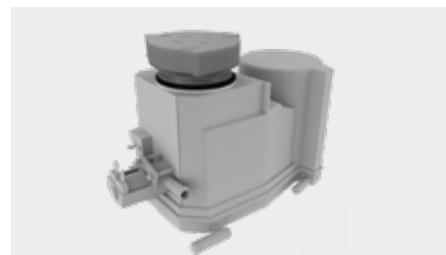

Energy Recovery System (RC)

- Minimizes the steam released to create a more comfortable working environment while using the heat from the unit to further heat the incoming water and reduce energy costs.
- The process is carried out at the end of the cycle for 40 seconds (configurable) increasing the temperature of the incoming water from 10°C to 25°C, which means that a cold water connection (15-25°C) is recommended.

Smart softener (S)

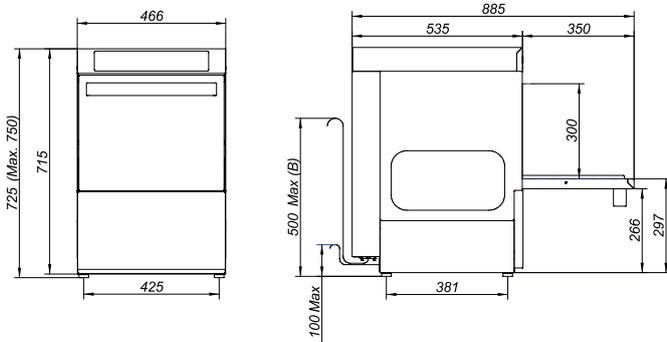

- Integrated softener that provides continuous soft water. This allows the detergent and rinse aid to work to their full effect and considerably reduces limescale deposits in the machine.
- The user can easily refill the tank and a sensor warns when the salt tank needs to be refilled.
- Smart resin regeneration that guarantees uninterrupted washing because the process does not stop to regenerate the resin. It performs the regeneration fully automatically and invisibly for the customer. Water quality is always constant.

CONCEPT+

Glasswashers 400x400

General features

- 2.8" backlit colour liquid crystal display (TFT) and five-buttons membrane keypad.
- Stamped tank with slope for a complete drainage.
- Stamped basket guides.
- Sides of the washing chamber in partial double-skin and integral double-skin door.
- Double in stages filtration system. Composite tank surface filters as standard.
- Dual-flow wash pump with soft-start.
- Duo-KLIP upper and lower wash/rinse arms made of composite material.
- Hydraulic (in models with mains pressure WGP-400) or peristaltic (in models with rinse pump WGP-401) rinse aid dispenser as standard.
- Thermostop in models with rinse pump (WGP-401).

	Plates insert 19084452	pc	1
	Cutlery insert 19102721	pc	1

(1) Hot water supply at 50°C.

(2) Adjustable height (+25/+0 mm).

(3) In models with mains pressure (WGP-400), consumption may vary depending on the supply water pressure. Water consumption per programme (2 bar): 2/ 2,2/ 2,5/ 2 l/ cycle.

(4) In machines with the cold rinse option (C), the second rinse is carried out with cold water, whereas without the option, the rinse is carried out with cold water by switching off the boiler heating element.

(5) Not compatible with models with water softener (S).

(6) Increases the width of the machine by 20 mm, 10 mm in each side.

(7) This option excludes glass baskets (19082432) and plates insert (19084452) from the standard accessories.

(8) This option excludes the standard accessories.

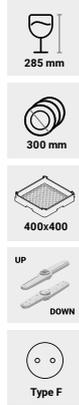

(9) Standard in models with water softener (S).

(10) Power reduction to limit consumption to 13A.

(11) Includes Australian plug (I type) and Watermark approval.

 (6) This option excludes the standard accessories.
 (7) Power reduction to limit consumption to 13A.
 (8) Includes Australian plug (I type) and Watermark approval.

Front loading dishwashers 500x500

General features

- 2.8" backlit colour liquid crystal display (TFT) and capacitive touch display.
- Tank, rear door and basket guides are stamped and all edges, including the vertical ones, are rounded to facilitate the draining of impurities. There are no points where dirt accumulates.
- The machine is built with integral double-skin.
- Soundproofed and heat-resistant double-skin door.
- Cushioned counterbalanced door.
- Hygienic tank heater.
- Triple in stages filtration system. Stainless steel tank surface filter as standard and waste collection basket.
- Boiler with insulation.
- Dual-flow wash pump with soft-start.
- Duo-KLIP upper and lower wash/rinse arms made of composite material.
- Rinse pump, drain pump and peristaltic rinse aid dispenser as standard.
- Thermostop.
- Multipower as standard.

(6) This option excludes the standard accessories.

(7) Power reduction to limit consumption to 13A.

(8) Includes Australian plug (I type) and Watermark approval.

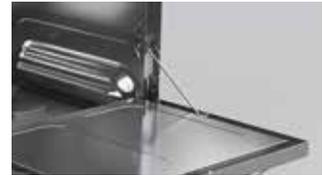

CONCEPT

Front loading dishwashers 500x500

General features

- Electromechanical interface with robust backlit pushbuttons. "T" models with two digit LED displays.
- Stamped tank with slope for a complete drainage.
- Stamped basket guides.
- Sides of the washing chamber in partial double-skin and integral double-skin door.
- Triple in stages filtration system. Composite tank surface filters as standard.
- Dual-flow wash pump with soft-start.
- Duo-KLIP upper and lower wash/rinse arms made of composite material.
- Rinsing with mains pressure.
- Hydraulic rinse aid dispenser as standard.

(1) Hot water supply at 50°C.

(2) Adjustable height (+25/+0 mm).

(3) Consumption for a supply water pressure of 2 bar. At higher pressures the consumption will increase.

(4) Includes stainless steel tank surface filters (SF).

(5) Increases the width of the machine by 20 mm, 10 mm in each side.

(6) This option excludes the standard accessories.

(7) Power reduction to limit consumption to 13A.

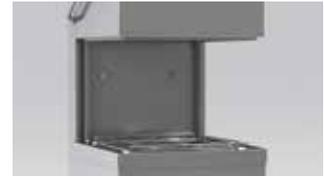

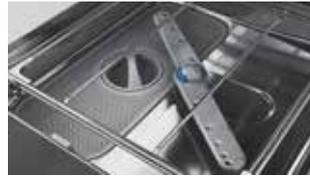

(8) Includes Australian plug (I type) and Watermark approval.

Hood type dishwashers 500x500

General features

- 2.8" backlit colour liquid crystal display (TFT) and capacitive touch display.
- Fully stamped tank with no welds or sharp edges.
- Double-skin hood with thermo-acoustic insulation and metal runners to reduce lifting effort and noise level.
- Maximum visibility thanks to the top position of the control panel.
- Triple stage filtration system. Composite tank surface filter as standard and waste collection basket.
- Boiler with insulation.
- Dual-flow wash pump with soft-start.
- Duo-KLIP upper and lower wash/rinse arms made of composite material.
- Rinse pump, drain pump and peristaltic rinse aid dispenser as standard.
- Thermostop.
- Multipower as standard.

(1) Cold water supply at 15°C.

(2) Adjustable height (-20/+50 mm).

(3) In models with energy recovery system (RC), the cycle time is extended by approximately 30s.

(4) The second rinse is carried out with cold water by switching off the boiler heating element.

(5) This option excludes the standard accessories.

(6) Standard in models with water softener (S) or Energy Recovery System (RC).

(7) Includes Watermark approval.

(8) Select the machine with the appropriate frequency and then add the option.

CONCEPT+

Hood type dishwashers 500x500

General features

- 2.8" backlit colour liquid crystal display (TFT) and five-buttons membrane keypad.
- Fully stamped tank with no welds or sharp edges.
- Single-skin hood, which slides smoothly on metal runners that reduce lifting effort and noise level.
- Double in stages filtration system. Composite tank surface filter as standard.
- Boiler with insulation.
- Dual-flow wash pump with soft-start.
- Duo-KLIP upper and lower wash/rinse arms made of composite material.
- Hydraulic (in models with mains pressure- WHP-502) or peristaltic (in models with rinse pump- WHP-503) rinse aid dispenser as standard.
- Thermostop in models with rinse pump (WHP-503).
- Multipower as standard.

Tables for hood-type dishwashers

- Worktop made of stainless steel with satin finish.
- Welded tank of:
 - WHTWB: 450 x 450 x 250 mm.
 - WHTWBB: 450 x 600 x 300 mm.
- Shower unit not included, but provided with a hole to fit it.
- Sorting hole with black rubber ring flush with the worktop for disposal of waste into a rubbish bin (not included).
- Splashback 100 x 15 mm.
- Possibility to install a front-loading dishwasher under tables without a tank and with a rear upstand (WHTW- models), replacing the shelf with a support bar supplied as standard.
- Square stainless steel legs 40 x 40 mm.
- Frame height 850 mm with height-adjustable stainless steel legs (-10 mm / + 50 mm).
- Supplied disassembled.

Water treatment

Why is water quality important?

Water plays a key role in all dishwashing processes. Poor water quality can cause limescale deposits, stains on glasses and damage to internal components. Proper water treatment ensures optimal washing results, longer equipment life and lower detergent consumption.

Water treatment methods

DESCALING

Hard water contains minerals such as calcium and magnesium that form limescale deposits on heating elements and inside the machine.

A descaler removes these minerals through an ion exchange process, replacing them with sodium ions.

Main advantages:

- Prevents limescale build-up inside the dishwasher.
- Reduces maintenance costs.
- Improves the washing results for dishes and cutlery.
- Extends the service life of the machine.

Recommended for: areas with medium-high water hardness (above 10 °fH).

REVERSE OSMOSIS

Even softened water can contain dissolved salts and minerals that can leave marks on glasses or stainless steel surfaces.

A reverse osmosis (RO) system uses a semi-permeable membrane to remove up to 98% of dissolved solids, providing pure, demineralised water.

Main advantages:

- Perfectly clear glasses and shiny covers, without the need for manual polishing.
- Reduces the use of chemicals and drying time.
- Provides consistent, top-quality washing results.

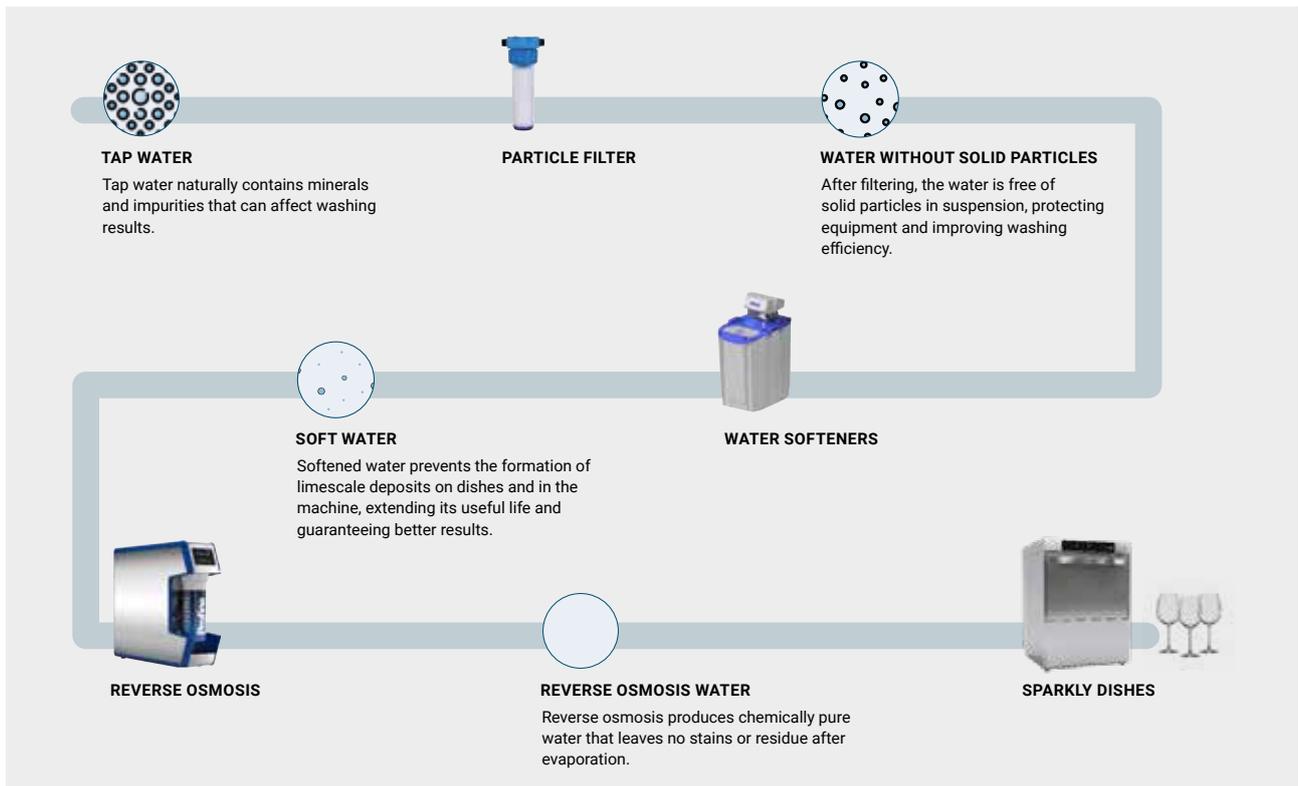

Recommended for: when top-quality results are required for glassware. Ideal for high-end restaurants, hotels and bars.

COMBINED SYSTEMS

(water softening + reverse osmosis)

In many professional installations, a water softener + reverse osmosis configuration offers the best balance between protection and performance. The water softener pre-treats the incoming water, ensuring longer life and greater efficiency of the reverse osmosis membranes.

Recommended for: areas with high water hardness (above 35 °fH).

PARTICLE FILTER

MODEL	CODE	DESCRIPTION	DIMENSIONS (MM)	€
 WWFS-9	19115356	9" particle filter - 3/4" thread	200x145x340	-

MANUAL WATER SOFTENERS

- Quick and easy installation
- Regeneration according to usage and water hardness.

MODEL	CODE	DESCRIPTION	DIMENSIONS (MM)	€
 WWSM-12	19112841	SOFTENER 12L	Ø 190x500	-
WWSM-16	19112842	SOFTENER 16L	Ø 190x600	-

AUTOMATIC WATER SOFTENERS

- Designed to be easy to use with intuitive programming.
- Quick installation and minimal maintenance.
- Automatic regeneration system that constantly keeps water hardness under control without the need for manual intervention. Regeneration programming in volumetric or chronometric mode.
- Salt alarm that helps the user monitor the presence of salt in the brine. When the salt in the brine runs out, an acoustic and visual signal is activated.

MODEL	VOLTAGE AND FREQUENCY	CODE	DIMENSIONS (MM)	POWER (W)	€
WWSAV-12	100-240V 1N 50/60HZ	19115354	285x405x595	4	-

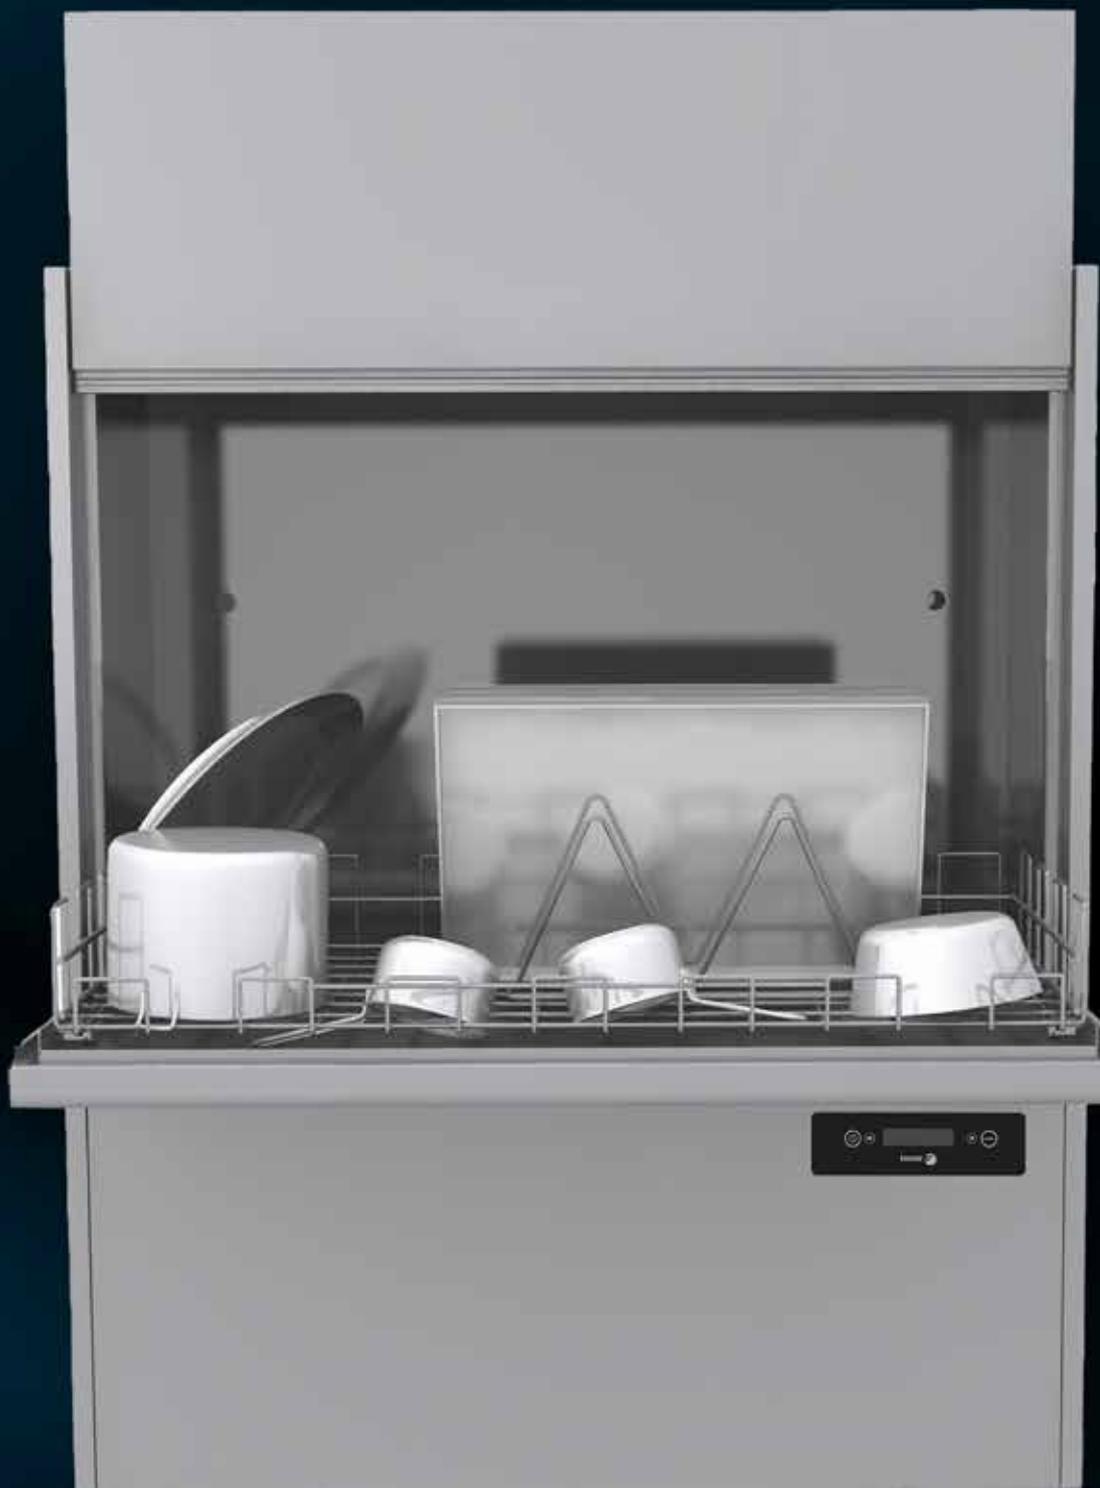

REVERSE OSMOSIS

- Compact reverse osmosis device made of stainless steel.
- Designed to work exclusively with drinking water. For water hardness above 10°fH, it is recommended to install an external water softener before the reverse osmosis unit.
- Can be installed vertically or horizontally.
- Integrated handle for easy transport.
- High-brightness tilted display for better visibility.
- Alarms for filter changes, low water inlet pressure, etc.
- Only suitable for dishwashers with a rinse pump: WGP-401, WUA-503, WUP-503, WHA-503, WHP-503. Not suitable for machines with an integrated water softener or energy recovery system.

Utensil washers

Utensil washers	209
Accessories	212

Utensil washers

- 5" backlit colour LCD display.
- The tank is stamped and inclined for complete drainage. The washing chamber is free of interior pipes, edges and holes where dirt can accumulate. In WLP-61 model, the tank is welded.
- The machine is built with integral double-skin.
- Soundproofed and heat-resistant double-skin door.
- Counter-balanced, cushioned door for easy opening and closing (except for WLP-61 model).
- Stainless steel tank surface filter, retains coarse dirt.
- Polypropylene basket filter, except on WLP-61 models, which is in an easily accessible position so that the operator can remove and empty it

in a few seconds.

- Suction filter in polypropylene that blocks the lightest dirt, protecting the washing pump. In WLP-61 model double suction filter.
- Dual-flow wash pump. 2 pumps in WLP-130 model.
- Lower and upper "3-spoke" stainless steel wash arms. In WLP-61 "2-spoke" in lower side.
- Rinse pump, drain pump, peristaltic rinse aid dispenser and peristaltic detergent dispenser as standard.
- Rod basket as standard accessory.

Rack conveyor

Compact dishwashers.....	215
Modular dishwashers.....	220
Accessories.....	226

CONCEPT

Rack conveyor | Compact dishwashers

General characteristics

- All the main parts are manufactured in AISI-304 anti-corrosion stainless steel: tanks, washing and rinsing arms, rinsing jets, doors, basket conveyance system, boiler and metal tubes.
- Upwards-opening double panel door.
- Tank tray filters made of AISI-304 stainless steel, easy to access and remove for cleaning and access to the tank.
- Safety filter for pump suction.
- Rinsing boiler with heat insulation.
- Easy access for installation. Electrovalve located on one side (no need to remove panels to connect the machine).
- Electrical panel designed for easy connection of dosers for liquid and solid detergents, rinse aid, limit switches, supplementary emergency stop button.
- Washing arms easily removable as a set, for cleaning, with a plug on each branch providing access for cleaning inside.
- Rinse jets easily dismountable and removable.
- System of electronic regulation of speeds by means of frequency shifter.
- Configurable electronic temperature control:
 - Wash (50 - 65 °C)
 - Rinse (70 - 85 °C)
- Guarantor of rinse at 85 °C.
- Pressure regulator for flow control.
- Emergency stop button incorporated.
- Extra anti-entrapment protection system at the entrance, mounted on the AS-260 splash guard supplement (optional).
- Open door blocking system.
- IPX4 protection system.
- System for detection of blockage of conveyor carriage and automatic reverse function.
- High-power washing system with 4 upper and 4 lower washing branches.
- 3 washing programs: deep, medium and high-capacity.
- Double effect rinse.
- Energy-saving system: reduces consumption by halting operation of the pumps, and by passing the heating of the rinse to stand-by mode (70 °C).
- Auto-timer which deactivates the conveyor motor after a pre-set period of inactivity (10 minutes).
- Energy saving system in the wash: the wash does not start up until it detects the passage of the basket.
- Rinse saving system. The rinse stops when the basket has left, saving water and energy.
- Limit switch included.

Equipment included:

- 2 base baskets, CT-10
- 2 baskets for plates, CP-16/18
- 1 basket for glasses, CV-16/105
- 1 basket for cutlery, CT-10 R

CONCEPT

Rack conveyor | Compact dishwashers "eco" version - gas heated

CCO-160-L-ECO + AS-260 + GWB-40

General characteristics

- The ECO version conveyor dishwashers are fitted with an external hot water generator, gas heated, model GWB-40 (#).
- The generator replaces the electric rinse boiler in the dishwasher, bringing a significant saving in electricity consumption.
- Given the heating power of the generator, the dishwasher can be installed in facilities with a cold water connection.
- The dishwasher has a motor pump to send the water from the generator to the rinse jets.
- The dishwasher incorporates a flow regulator to ensure constant water consumption.
- The first filling of the dishwasher wash tank takes place with water from the generator, rapidly reaching the set temperature.

	AS-260	-	19048568	ANTI-SPLASH GUARD SUPPLEMENT (ENTER) With fitting for connection of fume extractor. With separator curtains. Includes extra anti-entrapment protection element. Fitted as standard at the entrance of modular dishwashers. This item cannot be installed on dishwashers fitted with energy recovery (CRS)	-	L = 260 mm	-
	CRS-600	50/60	19048639	CONVEYOR RECOVERY SYSTEM: Recommended for models with cold water input (CW) Aspires the steam generated inside the tunnel and sends the condensed water to the tank of the machine, increasing the water temperature from 15/18 °C to 35/40 °C . Allows savings of up to 3 kW-h. Recommended for models with cold water input (CW) with temperatures no higher than 25 °C. It is not appropriate for installation in machines with hot water input, nor in ECO models with rinse water heating in the GWB-40 generator. Module with conveyance system included. With separator curtains. Bottom shelf. This item cannot be installed on dishwashers fitted with anti-splash guard supplement at the entrance (AS-260).	0,75	600x790x1.930	-

OPTION AT THE EXIT TO SELECT FROM

	CDT-600	50/60	19046516	DRYING TUNNEL : Supplementary element with 9 kW heating element box and upper fan for drying of the dishes with 0,55 kW motor. Module with conveyance system included, for placement at the end of the machine. With separator curtains. Bottom shelf. This item cannot be installed on dishwashers fitted with anti-splash guard supplement at the exit (ASE-260). A maximum of one drier per machine can be installed.	9,55	600x790x1.930	-
	ASE-260	-	19076633	ANTI-SPLASH GUARD SUPPLEMENT (EXIT) With fitting for connection of fume extractor. With separator curtains. Includes extra anti-entrapment protection element. Optional on all compact or modular rack-type dishwashers. This item cannot be installed on dishwashers fitted with CDT drying.	-	L = 260 mm	-

CONCEPT

Rack conveyor | Modular dishwashers

CCO-180-L

General characteristics

- All the main parts are manufactured in AISI-304 anti-corrosion stainless steel: tanks, washing and rinsing arms, rinsing jets, doors, basket conveyance system, boiler and metal tubes.
- Upwards-opening double panel door.
- Tank tray filters made of AISI-304 stainless steel, easy to access and remove for cleaning and access to the tank.
- Safety filter for pump suction.
- Rinsing boiler with heat insulation.
- Easy access for installation. Electrovalve located on one side (no need to remove panels to connect the machine).
- Electrical panel designed for easy connection of dosers for liquid and solid detergents, rinse aid, limit switches, supplementary emergency stop button.
- Washing arms easily removable as a set, for cleaning, with a plug on each branch providing access for cleaning inside.
- Rinse jets easily dismountable and removable.
- System of electronic regulation of speeds by means of frequency shifter.
- Configurable electronic temperature control:
 - Wash (50 - 65 °C)
 - Rinse (70 - 85 °C)
- Guarantor of rinse at 85 °C.
- Pressure regulator for flow control.
- Emergency stop button incorporated.
- Extra anti-entrapment protection system at the entrance, mounted on the AS-260 splash guard supplement, as standard.
- Open door blocking system.
- IPX4 protection system.
- System for detection of blockage of conveyor carriage and automatic reverse function.
- Prewash module with 3 upper and 3 lower washing branches.
- High-power washing system with 5 upper and 5 lower washing branches.
- 3 washing programs: intensive (DIN10534), medium and high-capacity.
- Pre-rinse and rinse, both double effect, in models 180, 225 and 270.
- Triple-effect pre-rinse and double-effect rinse in model 320.
- Energy-saving system: reduces consumption by halting operation of the pumps, and by passing the heating of the rinse to stand-by mode (70 °C).
- Auto-timer which deactivates the conveyor motor after a pre-set period of inactivity (10 minutes).
- Energy saving system in the wash: the wash does not start up until it detects the passage of the basket.
- Rinse saving system. The rinse stops which the basket has left, saving water and energy.
- Limit switch included.

Equipment included:

- 2 base baskets, CT-10
- 2 baskets for plates, CP-16/18
- 1 basket for glasses, CV-16/105
- 1 basket for cutlery, CT-10 R

CONCEPT

Rack conveyor | Modular dishwashers “ECO” version - gas heated

CCO-225-L-ECO + GWB-40

Specific characteristics

- The ECO version conveyor dishwashers are fitted with an external hot water generator, gas heated, model GWB-40 (#).
- The generator replaces the electric rinse boiler in the dishwasher, bringing a significant saving in electricity consumption.
- Given the heating power of the generator, the dishwasher is for installation in facilities with a cold water connection.
- The dishwasher has a motor pump to send the water from the generator to the rinse jets.
- The dishwasher incorporates a flow regulator to ensure constant water consumption.
- The first filling of the dishwasher wash tank takes place with water both from the generator and from the filling electrovalve.

MODEL	HZ	CODE	DESCRIPTION	POWER (kW)	DIMENSIONS (mm)	€
OPTION AT THE ENTRANCE						
	(*)		UPPER ENERGY RECOVERY Recommended for dishwashers with cold water inlet (CW) with temperatures not exceeding 25 °C. It aspirates the steam generated inside the tunnel and sends the condensed water to the tanks of the machine, increasing the water temperature from 15/18 °C to 35/40 °C. Save up to 3 kW-h. Fitted into the top of the dishwasher. Does not increase length. Its installation does not proceed in machines with hot water inlet, nor in ECO models with rinse water heating in the GWB-40 generator.	0,55	600x790x500	-

•: Standard •: Optional

All the modular machines come with an anti-splash module AS-260 at the entrance as standard, 260 mm in length. An exterior extractor can be fitted to this module. Optionally, you can also request it as a supplement to fit to the exit of the machine.

The CDT drying tunnels are fitted to the exit of the machine, increasing the total length by 600 or 800 mm (depending on the model of drying tunnel installed). For models 270 and 320, the long CDT-800 drying tunnel is to be installed.

The CRS-700 energy recycler is to be placed on top of the modular dishwashers, and the total length is not increased. Recommended for models with cold water input (CW) with temperatures no higher than 25 °C. It is not appropriate for installation in machines with hot water input, nor in ECO models with rinse water heating in the GWB-40 generator.

The mission of this accessory is to collect the steam from the inside of the dishwasher, and, after a process of condensation, send this water (which is at high temperature) to the rinse system. This raises the average temperature in the rinse system, which therefore requires a lower supply of electrical energy, contributing to notable savings in energy and costs (around 3 kW-h).

Summary table of characteristics for conveyor dishwashers

	CCO-120	CCO-160	CCO-180	CCO-225	CCO-270	CCO-320

(*) Entrance of the baskets:
L: Entry from the left side of the machine.
R: Entrance from the right side of the machine.

Delivery / sorting tables

General characteristics

- Serving staff can deposit dirty dishes while the dishwashing staff are sorting them on the other side.
- The table is supplied with a sorting shelf (450 mm over the work top) and a waste disposal.
- Adjustable feet.

MODEL	CODE	SHELF DIMENSIONS (mm)	SHELF CAPACITY (BASKETS)	DIMENSIONS (mm)	€

Pre-rinsing table with introducer of baskets in corner

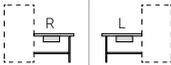

MCFD-1000 R

General characteristics

- Rear guard 200 mm. Built in sink and shower tap.
- Length of the sink side: 1,400 mm - Depth: 700 mm.
- Element to introduce the baskets with the movement of the advancement system of the conveyor.
- Length of the introducer side: 950 mm - Depth: 800 mm.
- Ask the manufacturer to adapt the machine to install the table.

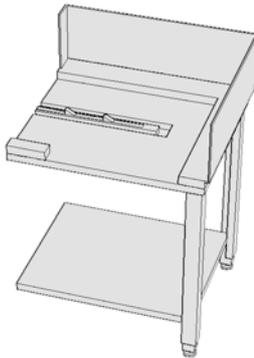

MODEL	CODE	ENTRY (*)	EQUIPMENT FEATURES	DIMENSIONS (mm)	€
MCFD-1000 R	19006350	R	- Rear guard - Sink - Shower tap	1.400x950x900	-

(*) Entrance of the baskets:
L: Entry from the left side of the machine.
R: Entrance from the right side of the machine.

Introducers of baskets in corner

E-90-R-CV

General characteristics

- Element to introduce the baskets in the machine.
- Movement by the advancement system of the conveyor.
- Rear guard 250 mm.
- Lower shelf.
- Ask the manufacturer to adapt the machine to install the introducer.

(*) Entrance of the baskets:
L: Entry from the left side of the machine.
R: Entrance from the right side of the machine.

	MR4C	Rolling table	4	2.148x665x850	-

Flight type dishwashers

Flight type dishwashers..... **231**

Common features of the range

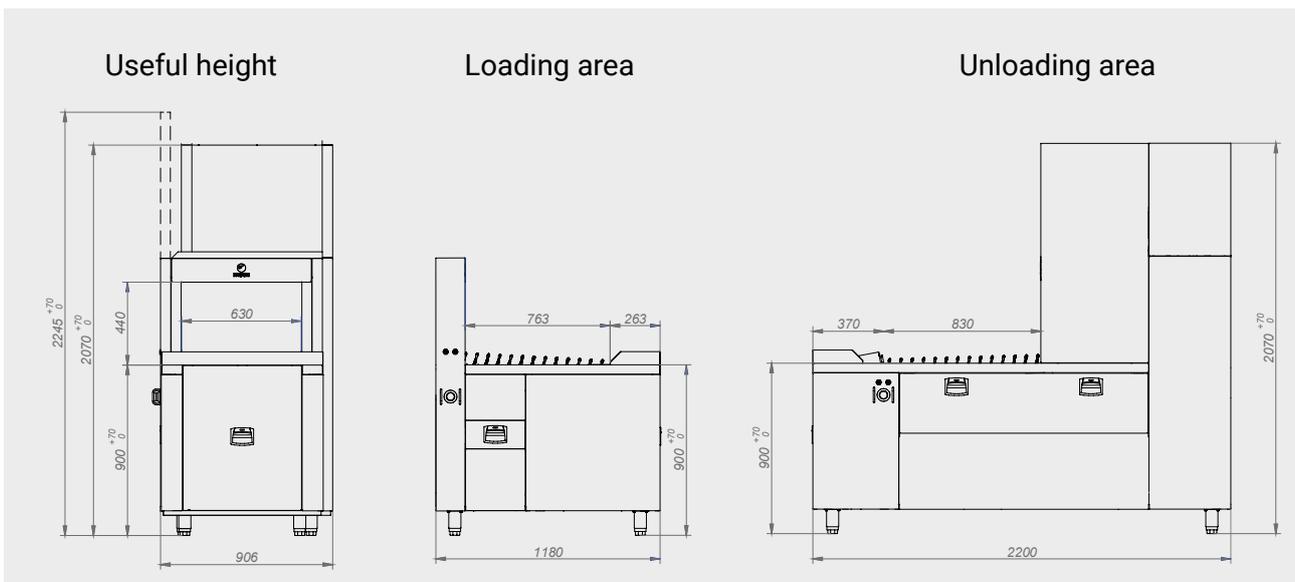

- Wash modules without inner piping.
- Double-skin construction.
- Double-skin doors with thermal and acoustic insulation.
- Counterweighted doors with safety stops allow full unrestricted access to the pre-wash, wash, pre-rinse and rinse areas.
- Modular construction allowing the machine to be divided on site into narrower modules.
- Useful loading area of 763 mm and unloading area of 830 mm at 900 mm height.
- 150 mm splash (AS) guard module at the loading area.
- Activation of the washing process by photocell.
- Belt drive speed controlled by a frequency converter and a micro cut-off which, in the event of any kind of blockage, stops the machine without causing any damage to it. It has an unblocking feature that reverses the belt to help clear the jam.
- Autotimer: after a period of inactivity, the traction motor is deactivated, reducing power consumption.
- Power-saving mode (stand-by): Reduction of power consumption and limescale deposition on the heating element by reducing the temperature of the boiler and tank water when the machine is not in operation.
- Automatic pre-heating system. Activation of the washing pumps and the dryers prior to reaching the setpoint temperatures to heat the environment and thus achieve a quick start-up of the machine.
- Washing tanks:
 - 100-litre tank.
 - Washing system consisting of 6 upper arms and 5 lower arms.
- Stainless steel arms in the pre-wash and wash, removable for cleaning.
- Triple level filtration in the wash and pre-wash modules.
- The bottom of the tank is stamped to ensure complete draining and facilitate cleaning.
- Thermally insulated boilers.
- Easily removable stainless steel rinsing arms with high efficiency rinsing nozzles.
- Adjustable steam suction system that prevents vapours from escaping.
- Energy recovery included, located on the upper part of the machine, which allows the installed power to be reduced by 9kW.
- Drying (D) placed on the unloading area and possibility of adding up to 2 additional dryers (except in FCO-P3W4-RDD where only one can be added).
- Curtains resistant to high temperatures and detergents, which are installed to prevent water splashing and contamination between modules.
- Detection of belt end with stop and autostart.
- Machine protected against water jets according to IPX5 category.

Interface

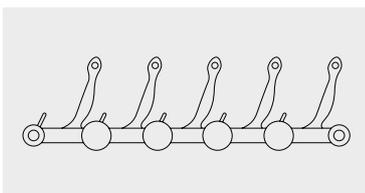

- Electromechanical switch that allows you to choose between 3 programmes depending on the workload or dirt.
- Two digital displays for the control and visualisation of washing and rinsing temperatures.
- Unlock push button to reverse the conveyor carriage to help clear the jam and another push button to activate it.

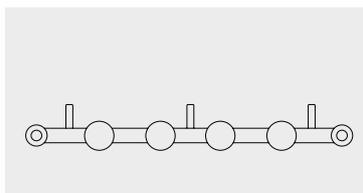

- The conveyor carriage locking and activation push buttons are also on the loading and unloading areas.
- Emergency push buttons at the entrance and exit included.
- Main switch included.

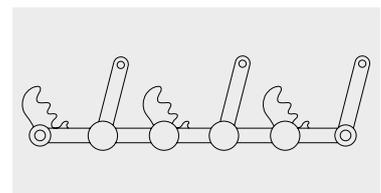

Available belts

Standard conveyor belt for plates
2 plates Ø 300 mm per row
Minimum detection height:
115mm

Conveyor belt for utensils (potsand containers)
Minimum detection height: 40mm

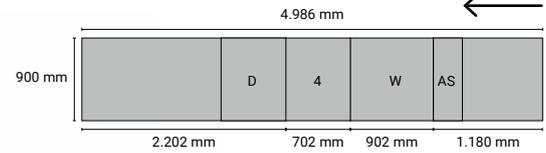

Conveyor belt for insulated trays
Minimum detection height:
115mm
GN 1/1 – max. 65mm

CONCEPT

Flight type diswashers FCO-W4-RD

FCO-W4-RD R

Specific features

- Electromechanical switch that allows you to choose between 3 programmes and two digital displays for the control and visualisation of washing and rinsing temperatures.
- Splash guard module (AS).
- Main wash (W).
- Prerinse / Rinse (4)
 - Pre-rinse: Consisting of 2 upper pre-rinse arms, 1 lower and 1 side arm.
 - Rinsing: With one rinse pump. Type A non-return device in compliance with EN 1717. Consisting of 1 upper and 1 lower rinse arm. It uses a frequency converter for the rinse pump, which allows to vary the amount of rinse water by automatically adapting it to the selected conveying speed.
- Energy Recovery as standard (R).
- One standard drier (D) for optimal drying of ceramic dishes. Possibility of adding two extra dryers for drying plastic or stainless steel kitchenware

CONCEPT

Flight type diswashers FCO-P3W4-RDD

FCO-P3W4-RDD R

Specific features

- Electromechanical switch that allows you to choose between 3 programmes and two digital displays for the control and visualisation of washing and rinsing temperatures.
- Splash guard module (AS).
- Pre-wash (P): Consisting of 6 upper arms and 5 lower arms. Continuous renewal of the pre-wash water with a constant amount of pre-rinse water, channelling the surplus through a recirculation pump.
- First wash, second wash and main wash (3W)
- Pre-rising / Rinsing (4)
 - Pre-rinse: Consisting of 3 upper pre-rinse arms, 1 lower and 2 side arm.
 - Rinsing: With one rinsing pump. Type A non-return device in compliance with EN 1717. Consisting of 1 upper and 1 lower rinsing arm. It uses a frequency converter for the rinse pump, which allows to vary the amount of rinse water by automatically adapting it to the selected conveying speed.
- Energy Recovery as standard (R).
- Two standard driers (D) for optimal drying of ceramic dishes. Possibility of adding one extra dryer for drying plastic or stainless steel kitchenware.

Carts and shelving

Check carts in the distribution and shelving section under static preparation.

COMMERCIAL REFRIGERATION

A commitment to a more sustainable world.

The iKOLD generation has been designed with the kitchen professional in mind. A renewed aesthetic, perfectly integrated with the Fagor Professional brand and our Catering equipment (cooking blocks, ovens, refrigeration, neutral furniture...) for professional kitchens.

An optimized refrigeration technology, reaching highest energy efficiency index with lowest energy consumption.

Cooling devices developed with Hydrocarbon (HC) gases with Global Warming Potential (GWP) = 3, in commitment to our sustainability values.

Designed with high efficiency electronic components which guarantees high cooling performance for optimal food preservation.

Complete range of product (storage cabinets and counters, preparation counters, blast chillers, bar coolers etc...) focused on food preparation, chilling and storing.

Thus, contemplating your needs and our experience as the first manufacturer of Commercial Refrigeration in Europe, the iKOLD generation was born.

Efficiency

Low impact and up to 65% lower consumption.

Performance

Durability and quality, guarantee of preservation for your food.

Versatility

Wide range of solutions for your kitchen.

Sustainability

Committed to environment Hydrocarbon gases (HC) in all product range.

Fagor
Konnect 

Discover in detail how FagorKonnect can specifically enhance the functionality of our refrigeration equipment.

Specific graphs designed for the analysis of refrigeration equipment:

To perform an analysis of refrigeration equipment focusing on specific aspects such as device status, compressor active hours, and door status, you could use intuitive and specific graphs that highlight the information.

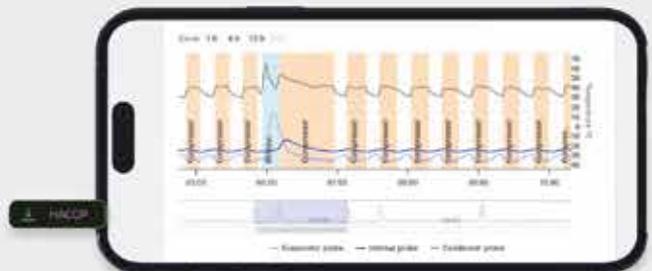

Detailed information displayed in real time:

It will show key data to monitor refrigeration equipment and perform actions such as setting parameters, switching the equipment and light on or off, or activating a defrost, optimising its performance.

View and download the HACCP of a particular device:

HACCP for a specific device is available. Obtains a graph over a range of selected dates.

Refrigeration upright features

Electronic control Easy to use

Functional and intuitive electronic control with capacitive keyboard that allows direct access to main functions.

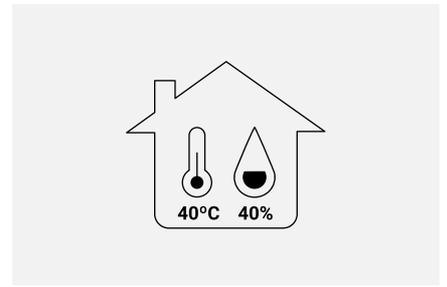

ECO function

Function that optimizes the performance by automatically setting temperatures, when doors are not opened so that the cooling unit works only when needed and always, efficiently.

Climatic Class 5

Devices tested in harshest working environments, which ensure product preservation in high temperature and humidity conditions.

Embedded tray guides

The embedded tray guides facilitate cleaning in the cabinets. They also increase storage flexibility, allowing it to be adapted to the user's needs.

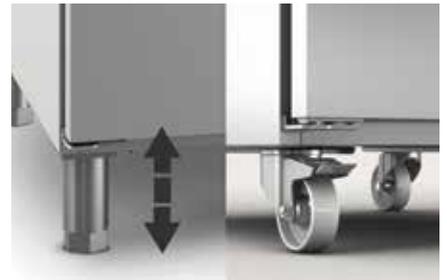

Led lighting on the inside

The low energy consumption LED lights, strategically located on the sides, provide optimal illumination of the entire compartment.

Maximum stability

Height-adjustable stainless steel legs as standard. Height of the legs can be adjusted individually. In addition, there is also the option to choose swivel wheels or legs for marine.

Automatic closing door

Hinged doors with automatic return for a perfect closing that minimize temperature gain. Doors have a 120° dwell position and close automatically at less than 90°.

Pivotable panel

Pivotable panel with better access to control that facilitates service, thus enlarging the useful life of the equipment.

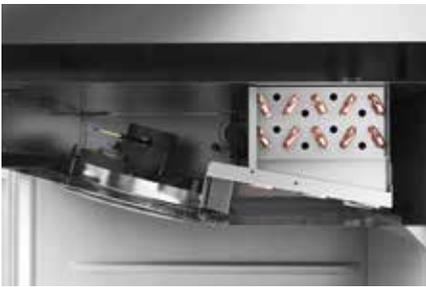

Door Lock

Option to equip the upright with a door lock in full door models. Standard in Advance line, as well as, all display upright.

Optimal refrigeration circuit

Internally designed forced draft cooling system with low consumption electronic components to guarantee optimal equipment efficiency and performance.

Accessible door opening

Opening pedal as an option in all cabinets range, allowing to access the interior in a comfortable way.

Connectivity

Guarantee the correct conservation of stored food through precise monitoring of your refrigeration equipment thanks to Fagor Konnect.

Multiflow

Optimal air circulation system that guarantees a balanced and constant distribution throughout the equipment, so that the temperature remains uniform. It helps preserve food for longer.

Removable door gasket

Removable triple camera pull-out/push-in magnetic door gasket to keep maximum hygiene and maintain the insulating properties.

Higher insulation thicknesses

Insulation thickness is a key factor in preventing losing cold. The new iKOLD generation increases the insulation levels of all mid ranges to provide greater cooling efficiency.

Integrated handles

Stainless steel doors with ergonomic, full-length, robust, perfectly integrated handle. that ensures practical opening of the drawers and avoids dust and dirt collection.

Option available in the ADVANCE range (K Connectivity).

GN 2/1 700

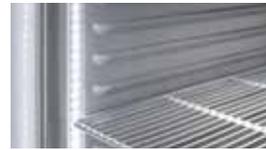

AUP-11G

CC5	80 mm
220-240V	TYPE F
GN 2/1	80-105 mm
HACCP	LED

General characteristics

- Interior and exterior completely built with AISI-304 stainless steel.
- Embedded inner guides with 24 different level position 55 mm distance among them, enable more convenient cleaning operations without difficulties.
- 10 HACCP alarms capacity which are store when high temperature variation and devices power failure.
- Optimal air circulation system that guarantees a balanced and constant distribution throughout the equipment, so that the temperature remains uniform. It helps preserve food for longer.
- Removable and height adjustable epoxy coated GN 2/1 grids with a maximum loading capacity of up to 40 kg.

Monoblock GN 2/1 700

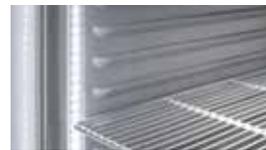

MUP-11G

CC4	
220-240V	
GN 2/1	
HACCP	

General characteristics

- Interior and exterior built-in with food grade stainless steel for intensive professional applications.
- Embedded inner guides with 23 different level position 55 mm distance among them, enable more convenient cleaning operations without difficulties.
- Internally designed monoblock cooling system. Top mounted evaporator ensure an easy maintenance of refrigeration unit, as well as an optimized use of storage compartment.
- Removable and height adjustable epoxy coated GN 2/1 grids with a maximum loading capacity of up to 40 kg.

GN 2/1 Display 700

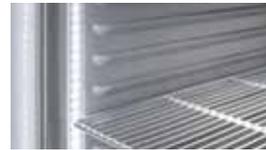

CUP-11G GD

- CC3
- 220-240V
- GN 2/1
- LED

General characteristics

- Interior and exterior built-in with food grade stainless steel for intensive professional applications.
- Embedded inner guides with 23 different level position 55 mm distance among them, enable more convenient cleaning operations without difficulties.
- Glass door:
 - Refrigeration: Double-glazed doors insulated with low thermal emissivity to reduce heat transfer in refrigeration.
 - Freezer and tropicalized uprights: Triple glazed door with electric heating system to avoid any kind of condensation in the doors.
- Removable and height adjustable epoxy coated GN 2/1 grids with a maximum loading capacity of up to 40 kg.

CONCEPT

GN 2/1 Display 1400

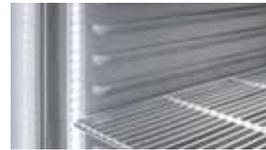

CUP-22G GD

General characteristics

- Interior and exterior built-in with food grade stainless steel for intensive professional applications.
- Embedded inner guides with 23 different level position 55 mm distance among them, enable more convenient cleaning operations without difficulties.
- Glass door:
 - Refrigeration: Double-glazed doors insulated with low thermal emissivity to reduce heat transfer in refrigeration.
 - Freezer and tropicalized uprights: Triple glazed door with electric heating system to avoid any kind of condensation in the doors.
- Removable and height adjustable epoxy coated GN 2/1 grids with a maximum loading capacity of up to 40 kg.

22G/M

23G/N

24G/N

General characteristics

- Interior and exterior built-in with food grade stainless steel for intensive professional applications.
- CUD-22G/M:
 - 60 mm insulation, embedded and inner guides independent modules with their respective refrigeration units and electronic controls.
 - Equipped with removable and height adjustable epoxy coated 3 x GN 2/1 grids with a maximum loading capacity of up to 40 kg.
- CUD-XXG/N:
 - 50 mm insulation, with zipper and removable guiding rails system.
 - Refrigeration compartment equipped with GN2/1 guides.
 - Freezer compartment equipped with 3 PVC 530X540 sanitary baskets.

Snack with Fish Compartment

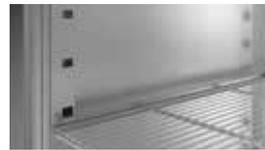

CUD-12S/F

- CC4**  50 mm
- 220-240V**  TYPE F
- 560x542
530x540**  130-200 mm
- LED** 

General characteristics

- Interior and exterior built-in with food grade stainless steel for intensive professional applications.
- Constructed with a rail system placed in the front and back of the upright with 18 grid level position and 70 mm distance among them.
- Refrigeration chamber equipped with 3x 560x542 grid per each full door and 1 per each half door.
- Fish compartment equipped with 3x PVC 530X540 sanitary baskets.

Interface

Characteristics

Electronic control Easy to use

Functional and intuitive electronic control with capacitive keyboard that allows direct access to main functions.

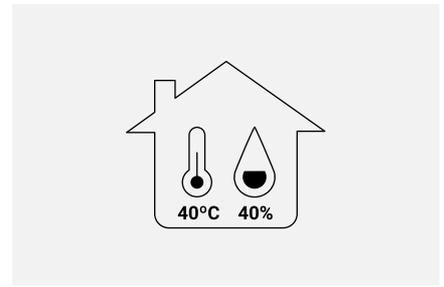

ECO function

Function that optimizes the performance by automatically setting temperatures, when doors are not opened so that the cooling unit works only when needed and always, efficiently.

Climatic Class 5

Devices tested in harshest working environments, which ensure product preservation in high temperature and humidity conditions.

Front breathing

The front condensation ventilation system allows the installation of equipment, without compromising performance, in such a way that it enables the correct preservation of food in the most demanding work areas.

Removable door gasket

Removable triple camera pull-out/push-in magnetic door gasket to keep maximum hygiene and maintain the insulating properties.

Integrated handles

Stainless steel doors with ergonomic, full-length, robust, perfectly integrated handle. that ensures practical opening of the drawers and avoids dust and dirt collection.

Guide and zippers system

Removable Stainless steel rack and guide system without use of tools which allows a proper distribution of products.

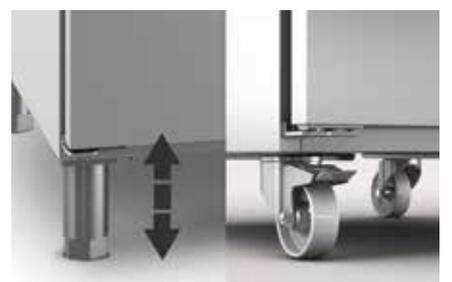

Telescopic sliding drawers

Stainless steel drawers with perforated bottom plates and telescopic sliding guides, capable of complete retraction, to economize working surface.

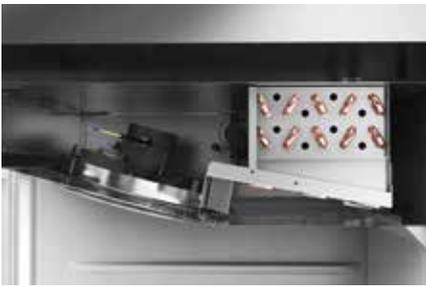

Maximum stability

Height-adjustable stainless steel legs as standard. Height of the legs can be adjusted individually. In addition, there is also the option to choose swivel wheels or legs for marine.

Optimal refrigeration circuit

Internally designed forced draft cooling system with low consumption electronic components to guarantee optimal equipment efficiency and performance.

Multiflow

Optimal air circulation system that guarantees a balanced and constant distribution throughout the equipment, so that the temperature remains uniform. It helps preserve food for longer.

Door Lock

Option to equip the refrigerated counters with a door lock. Standard feature in all display counters.

Automatic closing door

Hinged doors with automatic return for a perfect closing that minimize temperature gain. Doors have a 120° dwell position and close automatically at less than 90°.

Higher insulation thicknesses

Insulation thickness is a key factor in preventing losing cold. The new iKOLD generation increases the insulation levels of all mid ranges to provide greater cooling efficiency.

Pivotable panel

Pivotable panel with better access to control that facilitates service, thus enlarging the useful life of the equipment.

Connectivity

Guarantee the correct conservation of stored food through precise monitoring of your refrigeration equipment thanks to Fagor Konnect.

ADVANCE

700 GN 1/1

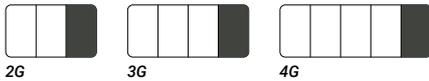

ACP-3G

CC5 **HACCP**

220-240V **TYPE F**

GN 1/1 **60 mm**

General characteristics

- Interior and exterior completely manufactured in AISI-304 stainless steel.
- 30 mm stainless steel built in and polyurethane insulated working top with 100 mm high splash-back, preventing spillage behind the counter.
- 10 HACCP alarms capacity wich are store when high temperature variation and devices power failure.
- Removable and height adjustable epoxy coated GN 1/1 grids with a maximum loading capacity of up to 40 kg.

700 GN 1/1 Display

ACP-3G GD

- CC5** HACCP
- 220-240V TYPE F
- GN 1/1 60 mm
- 130-200 mm

General characteristics

- Interior and exterior completely manufactured in AISI-304 stainless steel.
- 30 mm stainless steel built in and polyurethane insulated working top with 100 mm high splash-back, preventing spillage behind the counter.
- Double-glazed doors insulated with low thermal emissivity to reduce heat transfer with ergonomic handle.
- 10 HACCP alarms capacity which are store when high temperature variation and devices power failure.
- Removable and height adjustable epoxy coated GN 1/1 grids with a maximum loading capacity of up to 40 kg.

700 GN 1/1 Display

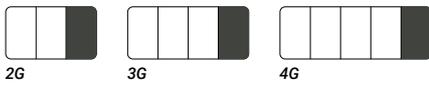

CCP-3G GD

General characteristics

- Interior and exterior built-in with food grade stainless steel for intensive professional applications.
- Heavy-duty stainless-steel working top with 100 mm high splash-back, preventing spillage behind the counter.
- Double-glazed doors insulated with low thermal emissivity to reduce heat transfer with ergonomic handle.
- Removable and height adjustable epoxy coated GN 1/1 grids with a maximum loading capacity of up to 40 kg.

CONCEPT

600 Snack remote

CCP-3S/R

General characteristics

- Interior and exterior built-in with food grade stainless steel for intensive professional applications.
- Heavy-duty stainless-steel working top with 100 mm high splash-back, preventing spillage behind the counter.
- Equipment without unit condenser, ready for remote cooling unit connection.
- Removable and height adjustable epoxy coated grids with a maximum loading capacity of up to 40 kg.
- Equipped with 1 grid 405x460 mm in each edge door and 1 grid 405x525 in centered doors and height adjustable 2 sets of tray slides per each full door.

Special units or any variations from the standard model must be assembled at the factory at an additional charge over the standard model's price.

Please, contact Fagor Professional for any other variation or option that is not included on this list.

Characteristics

Wide range

Complete range of refrigerated preparation counters, constructed in 700 and 800mm depth with diverse worktop configurations (Stainless Steel, Granit, Polypropilene etc...).

Multiflow

Optimal air circulation system that guarantees a balanced and constant distribution throughout the equipment, so that the temperature remains uniform. It helps preserve food for longer.

ECO function

Function that optimizes the performance by automatically setting temperatures, when doors are not opened so that the cooling unit works only when needed and always, efficiently.

Integrated handles

Stainless steel doors with ergonomic, full-length, robust, perfectly integrated handle that ensures practical opening of the drawers and avoids dust and dirt collection.

Removable door gasket

Removable triple camera pull-out/push-in magnetic door gasket to keep maximum hygiene and maintain the insulating properties.

Electronic control Easy to use

Functional and intuitive electronic control with capacitive keyboard that allows direct access to main functions.

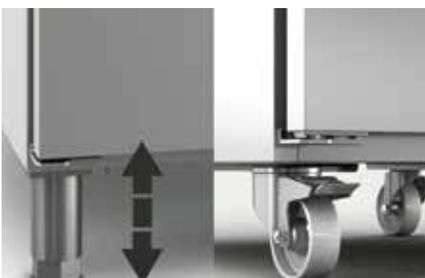

Telescopic sliding drawers

Stainless steel drawers with perforated bottom plates and telescopic sliding guides, capable of complete retraction, to economize working surface.

Maximum stability

Height-adjustable stainless steel legs as standard. Height of the legs can be adjusted individually. In addition, there is also the option to choose swivel wheels or legs for marine.

Guide and zippers system

Removable Stainless steel rack and guide system without use of tools which allows a proper distribution of products.

CONFIGURABLE PIZZA COUNTERS

700 GN 1/1

CC4	220-240V
TYPE F	GN 1/1
130-200 mm	

General characteristics

- Specially manufactured in high-quality stainless-steel for intensive professional applications, featuring a very robust design and perfect finishing. Ideal to be used as a pizza preparation station when combined with pizza ingredient cases.
- Heavy-duty 30 mm granite working top with side and rear splash-back of 160 mm high, preventing spillage behind the counter.
- Removable and height adjustable epoxy coated GN 1/1 grids with a maximum loading capacity of up to 40 kg.

SP-3G

SPT-3G

2G

3G

4G

CC4

220-240V

TYPE F

GN 150 mm

General characteristics

- Specially manufactured in high-quality stainless-steel for intensive professional applications, featuring a very robust design and perfect finishing. Ideal as a container ingredient for pizzas, salads, and sandwiches.
- Two versions available:
 - Exterior constructed with tempered glass and anodized aluminum profiles.
 - Stainless steel hinged lid with operating position at 90°C.
- Static cooling system. Cold is generated through a copper coil located on the bottom plate of the vitrine.

REFRIGERATED WORK STATION

700 GN 1/1 for Pizza

CPZ-3G

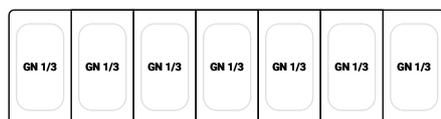

General characteristics

- Specially manufactured in high-quality stainless-steel for intensive professional applications, featuring a very robust design and perfect finishing. Ideal as a container ingredient for pizzas.
- Heavy-duty stainless-steel 50 mm working top with Built-in neutral unit designed to house 7 GN1/4 or GN1/3 containers in CPZ-2G and 9 in CPZ-3G with a maximum 100 mm depth (not included).
- Stainless steel hinged lid with opening position at 90°.
- Worktop ingredients bowls are refrigerated by the air circulation of the cooling unit. Location of evaporator in the middle beam and the correct isolation of the worktop ensures an uniform cold distribution.
- Removable and height adjustable epoxy coated GN 1/1 grids with a maximum loading capacity of up to 40 kg.

SALADETTE

Solid worktop saladettes

CC4	220-240V
TYPE F	GN 1/1

General characteristics

- Specially manufactured in high-quality stainless-steel for intensive professional applications.
- 30 mm CFC free polyurethane injected stainless Steel worktop without splashback.
- Stainless steel drawers with perforated bottom plates and telescopic sliding guides, capable of complete retraction, to economize working surface. Other drawer configurations are also available upon request.
- Static evaporator, foamed in CFC free high-density polyurethane with 40 mm thickness. Interior without fin evaporator and smooth surfaces make an easy to clean compartment.
- Forced air cooling system.
- Removable front panel with front breathing design allowing machine to be embedded without penalizing performance.
- Removable and height adjustable epoxy coated GN 1/1 grids with a maximum loading capacity of up to 40 kg.

—Concept Blast chillers	342
—Cook&Chill Blast chillers.....	343
—Roll-in Blast chillers	345

Blast chillers

Why use a blast chiller?

1. Hygiene and safety

All fresh organic food products contain a natural bacterial load which, in favourable ambient conditions (temperature and humidity), multiplies producing hazardous effects on consumer health.

Between +65°C and +3°C: in this temperature range, bacterial multiplication is accelerated exponentially.

Blast chilling means lowering the temperature of the product from +90°C to +3°C in less than 90 minutes. Passing through the critical temperature range between so fast where effects of harmful bacteria are disabled.

Blast chilling cooked product not only prevents bacterial proliferation but also prolongs product conservation time, avoiding loss of flavor and aroma.

The quality of the food is not affected, enlarging product storing time.

2. Work streamlining

Blast chillers allow a large quantity of product to be prepared and, once blast chilled, it can be consumed within a period of 5-7 day, while frozen product duration can extend to several months, maintaining organoleptic condition of the food.

The preservation of product quality, allows advance planning of kitchen work, improving raw ingredients purchase, as well as work load with advantages in terms of hygiene and menu variety.

3. Time savings

The advance preparation of foods and blast chilling of them allows kitchens to offer a more delicious and varied menu when required. The chef does not have to constantly oversee the process of preparing several dishes.

The simple operation of reheating the food allows a wide range of dishes to be served within a short period of time.

Blast chillers increase production capacity, thereby reducing staff costs and providing outstanding advantages in terms of profitability and time.

4. Quality

The rapid reduction in temperature makes it possible to conserve food moisture content and prevent normal bacterial proliferation.

Fast freezing encourages the formation of intercellular microcrystal, which maintain the compactability, flavour and freshness characteristics of foods over time.

Fagor Professional blast chillers are also exceptional at preserving fresh and raw foods, such as fish, crustaceans, vegetables, bread and partially-finished products such as fresh pasta and sauces.

5. Applications

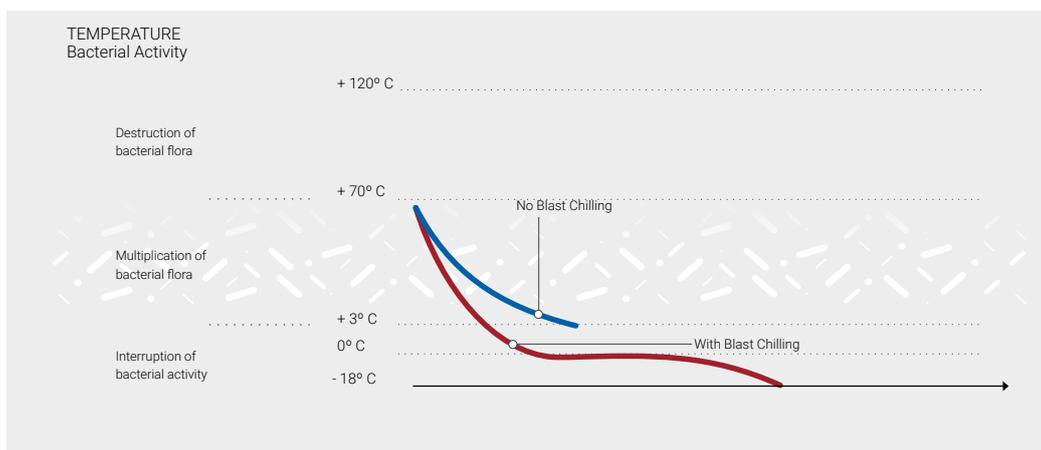

This kitchen work streamlining system is highly advantageous for all types of catering and especially for canteens, hospitals and restaurants, as well as for special occasions such as large banquets.

It also allows to all kind of restaurants and catering business to offer their well-presented dishes which are ready to eat.

6. Other advantages

Blast chillers optimize stock management by:

- Reductions in lost weight due to the natural evaporation of moisture from cooked food
- Planned food purchases, thereby improving kitchen stock organisation
- Organization of storage capacities and work load, adjusting capable personal attention
- Drastic reductions in waste and unused food

Blast chilling

SOFT CYCLE (STANDARD) - 90'

The right cycle for small size, light, fine food.

STRONG CYCLE (INTENSIVE) - 90'

Recommended for high density or large size food, as well as for packed food.

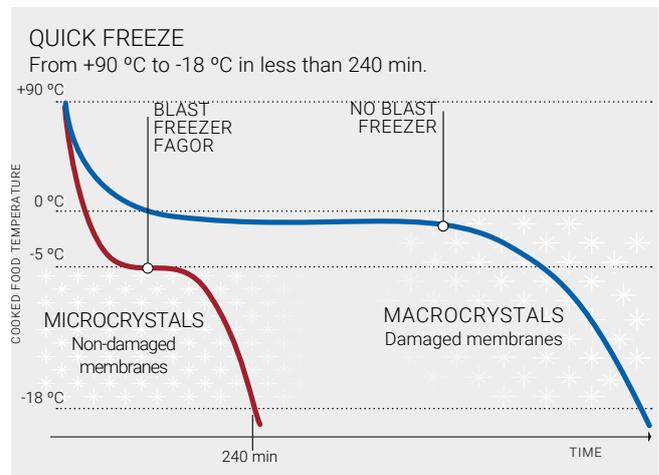

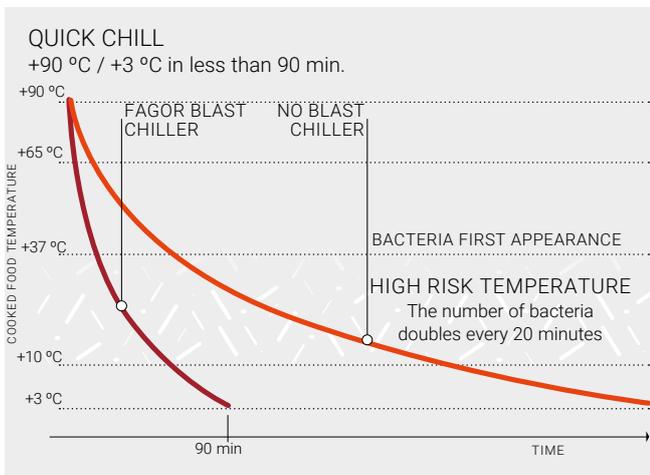

Blast freezing

SOFT CYCLE (STANDARD) - 240'

This is a cycle to freeze food with an even temperature and is therefore suitable for food that is to be cooled consistently and without sharp temperature changes or when cooked with different ingredients.

STRONG CYCLE (INTENSIVE) - 240'

This is the ideal cycle to freeze half cooked food or semi-prepared dishes. It allows you to keep frozen food for a long time.

Blast chillers

ABC-102

ABC-101 HC

ABC-051 HC

ABC-031 HC

General characteristics

- Intuitive 5" Screen touch electronic control placed in the door for more ergonomic use.
- Manual chilling process by time or probe control, both of them adjustable in each cycle as well as the evaporator fan ventilation adjustment in 5 different levels.
- 2 manual chilling modes:
 - Hard cycle: Default freezing cycle. Executes the cycle and maintains a constant temperature of -20°C.
 - Soft cycle: Default refrigeration cycle. Executes an initial cycle and maintains a constant temperature of 0°C.
- 96 preset chilling programmes by Fagor, divided in 8 food categories.
- Possibility to create a personalized cook book with up to 40 self made recipes.
- Additional cycles (Pre-Cooling, Continuous cycle, manual defrost, fish sanitization, ice cream hardening, Drying).
- Storing capacity for GN1/1 and EN 60x40 trays with 65 mm distance among them.

20 GN 1/1 Roll-in Blast Chillers

RBP-201

General characteristics

- Cold room structure made by CFC-free, high quality (40 kg/m³) polyurethane insulation panels. 70mm thickness for refrigeration models and 100 mm thickness in mixed cooling version.
- Intuitive 7" Screen touch electronic control placed in the door for more ergonomic use.
- Manual chilling process by time or probe control, both of them adjustable in each cycle.
- 2 manual chilling modes:
 - Hard cycle: Default freezing cycle. Executes the cycle and maintains a constant temperature of -20°C.
 - Soft cycle: Default refrigeration cycle. Executes an initial cycle and maintains a constant temperature of 0°C.
- Possibility to create a personalized cook book with up to 40 self made recipes.
- 2 Additional versions of cold rooms:
 - Pass-Through: Cold room could be feed from the front and back (C).
 - High Powered version with higher evaporator capacity to blast chill or freeze higher amount of product (H).
- Tropicalised cooling unit. Suitable to work at a room temperature up to 43 °C and 65 % humidity.
- Cooling chamber and unit condenser delivered separately.

Back bar counters

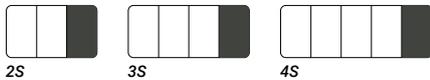

CBCP-3S

CBCP-3S GD

General characteristics

- Interior constructed with AISI-304 stainless steel, exterior in food grade stainless steel.
- Heavy-duty stainless-steel working top with 100 mm high splash-back, preventing spillage behind the counter.
- Removable and height adjustable epoxy coated grids with a maximum loading capacity of up to 40 kg.
- Double-glazed doors insulated with low thermal emissivity to reduce heat transfer with ergonomic handle (models with glass doors).

220-240V

TYPE F

General characteristics

- Interior constructed with thermoformed food grade ABS.
- Internally designed forced draft cooling system with the evaporator integrated in the back side of the upright guarantees optimal cold distribution, efficiency and performance.
- Optimal air circulation system that guarantees a balanced and constant distribution throughout the equipment, so that the temperature remains uniform. It helps preserve food for longer.
- 400 and 600 model equipped with 4 removable and height adjustable epoxy coated grids.
- 200 model equipped with 2 removable and height adjustable epoxy coated grids.

General characteristics

- Wine cellar specially designed to preserve, display and distribute wine.
- Interior and exterior built-in with coated stainless steel for intensive professional applications.
- Double glazed side and central walls with double-layered glass and air chamber filled with argon between them.
- Glasses and door frames heated to avoid condensations.
- Models available in two (2) colors: Black (BLA) and grey (GRE).
- For easy delivery, wine cellars are shipped in two sections: body and removable top section containing complete refrigeration unit.
- Decorative plinth included as a standard element. Shelves and hooks should be requested separately and are supplied disassembled.

Central wine cellars

FWC-2302-T2-C-LR-W-GRE TR

FWC-2302-T1-C-L-W-BLA TR

- CC5
- 220-240V
- LED

General characteristics

- Wine cellar specially designed to preserve, display and distribute wine.
- Interior and exterior built-in with coated stainless steel for intensive professional applications.
- Double glazed side and central walls with double-layered glass and air chamber filled with argon between them.
- Glasses and door frames heated to avoid condensations.
- Models available in two (2) colors: Black (BLA) and grey (GRE).
- For easy delivery, wine cellars are shipped in two sections: body and removable top section containing complete refrigeration unit.
- Decorative plinth included as a standard element. Shelves and hooks should be requested separately and are supplied disassembled.

Wine cellars

RWC-600

RWC-300

RWC-180

General characteristics

- Exterior constructed with black coated galvanized steel and interior with sanitary thermoformed plastic with embedded inner tray slides.
- Internally designed forced draft cooling system with low consumption electronic components to guarantee optimal equipment efficiency and performance.
- Double-glazed doors insulated with low thermal emissivity to reduce heat transfer in refrigeration and UV filter for sunlight.
- Equipped with wooden grids as standard.

CONCEPT

Dry agers

FMA-1650 S FMA-1650 FMA-900

CC3	220-240V
TYPE F	LED
UV	HACCP

General characteristics

- Interior compartment completely built with AISI-304 stainless steel.
- 10 HACCP alarms capacity which are store when high temperature variation and devices power failure.
- Double-glazed doors insulated with low thermal emissivity to reduce heat transfer in refrigeration.
- UV air sterilization lamp to prevent bacterial proliferation inside the compartment.
- Removable and height adjustable epoxy coated grids with a maximum loading capacity of up to 40 kg.

Fagor Meat Dry Ager, with a refrigeration circuit designed with its own technology, guarantees a homogeneous distribution of both temperature and interior humidity, essential to obtain maximum quality results in the maturation process, whose results have been verified by BCC Innovation, Basque Culinary Center technological center.

FAGOR 

Ice makers

— Solid ice-cube makers.....	375
— Dice-shaped ice-cube makers	377
— Granular ice makers	379
— Nugget ice makers	381
— Flake ice makers	381
— Hollow ice-cube makers	382
— Tanks for modular	383
— Accessories	384

Special units or any variations from the standard model must be assembled at the factory at an additional charge over the standard model's price.

Please, contact Fagor Professional for any other variation or option that is not included on this list.

The minimum recommended water quality is 15 to 40°F.

WITH BUILT-IN TANK

Solid ice-cube makers

General characteristics

- Produces solid gourmet crystal clear ice cubes.
- Spray system with flexible nozzles that avoid limescale deposits with small vibrations.
- Smart front ventilation system that allows built-in installation of the unit.
- Motor pump without seals, which avoids deterioration in hard water.
- Door opening movement with damping system to avoid accidents.
- On/off lighted rocker switch in front panel.
- Specially manufactured from high quality stainless steel for intensive professional applications, featuring a very robust design and perfect finish.
- The installation of an anti-scale filter is advised in areas with medium or high limescale content (hard water), over 30 °f of hardness.
- Equipment prepared for extreme ambient temperatures (43 °C).

MODULAR

Solid ice-cube makers

General characteristics

- Produces solid gourmet crystal clear ice cubes.
- Spray system with flexible nozzles that avoid limescale deposits with small vibrations.
- High efficiency machines with low electrical consumption.
- Stackable machines. Connection kit accessory required.
- Specially manufactured from high quality stainless steel for intensive professional applications, featuring a very robust design and perfect finish.
- The installation of an anti-scale filter is advised in areas with medium or high limescale content (hard water), over 30 °f of hardness.

WITH BUILT-IN TANK

Dice-shaped ice-cube makers

EFICE-50

General characteristics

- Produces full dice ice cubes or half dice ice cubes.
- Easy access for service and installation. All panels can be disassembled separately.
- Strong door opening system. Door made in stainless steel.
- Smart front ventilation system that allows built-in installation of the unit.
- On/off lighted rocker switch in front panel.
- Cleaning switch that allows circulation of water with descaling product without cooling.
- Electronic control that enhances the performance of the machine and allows it to adapt to extreme climates.
- Specially manufactured from high quality stainless steel for intensive professional applications, featuring a very robust design and perfect finish.
- Equipment prepared for extreme ambient temperatures (43 °C).
- Height adjustable legs from 105 mm to 155 mm.

WITH BUILT-IN TANK

Granular ice-cube makers

EGIM-85

General characteristics

- Granular ice production.
- High efficient evaporator, without gaskets or seals.
- Stainless steel auger with resilient coating to maximize lifespan.
- Powerful speed reducer on top.
- Easy access for service and installation. All panels can be disassembled separately.
- Strong door opening system. Door made in stainless steel.
- Smart front ventilation system that allows built-in installation of the unit.
- On/off lighted rocker switch in front panel.
- Cleaning switch: disconnects the cooling system while circulating water with descaling product.
- Specially manufactured from high quality stainless steel for intensive professional applications, featuring a very robust design and perfect finish.
- Equipment prepared for extreme ambient temperatures (43 °C).
- The installation of an anti-scale filter is advised in areas with medium or high limescale content (hard water), over 30 °f of hardness.
- Height adjustable legs from 105 mm to 155 mm.

Flake ice-cube makers

FLAKE-1000

General characteristics

- Cold and dry flat flakes production. Flake thickness may be adjusted between 1.5 mm and 3 mm.
- Based on a static cylinder which is free from swivel joints (helical reamer) coupled with a milling tool that detaches the ice without any strained or forced movements.
- High evaporator efficiency. Lower energy consumption and higher ice production.
- Powerful speed reducer on top.
- Magnetic drive pump.
- Electronic stop system.
- Controllers to detect: low water level, temperature rise due to motor overload or full vat.
- Specially manufactured from high quality stainless steel for intensive professional applications.

WITH BUILT-IN TANK

Hollow ice-cube makers

EFIM-60 C

General characteristics

- Produces a semi-hollow cube with a greater surface that cools faster the drink.
- Paddle system to produce ice in the most adverse conditions of water quality (hardwater) and in the least adequate sites.
- Paddle system that makes water filters unnecessary, avoiding their costs.
- Water movement thanks to paddles grants that the purest water touches the evaporator and get frozen, obtaining the clearest ice cube.
- Designed without thermostat, avoiding problems & getting all ice is possible.
- Without timer. Detection of end of cycle and full bin are detected through mechanical devices.
- Door-opening movement dampening system to avoid accidents.
- On/off lighted rocker switch in front panel.
- Specially manufactured from high quality stainless steel for intensive professional applications, featuring a very robust design and perfect finish.
- Equipment prepared for extreme ambient temperatures (43 °C).

Tanks for modular ice-cube makers

S-160

S-CART 300

General characteristics

- Specially manufactured from high quality stainless steel for intensive professional applications, featuring a very robust design and perfect finish.
- Very hard sanitary polyethylene vat, resistant to blows, and scratches.
- Seamless one-piece vat with rounded corners, avoiding possible dirty points and facilitating cleaning.
- Drainage system that collects and drives the water to the drain keeping the bin clean and dry.

Specific features: Tanks with trolley

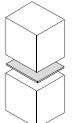

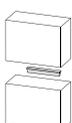

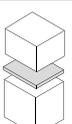

- Ergonomic, easy to move with little effort.
- It has a braking and drainage system.
- Made of sanitary polyethylene, with smooth surface to facilitate cleaning.
- Includes a cover to prevent dirt from contaminating the ice.
- Buckets for distributing ice quickly and effortlessly can be included.

Refrigerated elements

General characteristics

- Manufactured in stainless steel with satin finish.
- Wells with rounded corners inside to make cleaning operations easier, ensuring maximum hygiene.
- Polyurethane insulation with ecological injection, allowing energy savings by reducing loss of cold air.
- Control panel with digital thermostat, protected by the structure perimeter, avoiding hindrances in their daily use.
- Robust structure with 13 mm thick overlap, once element is dropped-in on the worktop, ensuring cleanness and aesthetics.
- Automatic evaporation system of defrost water as an accessory.
- 220-240V 1N~.

STATIC PLATES AND WELLS

- Specially designed to hold, display and serve chilled food (e.g. fruits, salads, etc.) and beverages (e.g. bottles or tall cans, etc.) keeping displayed product at optimum temperatures during service time.
- Fresh product showcase well with glass dome specially designed to hold the temperature and display fresh products (e.g. meat, fish, shellfish, etc.) so that these are selected by a guest and prepared by a chef in show-cooking stations.
- Static refrigeration system by expanded copper coil located in its base and also on the sides of the 160mm depth well to improve performance.
- Working temperatures: -10°C/ +5°C (160 mm well: 0°C/ +8°C).

VENTILATED WELL

- Specially designed to hold, display and serve chilled food (e.g. fruits, desserts, yogurts, cold appetizers, presented on plates, ramekins or GN1/1-100mm etc.) keeping displayed product at optimum temperatures during service time.
- Air-blown cooling system generated by the evaporator fans, creating a gentle air curtain over the upper part of the well. Faster cool-down times, better air distribution and optimum results for food conservation are achieved.
- Automatic defrost system that minimizes compressor workload and saves energy.
- Working temperatures: 0°C/ +4°C.

WELL FOR FROZEN PRODUCTS

- Specially designed to hold, display and serve frozen foods, particularly ice cream (packaged or in bulk), keeping displayed products at optimum temperatures during service time.
- These models are not designed to keep the frozen products for a period of time beyond a standard meal service (maximum duration of 3 to 4 hours).
- Working temperatures: -20°C/ -14°C.

Hot elements

General characteristics

- Manufactured in stainless steel with satin finish.
- Wells with rounded corners inside to make cleaning operations easier, ensuring maximum hygiene.
- Control panel with digital thermostat, protected by the structure perimeter, avoiding hindrances in their daily use.
- Robust structure with 13 mm thick overlap, once element is dropped-in on the worktop, ensuring cleanness and aesthetics.
- Foodshields with light and heat available as an accessory to improve temperature maintenance and increase conservation time on the surface of the food.
- 220-240V 1N~ 50/60Hz.

HOT PLATE

- Specially designed to hold, display and serve hot food presented on plates or shallow GN 1/1 pans (e.g. hot appetizers, sandwiches, pies, pizza, etc.) keeping displayed product at optimum temperatures during service time.
- Heating system by hidden silicon heaters attached to the bottom of the plate.
- Working temperatures: +30°C/ +100°C.

Glass ceramic plate

- 4 mm thickness, high-resistant, glass ceramic.

BAIN MARIE WELL

- Suitable for GN 1/1 pans or subdivisions with a maximum depth of 150 mm.

Dry static bain marie well

- Specially designed to hold, display and serve liquid or gravy warm food (e.g. soup, broth, stew, gravy, etc.) keeping displayed product at optimum temperatures during service time.
- Heating system by a set of heaters at the bottom of the tank.
- Working temperatures: +30°C/ +100°C.

Wet bain marie well

- Specially designed to hold, display and serve warm food presented on deep GN pans (e.g. soup, stew, pasta, rice, sauces, meat, fish etc.) keeping displayed product at optimum temperatures during service time.
- Heating system with hidden silicon heaters attached to the bottom of the well. Wet bain-marie system guarantees the best uniformity in heat distribution over the surface of the GN pans.

- Automatic filling: if water falls below a certain level, then sensor automatically activates electro-valve to fill the well.
- Manual filling: Filling of the well by means of a 1/2" valve.
- CMMMA6-1: Manual water supply with buckets, without tap.
- Working temperatures: +30°C/ +90°C.

CARVING STATION

- Specially designed to hold, display, carve and serve warm food (e.g. roast beef, ham, turkey breast, etc.) in show-cooking stations, keeping displayed product at optimum temperatures during service time.
- Heat sources in the lower (base with water bain marie) and upper part (lamp with ceramic Heat) of the carving station.
- Stainless steel, easy to clean, perforated base to place the product.
- Automatic filling: if water falls below a certain level, then sensor automatically activates electro-valve to fill the well.
- Manual filling: Filling of the well by means of a 1/2" valve.
- Working temperatures: +30°C/ +90°C.

SOUP WELL

- Specially designed to hold, display and serve liquid or gravy warm food (e.g. soup, broth, stew, gravy, etc.) keeping product at optimum temperatures during service time.
- Dry bain-marie heating system by circular heater surrounding the well. No drain required.
- Adjustment of heating power by an energy regulator.

Foodshields

General characteristics

- Specially designed to improve food hygiene during service thanks to its anti-breath function.
- Manufactured in stainless steel with a solid and robust structure, in round tube of Ø 51 mm or rectangular 60 x 30 mm.

- Brackets are easily mounted on the structure by means of threaded plates.

Neutral panels, with lighting and heating.

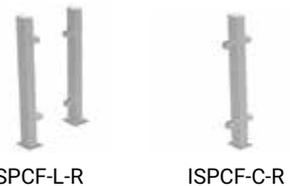

- Neutral panels with tubular support.
- Lighting and heating panels with tubular support and a horizontal panel positioned at a 35 mm distance to facilitate cleaning operations.
- Include clamps for easy fixing of ICC-type glass panels, both curved and straight, single- or double-sided.
- Foodshields with light: high-luminosity LED lighting. To be installed over neutral or refrigerated technical elements.

- Foodshields with halogen heat: lighting and heat by protected halogen lamps, integrated side to side.
- Foodshields with ceramic heat: light and heat generated by protected halogen lamps and alternating ceramic elements. Ceramic elements provide a more intense and concentrated heat.
- ICC glass panels are not included and must be ordered separately.

Cubic refrigerated vitrines

General characteristics

- Specially designed to hold, display and serve chilled food (e.g. fruits, desserts, yogurts, cold appetizers, presented on plates/ramekins, etc.) and beverages (bottles, cans) keeping displayed product at optimum temperatures during extended service times, up to 24-hour operations.
- Manufactured in stainless steel with satin finish.
- Polyurethane insulation with ecological injection, allowing energy savings by reducing loss of cold air.
- Electronic thermostat, with digital display, to control and regulate the temperature on the ventilated well at the desired set point and turn on the lighting of the display.
- Automatic defrost system that minimizes compressor workload and saves energy.
- LED light strip integrated on the display top.
- 220-240V 1N~.

CUBIC REFRIGERATED VITRINES WITH VENTILATED WELL

- Ventilated refrigerated well with height-adjustable base to display pans with different heights. Flat display level and drainage area slightly bent.
- Ventilated refrigeration system with high-performance electronic fans and large area evaporators.
- Robust structure with 13 mm thick overlap, once element is dropped-in on the worktop, ensuring cleanness and aesthetics.
- Evaporation tray, with Intelligent evaporation system of defrost water, as accessory.
- Easily removable and height adjustable tempered glass shelves.
- Textile curtain: previously refrigerated food is kept chilled for a limited duration of 3-4 hours when the display is open on the customer side.
- Front clapets: clapets in plastic to access the food on each shelf.
- Closed: tempered front glass window, firmly fixed by using anodized aluminum clamps which allows the glass to be folded for cleaning.
- Control panel with digital thermostat, protected by the structure perimeter, avoiding hindrances in their daily use.
- Climate class: 3M2 in models with textile curtain (CT) and 3M1 in models with Clapets (CP) and closed (CL).
- Working temperatures: +4°C/ +10°C.

INDEPENDENT CUBIC REFRIGERATED VITRINES

- Ventilated refrigeration system with high-performance electronic fans and large area evaporators.
- Evaporation tray, with Intelligent evaporation system of defrost water, as standard accessory.
- Sliding doors on the service side of the vitrine, to make easier product loading/replacement operations.
- Plastic front clapets to access the food on each shelf.
- Stainless steel shelves, without possibility of height adjustment.
- DDRVCO models: open base, which can be installed on any static refrigerated plate/well by means of supplied fittings.

- DDRVCC models: isolated flat base, to be installed as an independent element on any flat surface.
- Climate class: 3M1.
- Working temperatures: +2°C/ +10°C.

Cubic hot vitrines

General characteristics

- Specially designed to hold, display and serve hot food presented on plates or shallow GN 1/1 pans (e.g. hot appetizers, sandwiches, pies, pizza, etc.) keeping displayed product at optimum temperatures during service time.
- Structure manufactured in stainless steel with satin finish.
- 4mm thickness, very durable glass ceramic shelf and plate.
- Heating system by hidden silicon heaters attached to the bottom of the glass ceramic plate and shelf.
- Foodshields with light and heat by protected halogen lamps located over the glass ceramic plate and shelf (except in models with customer side closed).
- Two (2) or three (3) electronic thermostats, with digital display, to control and regulate the temperature on the glass ceramic plate and on the shelf(ves) separately, at the desired set point.
- Sliding doors on the service side of the display, to make easier product loading/replacement operations.
- Closed service side: tempered front glass window, firmly fixed by using anodized aluminum clamps which allows the glass to be folded for cleaning.
- Robust structure with 13 mm thick overlap, once element is dropped-in on the worktop, ensuring cleanness and aesthetics.
- Working temperatures: +30°C/ +100°C in models with customer side opened and +30°C/+80°C in models with customer side closed.

Reserves

General characteristics

- Specifically designed to be installed under a worktop in order to hold chilled or hot products.
- Manufactured in stainless steel with a solid and robust structure.
- Cold reserves:
 - With hinged doors or drawers, to house containers or grills GN 1/1.
 - Forced draft evaporator and removable pull-out/push-in magnetic door gasket, to keep maximum hygiene.
 - Automatic evaporation system of defrost water as an accessory.
- Working temperatures: +0°C/ +6°C.
- Hot reserves:
 - Double-wall sliding doors and forced air heating system.
 - Working temperatures: +30°C/ +90°C.
- Electronic thermostat, with digital display, to control and regulate the temperature at the desired set point.
- 220-240V 1N~ 50/60Hz.

Dispensers

General characteristics

- Specially designed to store and serve neutral and hot plates and ware-washing baskets.
- Made of stainless steel.
- Special system with steel springs, keeping the plates at a constant level for easy service.
- Easy to place and remove.

Dispensers

General characteristics

- Dispensers specially designed to store and distribute serving trays, cutlery pieces, bread rolls and / or glasses.
- Manufactured with a sturdy, high-quality, stainless steel structure.
- Dispensers over a base.
- 400 mm height, 1,5 mm thickness stainless steel worktop in satin finish.
- Front panels in water-resistant medium density fibreboard (MDF).
- Facade decoration with laminated panels to be chosen from 16 basic colors. Four (4) decorated sides.
- Decoration facade at 150 mm from the ground.

Neutral Elements

General characteristics

- Manufactured with a sturdy, high-quality, stainless steel structure.
- 900 mm height, 1,5 mm thickness stainless steel worktop in satin finish.
- 800 mm height tray slider. Made up of three (3) Ø 30 mm stainless steel round tubes.
- Food grade, waterproof, elastic, silicone joint placed between the worktops to ensure a precise adjustment.
- Facade decoration with laminated panels to be chosen from 16 basic colors.
- Front panels in water-resistant medium density fibreboard (MDF).
- Decoration facade at 150 mm from the ground.
- Plinths, end of line decoration or any other accessories should be requested separately and are supplied disassembled.

Refrigerated Elements

General characteristics

- Refrigerated elements specially designed to hold, display and serve chilled food during service time
- Counter framework manufactured with a sturdy, high-quality, full stainless steel structure.
- 900 mm height, 1,5 mm thickness stainless steel worktop in satin finish.
- 800 mm height tray slider. Made up of three (3) Ø 30 mm stainless steel round tubes.
- Food grade, waterproof, elastic, silicone joint placed between the worktops to ensure a precise adjustment.
- Front panels in water-resistant medium density fibreboard (MDF).
- Facade decoration with laminated panels to be chosen from 16 basic colors.
- Decoration facade at 150 mm from the ground.
- Static well cooling system by expanded copper coil located on its base.
- Ventilated well cooling system creates a constant flow of chilled air, coming from the evaporator module fans.
- Polyurethane insulation with ecological injection, CFC-free, with high-density (40 kg/m³).
- Electronic thermostat with digital display.
- Electrical components in a single, easy-access point to enable maintenance operations.
- Junction box housing electrical connections providing a centralized access of all technical powered elements.
- Plinths or any other accessories should be requested separately and are supplied disassembled.

3-level cubic refrigerated ventilated vitrines

General characteristics

- Refrigerated displays specially designed to hold, display and serve chilled food and beverages during service time.
- Counter framework manufactured with a sturdy, high-quality, full stainless steel structure.
- 900 mm height, 1,5 mm thickness stainless steel worktop in satin finish.
- 800 mm height tray slider. Made up of three (3) Ø 30 mm stainless steel round tubes.
- Food grade, waterproof, elastic, silicone joint placed between the worktops to ensure a precise adjustment.
- Front panels in water-resistant medium density fibreboard (MDF).
- Facade decoration with laminated panels to be chosen from 16 basic colors.
- Decoration facade at 150 mm from the ground.
- Ventilated display cooling system creates a constant flow of chilled air at the back side of the display coming from the evaporator module fans.
- Polyurethane insulation with ecological injection, CFC-free, with high-density (40 kg/m³).
- 8 mm thickness tempered glass shelves.
- Back display doors allowing an easy product access.
- Electronic thermostat with digital display.
- Electrical components in a single, easy-access point to enable maintenance operations.
- Junction box housing electrical connections providing a centralized access of all technical powered elements.
- Plinths or any other accessories should be requested separately and are supplied disassembled.

Cubic hot vitrines

General characteristics

- Hot displays specially designed to hold, display and serve hot food during service time
- Counter framework manufactured with a sturdy, high-quality, full stainless steel structure.
- 900 mm height, 1,5 mm thickness stainless steel worktop in satin finish.
- 800 mm height tray slider. Made up of three (3) Ø 30 mm stainless steel round tubes.
- Food grade, waterproof, elastic, silicone joint placed between the worktops to ensure a precise adjustment.
- Front panels in water-resistant medium density fibreboard (MDF).
- Facade decoration with laminated panels to be chosen from 16 basic colors.
- Decoration facade at 150 mm from the ground.
- Hot display heating system by hidden silicon resistors attached to the bottom of the glass ceramic plate and shelves.
- Foodshields with light and heat by protected halogen lamps located over the glass ceramic plate and shelves.
- Three (3) electronic thermostats, with digital display, to control and regulate the temperature on the glass ceramic plate and on the shelves separately, at the desired set point.
- Electrical components in a single, easy-access point to enable maintenance operations.
- Junction box housing electrical connections providing a centralized access of all technical powered elements.
- Plinths or any other accessories should be requested separately and are supplied disassembled.

Foodshield with shelf and protection frontal glass

General characteristics

- Foodshields specially designed to improve food hygiene as well as to guarantee guest protection.
- Stainless steel shelf.
- Brackets manufactured in stainless steel, in rectangular tube.
- 35 mm distance between bracket and foodshield to make cleaning operations easier.
- Brackets are easily mounted on the structure by means of threaded plates.
- Easy installation of glasses to foodshields by means of clamps.

Plastic trolleys

- Manufactured in food-grade polyethylene resistant to wear, non-marking and easy to wash.
- Thick side and rear walls, effectively protecting the plates during movement.
- Removable column divider, easy-to-adjust without the need for tooling. Storage of plates of different diameters (from 180 to 320 mm).
- Six (6) separating dividers for different organization of plates. From 45 to 60 plates in each column. 180-480 plate capacity.
- Translucent protective cover that protects the dishes stored.
- Storage, transport and unloading of dishes in a fast and ergonomic way.
- Quick access to the plate columns with both hands.
- Four (4) sound-proof castors, two (2) with brake.
- Black color.

Hot trolleys with humidity control

General characteristics

- All parts of the trolley have been carefully analysed and tested to offer maximum temperature performance in the interior, bearing in mind the following most important requirements: ease of use, minimum maintenance and facilitation of cleaning tasks.
- Modern and intuitive electronic control panels.
- Double walled sides and door, insulated with high density polyurethane, giving great robustness and firmness.
- Recessed monoblock guides with wide radius, guaranteeing maximum hygiene.
- Efficient heat production system composed of heating element and fan.
- Recessed water reservoir with rounded corners. The heat is produced by a high-performance silicon heating element.
- 4-level humidity regulation system to adapt to the different products kept inside. The humidity system can also be fully switched off, reducing energy consumption.
- The 270° opening door offers users maximum freedom of movements and safety during daily use, increasing comfort and well-being during work operations.
- The inner door panel is completely smooth and free from any elements that might prevent thorough cleaning.
- No heat loss. Door seal fixed to the frame of the structure. Can be replaced easily without the need for tools.
- The whole perimeter is protected by a bumper, manufactured in resistant, non-marking material.
- Pivoting wheels, 2 with brakes.
- Manufactured completely in AISI-304 stainless steel.
- Heat system designed to reach the operational temperature in a very short space of time.
- Electronic membrane keypad and digital display.
- Ergonomic latch with lock.
- Modern, elegant and very robust design.
- Operational temperature 30 °C to 90 °C.
- Storage of GN 2/1 y GN 1/1 trays with depth of up to 65 mm.
- Shelves and Gastronorm pans are not included.

Hot trolleys for distribution

General characteristics

- Hot trolley specially designed to maintain temperature, transport and serve previously prepared hot food.
- Food service can be carried out by placing food on trays or plates using wire shelves, or in Gastronorm containers.
- Trolleys made of stainless steel.
- Double wall with injected ecological polyurethane insulation, CFC-free, with a density of 40 kg/m³. This insulation reduces heat loss and provides significant energy savings.
- Heating by electric resistances and forced air circulation.
- Control thermostat from 0 °C to 90 °C.
- Hinges equipped with an automatic closing

mechanism; when the door is positioned at an angle of less than 90°, it closes completely, preventing temperature loss and saving energy.

- Lock with keys.
- Wire shelves and Gastronorm containers not included.
- Voltage and frequency: 220–240 V 1N 50/60 Hz.

ICCB MODELS

- ICCB-6 model: Distance between guides 70 mm.
- ICCB-6-3 model: 3 drawers with GN 1/1 – 65 mm capacity.

- Equipped with 4 soundless swivel castors, Ø 75 mm, 2 with brake.

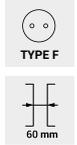

CCF MODELS

- Distance between guides 60 mm.
- Equipped with 4 soundless swivel castors, Ø 160 mm, 2 with brake, with special non-marking rubber bumper around the entire base of the trolley.
- Horizontal handles on each side for optimal movement.
- Includes a tank with anti-wave system, where water is placed to generate humidity.

Refrigerated trolleys for distribution

ECFF-20 HC

ECFF-40 HC

General characteristics

- Carts designed to complement or replace the cold room. Ideal for holding and serving previously prepared cold meals.
- Operating temperature from +2 °C to +8 °C (climatic class 4).
- Temperature control and defrost cycle managed by an electronic controller with digital display.
- Double-wall cabinets with injected ecological polyurethane insulation, CFC-free, with a density of 40 kg/m³.
- Fully manufactured in stainless steel.
- 60 mm spacing between guides.
- Hinges equipped with an automatic closing mechanism. When the door is positioned at an angle of less than 90°, it closes completely, preventing cold loss.
- Lock with key.
- Equipped with 4 soundproof swivel castors Ø 125 mm, 2 of them with brakes, with rubber bumpers on each corner.
- Voltage: 220–240V 1N.

Sinks

- Worktop made from AISI-304 18/10 stainless steel with satin finish, 1 mm thickness and overflow rim.
- Worktop with backsplash of 100 x 15 mm

thick, 50 mm front edge with welded corners.

- Single-pressed, sound-proof bowl.
- Drain valve and overflow pipe for each bowl.

- Sorting hole to throw waste into. A waste bin (not included) could be placed under the counter.

Sinks with legs

- Designed to add a lower shelf (accessory).
- Frame entirely built in stainless steel to ensure maximum durability.
- Square section stainless steel legs

40x40 mm.

- Rear legs set back 40 mm for floors with sanitary radius.
- 850 mm height with stainless steel height-

adjustable feet (-10 mm / + 50 mm).

- **Supplied disassembled.**
- **Option shipped assembled.**

600 mm height elements

TM6W-612

 Option customization in length

TM6WHD-68

See options

- Worktop made from AISI-304 18/10 stainless steel with satin finish.
- Backsplash of 100 x 15 mm and 50 mm front edge with welded corners.
- Modular element with closed structure made from stainless steel, fully integrable with the rest of 600 mm-height neutral elements, through a common or independent worktop.

- Lower base reinforced with profile to guarantee greater robustness.
- Designed to support cooking appliances and place the working height at 850-900 mm. With stainless steel height-adjustable feet (-10 mm / + 50 mm).
- **Supplied assembled.**
- **Option door lock (Elements with swing doors).**

Corner elements

TM90W-6 R

See options

- Worktop made from AISI-304 18/10 stainless steel with satin finish.
- Backsplash of 100 x 15 mm and 50 mm front edge with welded corners.
- Modular element with closed structure made from stainless steel, fully integrable with the rest of neutral and hot elements, through an independent worktop.
- Designed to optimize the space in the corners while maintaining a homogeneous line next to neutral and hot elements.

- Lower base reinforced with profile to guarantee greater robustness.
- 850 mm height elements with stainless steel height-adjustable feet (-10 mm / + 50 mm).
- **Supplied assembled.**
- **Option door lock.**

Closed corner elements

- Specially designed with a coupling module for one (1) swing door to facilitate the connection to another worktop.

- Requires worktop with 500 mm overhang on coupling module.
- Straight corners.

- Worktop made from AISI-304 18/10 stainless steel with satin finish.
- Backsplash of 100 x 15 mm and 50 mm front edge with welded corners.
- Element with closed structure made from stainless steel.
- 850 mm height elements with stainless steel height-adjustable feet (-10 mm / + 50 mm).

- Designed for the classification and collection of waste.
- Ø195 mm holes for placing rubber rings.
- Rubber ring (not included) to throw waste. A waste bin (not included) with maximum diameter of 360 mm could be placed under the counter.
- **Supplied assembled.**

Element with ice well, sink and refrigerated reserve

- Worktop made from AISI-304 18/10 stainless steel with satin finish.
- Well with thermal insulation and built-in drain.
- 275x250x150 mm sink with built-in drain.
- Single lever mixer faucet included.
- Backsplash of 100 x 15 mm, 50 mm front edge with welded corners.
- Rear legs set back 40 mm for floors with sanitary radius.
- Refrigerated reserve with drawers at the bottom, designed to store bottles.
- Stainless steel removable refrigerated drawers, with telescopic sliding guides and self-closing system.
- Rod modular system allowing an optimal organization of bottles in drawers.
- High-density (40 kg/m³), CFC-free, ecological polyurethane insulation.
- Removable pull-out/push-in magnetic gasket to keep maximum hygiene and maintain the insulating properties.
- Easy-to-extract condensing unit included.
- Evaporation system of defrost water with evaporation pan.
- Electrical components in a single, easy-to-access point to enable maintenance operations.
- Stainless steel ventilation grills on the customer side.
- Forced draft evaporator.
- Electronic thermostat, with digital display, to control and regulate the temperature of the refrigerated reserve.
- Working temperature (in climate Class IV conditions): from +0 °C to +4 °C
- **Supplied assembled.**

Polyethylene shelves

- Shelving with structure in anodized aluminum and polyethylene food-grade grid mats specially designed to be used in cold rooms.
- Polyethylene shelf plates are supported on two edges of the aluminum upright, for a perfect placement and greater solidity.

- Width options in shelf plates: 400, 500 and 600 mm.
- Standard height of uprights is 1.750 mm. 2.000 are also available for non-standard applications.

External dimensions of independent shelving units, including an upright on each side.

The 11 different lengths of the shelves allow, in addition to independent mounting with 2 uprights, multiple combinations by placing shelves on both sides of the uprights. See set tables.

Aluminum and polyethylene shelves

- Food-grade aluminum and polyethylene shelf specially designed to be used in cold rooms, in accordance with sanitary requirements.
- Supported on the aluminum upright by two edges,
- Grid mats and crossbars included.
- Easily removable. Can be washed in a conventional dishwasher.
- for a perfect placement and greater solidity.

Shelving sets calculation

How to order shelving sets

For your convenience, aluminum and polyethylene shelving can be ordered in sets. Below is an indication on how to calculate the required shelving set:

Is it a linear or corner shaped shelving unit?

- Linear shelving have uprights at each end.
- Corner shelving units have a upright at one end and, at the other end, they are supplied with two hooks per shelf, to be supported by the crossbars of another shelving unit.

What is the width of the shelving unit?

- There are two depth measurements: 400 or 500 mm.

How many levels are required?

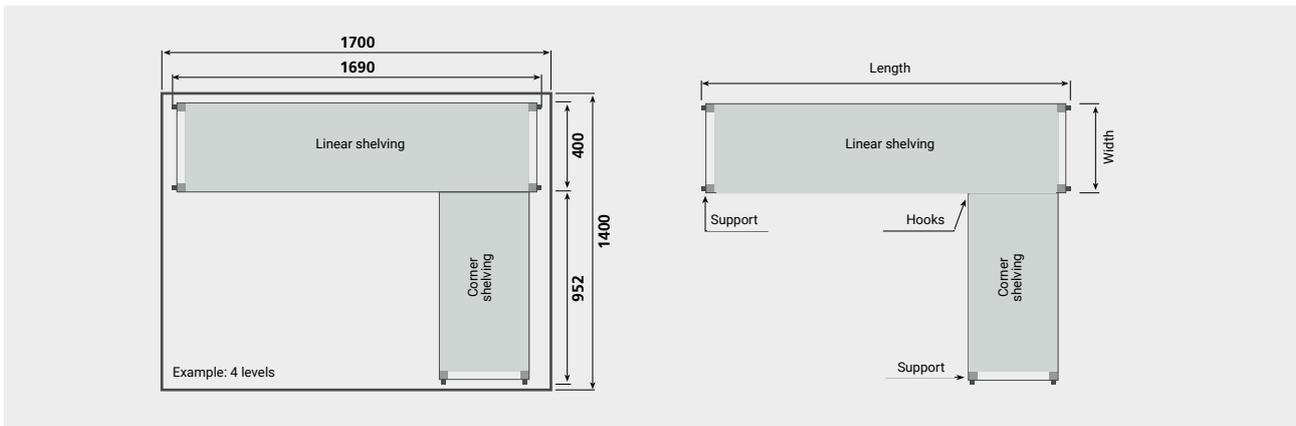

- There are standard sets with 3, 4 or 5 levels.
- Additional levels can be ordered.

What will be the length of the shelving unit?

- In the tables on the following pages you should find the correct set for the measurements of the room where the shelving is to be placed.
- When calculating the length of the corner shelving unit, remember to subtract from the total length the depth of the shelving unit on which it will rest.

In the following example you would have to ask:

- Set number 99 (linear, depth 400 mm, 4 levels, 1.690 mm long).
- Set number 582 (angle, depth 400 mm, 4 levels, 952 mm long).

- Standard height of uprights is 1.750 mm. For other heights, see the breakdown of the chosen set and replace the "AF17" uprights with "AF20" high uprights, adjusting the price of the set according to the prices of the chosen elements.
- Additional shelving levels can be added, up to a maximum total of 11 levels on standard uprights, by ordering required shelves, pins and corner hooks separately.
- Standard uprights type "AF17" can be replaced by mobile uprights "KMA17", when changing prices.

Hoods for cooking blocks

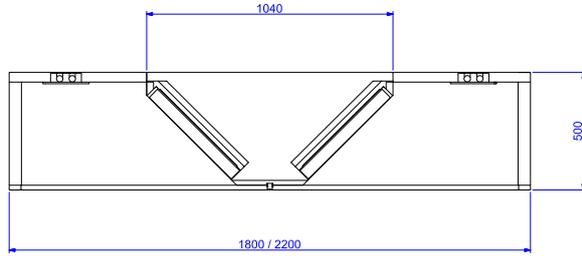

- Extraction hood specially designed to be installed in high-performance professional kitchens to suck out steam, odors, grease and heat generated in cooking and food processing operations.
- Made of stainless steel with satin finish.
- Accessible parts and edges in bent sheet metal to make cleaning easier and avoid cuts when handling.
- Extraction capacity maximized thanks to casing design and hood profile.
- Models larger than 2.20 meters (except 2.5 m model that comes in a single piece) are supplied in several pieces with a hidden joining kit, easy to assemble.
- Hermetically closed, solid and robust structure, eliminating the risk of dripping fat and escaping fumes.
- Guided grease drain system. Collection tray and drain hole for evacuation.
- 490x490x50 mm stainless steel slat filters.
- Interior plenum with independent flow regulation flaps for each filter.
- Models available with compensated air supply system, integrated into the hood, to prevent air flow falling directly on the chefs. Two external ventilation units, one for internal air extraction and the other for external air supply.

Inverted hoods

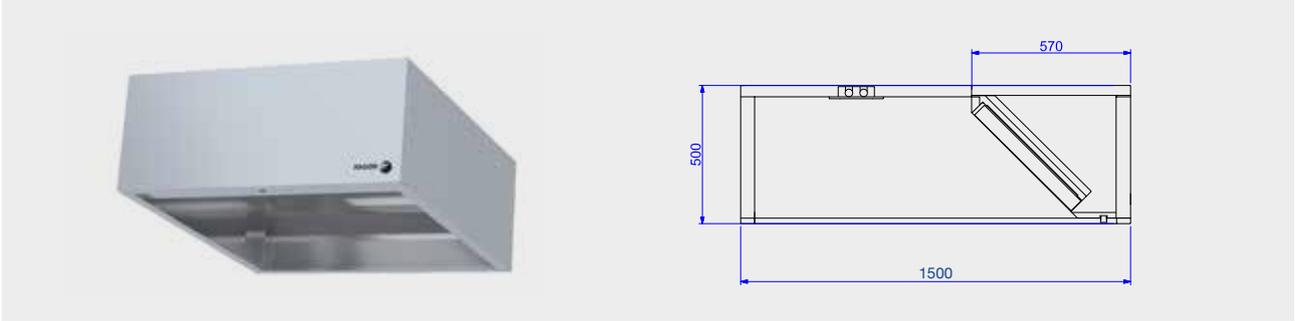

- Extraction hood specially designed to be installed in high-performance professional kitchens to suck out steam, odors, grease and heat generated in cooking and food processing operations.
- Inverted extraction ideal for ovens. Filter arrangement on the front that facilitate the absorption of steam generated during cooking and exposed when oven door is opened. Also recommended for large depth cooking surfaces or high temperature cooking.
- Made of stainless steel with satin finish.
- Accessible parts and edges in bent sheet metal to make cleaning easier and avoid cuts when handling.
- Extraction capacity maximized thanks to casing design and hood profile.

- Models larger than 2.20 meters (except 2.5 m model that comes in a single piece) are supplied in several pieces with a hidden joining kit, easy to assemble.
- Hermetically closed, solid and robust structure, eliminating the risk of dripping fat and escaping fumes.
- Guided grease drain system. Collection tray and drain hole for evacuation.
- 490x490x50 mm stainless steel slat filters.
- Interior plenum with independent flow regulation flaps for each filter.

Steam hoods

- Extraction hood specially designed to be installed in high-performance professional kitchens to suck out steam and heat generated in ware washing operations.
- Made of stainless steel with satin finish.
- Accessible parts and edges in bent sheet metal to make cleaning easier and avoid cuts when handling.
- Extraction capacity maximized thanks to casing design and hood profile.

- Models larger than 2.20 meters (except 2.5 m model that comes in a single piece) are supplied in several pieces with a hidden joining kit, easy to assemble.
- Hermetically closed, solid and robust structure, eliminating the risk of escaping fumes.
- Interior roof with slight inclination to guide condensations.

Buffet hoods

- Extraction hood specially designed to be installed in buffet areas to suck out steam, odors, grease and heat generated in show cooking stations.
- Made of stainless steel with satin finish.
- Accessible parts and edges in bent sheet metal to make cleaning easier and avoid cuts when handling.
- Extraction capacity maximized thanks to casing design and hood profile.
- Models larger than 2.20 meters (except 2.5 m model that comes in a single piece) are supplied in several pieces with a hidden joining kit, easy to assemble.
- Hermetically closed, solid and robust structure, eliminating the risk of dripping fat and escaping fumes.
- Guided grease drain system. Collection tray and drain hole for evacuation.
- 490x490x50 mm stainless steel slat filters.
- Interior plenum with independent flow regulation flaps for each filter.
- Models available with compensated air supply system, integrated into the hood, to prevent air flow falling directly on the chefs. Two external ventilation units, one for internal air extraction and the other for external air supply.

With plenum and compensating

Annexes

Terms and conditions of sale

01.

Prices

All prices included in our invoices are in euro, net ex works. Prices exclude delivery, unloading, positioning or installation.

02.

Transport

Goods are freighted under buyer's responsibility.

Delivery is free on truck: unloading not included.

Complains: goods are freighted under insurance coverage. It is clients' task to check goods for damages upon delivery.

Complains not related to transportation must be sent within 5 days from goods reception.

Besides above mentioned cases, goods received with signature on shipping bulletin are accepted henceforth.

03.

Packing

Standard packing is included in the present prices. Other packing will be quoted separately.

04.

Guarantee

We warranty all our products against manufacturer fault during 15 MONTHS from invoice date.

The faulty parts will be replaced with an ex-works delivery.

We shall not obliged to replace any goods or make any allowance or other arrangement if the defect has arisen from accident, misuse, neglect, incorrect installation, or any other cause beyond our control.

Where the defect is reasonably attributable to the fault of the manufacturer, the Manufacturer shall replace or repair the defective goods but shall not be liable for any cost of removal of the defective goods, or of the installation of replacement or any consequential loss or damage arisen there from.

The manufacturer's liability shall be limited to the repair or replacement of materials and components manufactured by us.

Where goods and components supplied by us are not of our's design and manufacture, the liability shall be limited to the guarantee provided by the manufacture of such goods and components.

05.

Publications

Right of new developments and technical modifications reserved.

Prices and article numbers subject to change without notice.

This price list supersedes all earlier list.

Specifications :

Some previous considerations have to be mention here than before were not indicated because we had consider as obviously clear for every one.

The technical descriptions of our machines trying to give a description of the main characteristics, nevertheless the revisions of the industrial process could produce modifications of any of these values.

Onnera Group S.Coop. have the right to introduce the modifications that could consider necessary if they not modify the main characteristics and requirements of the machine .

06.

Delay

Time for performance by the Manufacturer is given in good faith, as accurately as possible, but is not to be the essence of the contract. The Customer shall have not right to damages or to impose penalties in the event of late delivery by the Manufacturer or his clients, or to cancel the order or the contract for delay from any causes unless agreed in writing by the Manufacturer.

Delivery terms are merely indicative and subject to FAGOR production times. Delays do not entitle to any refund or liability whatsoever.

07.

Cancellation and restocking

The Manufacturer at its absolute discretion may agree to the return of goods by the customer provided that the goods are returned at the customer expense, in the same condition and in the original packing.

Any goods agreed by the Manufacturer as acceptable for return for any reason, excluding faulty goods, will be subject to a restocking charge of 35 % of the net invoice value.

7-1. Orders can not be cancelled if they have been confirmed and accepted in writing, specially tailor made equipment.

We'll consider any order confirmed if we don't receive any negative reaction in 24 hours from our confirmation date.

7-2. Onnera Group S.Coop. will only accept any cancellation as follows :

- If the dealer's cancel is before goods have left our warehouse a 50.00 € charge, net, per item will be made to cover our administration and logistics cost.
- If the dealer's cancel is after goods have left our warehouse, a charge of 20 % of invoice value will be charge plus an abortive delivery charge if it is necessary .
- If the goods had been unpacked, a minimum of 25 % of invoice value will be charge only for this concept.

08.

Payments

The payments will be made on time, even if the transport, the setting in service or the reception of the installation are delayed or canceled by reasons that are not attributable to us.

09.

Arbitration

The Parties should try to settle any disputes and differences which can arise by negotiations. If the parties will not come to agreement, the arisen dispute will be submitted for consideration to a neutral Court as it is The International Commercial Arbitration court of Paris, the arbitrator would also know and speak English and Spanish.
